Dramatization of Gilbreth's book about an efficiency expert father who puts his twelve children on a strict household schedule.

What do you get when you put twelve lively kids together with a father -- a famous efficiency expert -- who believes families can run like factories, and a mother who is his partner in everything except discipline? You get a hilarious tale of growing up that has made generations of kids and adults alike laugh along with the Gilbreths in *Cheaper by the Dozen*. Translated into more than fifty-three languages and made into a classic film starring Clifton Webb and Myrna Loy, *Cheaper by the Dozen* is a delightfully enduring story of family life at the turn of the 20th century.

Sheds light on the history of food, cooking, and eating. This collection of essays investigates the connections between food studies and women's studies. From women in colonial India to Armenian American feminists, these essays show how food has served as a means to assert independence and personal identity.

From Ben and Erin Napier, the stars of the hit HGTV show *Home Town*, comes *Make Something Good Today*, a memoir that tells us all to seek out the good in life, celebrate the beauty of family and friends, and prosper within our communities because everything we need in life to be happy, is within our grasp. Long before their hugely popular TV show, an expanding family, or demolition day on their dream home, Erin began keeping a daily online journal to help her stay focused on the positive and count her blessings in life. She never expected that her depictions of small-town life in the tiny swath of Mississippi where she Ben call home would catch the eye of a television producer and set them off on the journey of a lifetime. *Make Something Good Today* offers a behind-the-scenes glimpse into the struggles and triumphs of a couple that America has come to know and love for their easy humor, adoring relationship, and ability to utterly transform a place into something beautiful and personal. This is the poignant story of how Erin and Ben took a small, tight-knit town into their own hands (literally) and used ingenuity, community, and authenticity to rebuild a once-thriving American Main Street. And how, by combining Ben's carpentry skills with Erin's design eye, *Home Town* is making it clear to us all that small-town living can feel as big as you make it. Complete with family photographs, Erin's hand-painted sketches, and never-before-heard personal stories, this inspirational memoir reminds us all not to give up hope that great love stories are possible, big things can bloom in small towns, and there is always magic in the ordinary if you know where to look for it.

Readers of *Cheaper by the Dozen* remember Lillian Moller Gilbreth (1878-1972) as the working mom who endures the antics of not only twelve children but also an engineer husband eager to experiment with the principles of efficiency -- especially on his own household. What readers today might not know is that Lillian Gilbreth was herself a high-profile engineer, and the only woman to win the coveted Hoover Medal for engineers. She traveled the world, served as an advisor on women's issues to five U.S. presidents, and mingled with the likes of Eleanor Roosevelt and Amelia Earhart. Her husband, Frank Gilbreth, died after twenty years of marriage, leaving her to raise their eleven surviving children, all under the age of nineteen. She continued her career and put each child through college. Retiring at the age of ninety, Lillian Gilbreth was the working mother who "did it all." Jane Lancaster's spirited and richly detailed biography tells Lillian Gilbreth's life story-one that resonates with issues faced today by many working women. Lancaster confronts the complexities of how one of the twentieth century's foremost career women could be pregnant, nursing, or caring for children for more than three decades. Yet we see how Gilbreth's engineering work dovetailed with her family life in the professional and domestic partnership that she forged with her husband and in her long solo career. The innovators behind many labor-saving devices and procedures used in factories, offices, and kitchens, the Gilbreths tackled the problem of efficiency through motion study. To this Lillian added a psychological dimension, with empathy toward the worker. The couple's expertise also yielded the "Gilbreth family system," a model that allowed the mother to be professionally active if she chose, while the parents worked together to raise responsible citizens. Lancaster has woven into her narrative many insights gleaned from interviews with the surviving Gilbreth children and from historical research into such topics as technology, family, work, and feminism. Filled with anecdotes, this definitive biography of Lillian Gilbreth will engage readers intrigued by one of America's most famous families and by one of the nation's most successful women.

Day's collection of anecdotes and recollections of Father and Mother, which had appeared in various periodicals.

What is the difference between genuine faith and counterfeit faith? How do we know for sure that our faith is real? How can we know joy even in trials, and patience even in suffering? *James* is a book full of practical, life-changing help for real life. *James For You* makes clear its teaching and applies its challenges to the experiences of everyday Christians as Sam Allberry brings his clarity, wisdom and humour to every page. You can read through this book as a normal book... work through it as part of your daily Bible-reading routine... or use it to help you teach this letter, whether in small groups or from the pulpit.

Provides an account of the life and accomplishments of the efficiency expert, the first woman elected to the National Academy of Engineering, and the first female psychologist to have a postage stamp issued in her honor.

A faint noise reached the kitchen. The tenor and cadence so familiar, drifting from the streets not so far away. Women in the kitchen froze. Not one woman sobbed, not one child whimpered. This was a set of people that had seen and survived many riots before. Qasai Tola was now silent. And sitting within this circle of women, oblivious to all that was happening as the tiny town of Sultanpur burned, was Bena, biting

happily into the honey-soaked goodness of a hazaar waraq ka paratha. It was difficult to imagine that it had been less than five minutes since the first incoherent chant. Now it was loud and clear, and very, very near. Perhaps at their doorstep, and reaching an aching crescendo. Bena merrily joined in what seemed to her to be a joyful ditty about food. Eight-year-old Benazir, Bena to friends and family, is perhaps the happiest child you know, fond of jalebis, limericks and raw mangoes. She is surrounded by friends and family, and her life is everything an idyllic childhood should be: protected, loved and edged with rainbow-gold. One summer that bubble bursts when Bena is witness to riots, death, destruction and abuse, in a setting that explains little, and expects children to forget it all. But Bena, defined by her grit and audacity, is different. This, then, is the story of Bena's Summer...

Animals smooth and spiky, fast and slow, hop and waddle through the two hundred plus pages of the Caldecott Honor artist Steve Jenkins's most impressive nonfiction offering yet. Sections such as "Animal Senses," "Animal Extremes," and "The Story of Life" burst with fascinating facts and infographics that will have trivia buffs breathlessly asking, "Do you know a termite queen can produce up to 30,000 eggs a day?" Jenkins's color-rich cut- and torn-paper artwork is as strikingly vivid as ever. Rounding out this bountiful browsers' almanac of more than three hundred animals is a discussion of the artist's bookmaking process, an animal index, a glossary, and a bibliography. A bookshelf essential!

No growing pains have ever been more hilarious than those suffered loudly by the riotous Gilbreth clan. First there are a dozen red-haired, freckle-faced kids to contend with. Then there's Dad, a famous efficiency expert who believes a family can be run just like a factory. Finally there's Mother, his partner in everything except discipline. How they all survive such escapades as forgetting Frank Jr. in a roadside restaurant or going on a first date with Dad in the backseat or having their tonsils removed en masse will keep you in stitches. You can be sure they're not only cheaper, they're funnier by the dozen.

Captures the experience of growing up obsessed with baseball cards and explores what it means to be a fan of the game as the author marks the stages of his life through the cards he collected as a child.

For advanced undergraduate History of Psychology courses; also appropriate for graduate-level seminar courses in the discipline. Comprehensive and engaging in subject matter, this text integrates materials from religion (Judaism, Christianity, and Muslim as well as Buddhism and Confucianism), philosophy, and biology into the historical development of psychology. It includes a treatment of issues in the local and global society, an extensive look at women and minorities, and integrates overarching psychological principles, ideas, and applications that have shaped and will shape the global history of psychology. It highlights the interaction between psychology and the environmental context in which the discipline developed.

This open access book examines how the social sciences can be integrated into the praxis of engineering and science, presenting unique perspectives on the interplay between engineering and social science. Motivated by the report by the Commission on Humanities and Social Sciences of the American Association of Arts and Sciences, which emphasizes the importance of social sciences and Humanities in technical fields, the essays and papers collected in this book were presented at the NSF-funded workshop 'Engineering a Better Future: Interplay between Engineering, Social Sciences and Innovation', which brought together a singular collection of people, topics and disciplines. The book is split into three parts: A. Meeting at the Middle: Challenges to educating at the boundaries covers experiments in combining engineering education and the social sciences; B. Engineers Shaping Human Affairs: Investigating the interaction between social sciences and engineering, including the cult of innovation, politics of engineering, engineering design and future of societies; and C. Engineering the Engineers: Investigates thinking about design with papers on the art and science of science and engineering practice.

In New England in the late nineteenth-century, a fatherless family, happy in spite of its impoverished condition, is befriended by a very rich gentleman and his young son.

The hilarious and heartwarming #1 New York Times bestseller and its beloved sequel about a larger-than-life family with twelve kids. Cheaper by the Dozen: Made into two classic movies—one starring Clifton Webb and the other starring Steve Martin—and translated into more than fifty languages, Cheaper by the Dozen is an amusing, endearing, and unforgettable memoir of the Gilbreth clan as told by siblings Frank Jr. and Ernestine Gilbreth. Mother and Dad are world-renowned efficiency experts, helping factories fine-tune their assembly lines for maximum output at minimum cost. At home, the Gilbreths themselves have cranked out twelve kids, and Dad is out to prove that efficiency principles can apply to family as well as the workplace—with riotous results. "A touching family portrait that also happens to be very, very funny." —Jonathan Yardley, *The Washington Post* *Belles on Their Toes*: With twelve kids, life at the Gilbreth house has always been a big project. But after their father passes away, there are more challenges than ever. As their resourceful mother works to keep the family business running, the kids tackle the adventures of raising themselves and running a household. With the irrepressible blend of humor and good cheer characteristic of one of the most beloved families in America, the Gilbreths rise to every occasion and find a way to keep it all together. *Belles on Their Toes* was also made into a movie with Myrna Loy and Jeanne Crain reprising their roles. "There is a sincere and heartwarming atmosphere in this second volume that makes it almost better reading, if possible, than the first." —Library Journal

Dave Ross (1871-1943) and George Ade (1866-1944) were trustees, distinguished alumni and benefactors of Purdue University. Their friendship began in 1922 and led to their giving land and money for the 1924 construction of Ross-Ade Stadium, now a 70,000 seat athletic landmark on the West Lafayette campus. Their life stories date to 1883 Purdue and involve their separate student experiences and eventual fame. Their lives crossed paths with U.S. First Lady Eleanor Roosevelt, Henry Ford, Amelia Earhart, and Will Rogers among others. Gifts or ideas from Ross or Ade led to creation of the Purdue Research Foundation, Purdue Airport, Ross Hills Park, and Ross Engineering Camp. They helped Purdue Theater, the Harlequin Club and more. Ade, renowned author and playwright, did butt heads with Purdue administrators at times long ago, but remains a revered figure. Ross's ingenious mechanical inventions of gears still steer millions of motorized vehicles, boats, tractors, even golf carts the world over.

While most books approach power electronics and renewable energy as two separate subjects, *Power Electronics for Renewable and Distributed Energy Systems* takes an integrative approach; discussing power electronic converters topologies, controls and integration that are specific to the renewable and distributed energy system applications. An overview of power electronic technologies is followed by the introduction of various renewable and distributed energy resources that includes photovoltaics, wind, small hydroelectric, fuel cells, microturbines and variable speed generation. Energy storage systems such as battery and fast response storage systems are discussed along with application-specific examples. After setting forth the fundamentals, the chapters focus on more complex topics such as modular power electronics, microgrids and smart grids for integrating renewable and distributed energy. Emerging topics such as advanced electric vehicles and distributed control paradigm for power system control are discussed in the last two chapters. With contributions from subject matter experts, the diagrams and detailed examples provided in each chapter make *Power Electronics for Renewable and Distributed Energy Systems* a sourcebook for electrical engineers and consultants working to deploy various renewable and distributed energy systems and can serve as a comprehensive guide for the upper-level undergraduates and graduate students across the globe.

An accessible and engaging introduction to the life of Lillian Gilbreth. At a time when women were fixtures in the home and rarely accepted in many professions, Gilbreth excelled in both spheres, at one point winning mother and engineer of the year. She worked to establish the discipline of industrial psychology, was an engineer of domestic management and home economics, and was a mother of twelve children, the story of which was made famous by the book and then movie "Cheaper by the Dozen".

Peggy Rowe is at it again—this time giving a hilarious inside look at growing up Rowe, both before and after Mike's rise to fame. Since the day they said, "I do," Peggy's previous "doting" lifestyle met with her husband John's minimalist ways and became the backdrop for years of adventure and a quirky sense of humor because of their differences. From thoughts of wearing headlamps in the house to save energy, to squeezing out the last drop of toothpaste with a workbench vise, Peggy learned to pick her battles and celebrate the hilarity in each situation. Once their boys were born, woodstove mishaps and garbage dumping tales were the seed for Mike's obsession with doing dirty jobs and the comical presence he is known for today. As Mike rose to fame, Peggy was his biggest fan—who gave motherly advice and constructive criticism, of course. She baked cookies for Mike to take to Joan Rivers for a Christmas party hostess gift, and even wrote fan letters under faux names and mailed them from different cities to Mike's producer. By the time Mike hits it big, Peggy and John retire to face more adventures, with a lightning strike in their condo, an elderly friend who ate marijuana leaves, and entering into celebrity status by making Viva paper towel and Lee jeans commercials, plus so much more. Peggy's stories relive the details that intrigue and entertain old and new fans alike. So if you want a bigger, even funnier take on the Rowe family, *About Your Father and Other Celebrities I Have Known* delivers.

"Frank Gilbreth chronicles the extraordinary partnership of his parents, which produced not only a dozen children but landmark contributions in the field of scientific management. His story follows Lillie Gilbreth from her childhood in Oakland, California, through her commencement day speech at Berkeley (at a time when few women attended college) to the day in Boston where the slim, shy girl from the West met the big, brash, and bluster Easterner who ran a successful contracting business and dabbled in time and motion studies."--Inside flap of dust jacket.

The four stories weave together time and place, skills and secrets to make up the texture of a family's life in different generations. The epic journey of the Sager children by covered wagon from Missouri to Oregon in 1848.

*Reminiscences of Lillian Gilbreth*, co-author of *Cheaper by the Dozen* and recipient of honors and awards which are listed at the end of the book along with academic degrees, memberships, and books and articles she authored.

This first book by German-born psychologist Hans Jürgen Eysenck's is considered a classic amongst scholars and professionals of psychology. It describes the pitfalls of psychology, and the remedies that can be applied. A strong dependence on statistics and the experimental method is emphasized as essential to good psychology. The book is divided into four sections: Intelligence Testing, Vocational Psychology, Abnormal Behaviour, and Social Attitudes. Can an intelligence test administered to an eight year old predict adult performance? Is interviewing a good way of selecting the best applicant for a job? Is there such a thing as 'normal' behaviour? Can surveys such as the Gallup poll be of assistance to psychologists? Eysenck answers these and other questions. A book not to be missed by anyone interested in psychology.

Lillian Gilbreth is a stunning example of female ingenuity in the early twentieth century. At a time when women were standard fixtures in the home and barely accepted in many professions, Gilbreth excelled in both spheres, concurrently winning honors as 'Engineer of the Year' and 'Mother of the Year'. This accessible, engaging introduction to the life of Lillian Gilbreth examines her pivotal role in establishing the discipline of industrial psychology, her work as an engineer of domestic management and home economics, and her role as mother of twelve children - made famous by the book, and later movie, *Cheaper by the Dozen*. This book examines the life of an exceptional woman who was able to negotiate the divide between the public and domestic spheres and define it on her terms. About the *Lives of American Women* series: selected and edited by renowned women's historian Carol Berkin, these brief biographies are designed for use in undergraduate courses. Rather than a comprehensive approach, each biography focuses instead on a particular aspect of a women's life that is emblematic of her time, or which made her a pivotal figure in the era. The emphasis is on a 'good read' featuring accessible writing and compelling narratives, without sacrificing sound scholarship and academic integrity. Primary sources at the end of each biography reveal the subject's perspective in her own

words. Study questions and an annotated bibliography support the student reader.

In this delightful memoir by the authors of *Cheaper by the Dozen*, the twelve Gilbreth children cope with the loss of their father as they grow up together. With twelve kids, life at the Gilbreth house has always been a big project. But after their father passes away, there are more challenges than ever. And yet, with the irrepressible blend of humor and good cheer characteristic of one of the most beloved families in America, the Gilbreths happily rise to every occasion and find a way to keep it all together. With the clan struggling to make ends meet, everyone has to pitch in. As their resourceful mother works to keep the family business running without Dad, the kids tackle the adventures of raising themselves and running a household. Their attempts to pinch pennies frequently result in chaos. From tragedy and the trials of the first year as a single-parent household to the daily crises of a family with a double-digit headcount, the episodes in *Belles on Their Toes* are poignant, inspiring, and hilarious. "From start to finish, it is a reading joy," raved the *Chicago Sunday Tribune*. "There is a sincere and heartwarming atmosphere in this second volume," wrote *Library Journal*, "that makes it almost better reading, if possible, than the first." This ebook features an illustrated biography including rare photos from the authors' estates.
