Trans(in)fusion is a highly original book that tries to radicalize our ways of 'critical thinking' across disciplines. The book, refreshingly, brings into play critical philosophy, literary criticism, studies in mathematics, physics, chemistry and developmental biology, and various other disciplines and epistemes to set up a tenure and tenor of 'critical thinking'. The book is an exclusive intervention in how thinking across traditions and systems of thought can generate distinct interpretive experiences. It questions, in a unique transcultural and transversal bind, our ways of hermeneutic and literary-cultural thinking. Trans(in)fusion resets the dialectics between text and theory.

Mirza Asadullah Khan Ghalib was born in Agra in the closing years of the eighteenth century. A precocious child, he began composing verses at an early age and gained recognition while he was still very young. He wrote in both Urdu and Persian and was also a great prose stylist. He was a careful, even strict, editor of his work who took to publishing long before his peers. His predilection for writing difficult, obscure poetry peppered with complex metaphors produced a unique commentarial tradition that did not extend beyond his work. Commentaries on his current Urdu divan have produced a field of critical writing that eventually lead to the crafting of a critical lens with which to view the classical ghazal. The nineteenth century was the height of European colonialism. British colonialism in India produced definitive changes in the ways literature was produced, circulated and consumed. Ghalib responded to the cultural challenge with a far-sightedness that was commendable. His imagination sought engagement with a wider community of readers. His deliberate switch to composing in Persian shows that he wanted his works to reach beyond political boundaries and linguistic barriers. Ghalib's poetic trajectory begins from Urdu, then moves to composing almost entirely in Persian and finally swings back to Urdu. It is nearly as complex as his poetry. However, his poetic output in Persian is far more than what he wrote in Urdu. More important is that he gave precedence to Persian over Urdu. Ghalib's voice presents us with a double bind, a linguistic paradox. Exploring his life, works and philosophy, this authoritative critical biography of Ghalib opens a window to many shades of India and the subcontinent's cultural and literary tradition.

Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.
