What is the 'new economy'? Where is it? How does it differ from the 'old economy'? How does the 'new economy' relate to issues such as the nature of work, social inclusion and exclusion? Geographies of the New Economy explores the meaning of the 'new economy' at the global scale from the perspective of advanced post-socialist and emerging economies. Drawing on evidence from regions around the world, the book debates the efficacy of the widely used concept of the 'new economy' and examines its socio-spatial consequences. This book is important reading for policy-makers, academics and students of geography, sociology, urban studies, economics, planning and policy studies.

In Never Bet the Farm two leading entrepreneurs, Anthony Iaquinto and Stephen Spinelli, turn much of the so-called expert advice for entrepreneurs on its head. They show that by preparing for setbacks and using a framework that can help reduce risks and simplify decision making, entrepreneurs can increase their probability for success. They refute the idea that there is an ideal entrepreneurial "type," and show that luck can be as important as a business plan in many enterprises. Above all, the authors emphasize that entrepreneurship is a career, not a one-time event, and winners are those who can keep themselves in the game. Never Bet the Farm is an easy-to-understand and attractive tool for anyone who has a business idea, but who might be wary of the risks implied in starting their own business.

What does Doing the Impossible really mean? This book is for those who have a desire to achieve greatness and are ready to take the steps to turn that desire into a reality. At one point or another in this book, you will experience several different reactions - excitement, curiosity, joy, laughter, or even tears - but the ultimate goal is to encourage and challenge you to make a decision to do the impossible. That may have a totally different meaning to you than it did to Steve Jobs, Thomas Edison, or any of the other role models we will look at; but whatever Doing the Impossible means to you, the goal of this book is to help you realize that you have the capacity to do what the critics think is impossible. - Patrick Bet-David, Introduction to Doing the Impossible. Doing the Impossible is a roadmap for those who want to do something big with their lives. The book goes over 25 steps that the reader should take to re-create themselves, identify their cause, and make history. Patrick Bet-David shares his own impossible crusade and gives key principles for anyone looking to do the same.

There are 2,600 hospitals in Asia, Africa and South America which could be classified as "Mission Hospitals" - far off the beaten path, providing basic medical service to the poorest people of the world. The Hospital at the End of the World tells the story of a nurse from the USA and his first experience as a teaching nurse in Nepal. Joe Niemczura brings to life the day-to-day realities of life in a rural teaching hospital, literally at the "end of the road." The harsh realities of a lack of modern medical equipment when mixed with the humanness of endurances demonstrates that above all, it is the individual who matters; both patient and caregiver. All else pales in comparison. The strength of this story is in relationships with students, physicians, other nurses, patients, families and most importantly with Nepal itself. There is a sense of community connectedness which the author brings alive as the reader becomes one with the story. The heartbreak and grief of death to the celebrations of life will elicit those same emotions. The thread through it all is the author's own journey as he discovers himself and renews his spirituality. The reader is immediately pulled into the drama and nakedness, and the beauty and mystery of this incredible part of the world. Ellen L. Bridge, RN, BS, MTS Public Health Nursing Consultant

Nepali has also been adopted by peoples of the Himalayan region who belong to different linguistic groups, and is now understood throughout the whole of Nepal, the Darjeeling

region of West Bengal, Sikkim, Bhutan and parts of Tibet, where it has functioned as a language of trade and commerce for well over two centuries. The aim of this course, which covers the whole grammar and all the constructions of modern Nepali, is to present a full description of both the spoken and written forms of modern standard Nepali, and to enable the student to understand, speak and read most types of Nepali he or she is likely to encounter. The earlier lessons concentrate mainly on the spoken style, and the conversation passages whilst the later lessons concern religious, political and literary topics. Nepal is a land which already provides great enjoyment to the increasing number of visitors from the west. A knowledge of the language leads to a deeper understanding of the culture of its people, and the object of A Course in Nepali is to provide the means of learning it without much difficulty. Earlier editions of this course have been the standard book for students at the School of Oriental and African Studies, and it is without question the established market leader.

In a terrifyingly short time, a male college instructor and his female student descend from a discussion of her grades into a modern reprise of the Inquisition. Innocuous remarks suddenly turn damning. Socratic dialogue gives way to heated assault. And the relationship between a somewhat fatuous teacher and his seemingly hapless pupil turns into a fiendishly accurate X ray of the mechanisms of power, censorship, and abuse.

From the foreword: "One of the High Line's powers is its ability to evoke time, to remind us of the changes we've experienced during our own lives, to bring forth echoes of the past, and to make us guess what life might be like years from now. I love the photos on these pages, because they have that power, too." --Joshua David, Co-Founder of the Friends of the High Line. Ten Avenues Press, in association with Friends of the High Line, announce the publication of High Line Nudes. In 2006, photographer Kevin McDermott took three of his friends up on the abandoned railroad tracks that would become New York City's High Line park to shoot a series of nudes. As McDermott states in his introduction, "at the time I took these photos, what I sought from its beauty was its sense of isolation, being alone, surrounded by nature in the middle of this metropolis." A decade later, this location is now one of the most visited tourist destinations in NYC and one of the largest real estate developments in the world. High Line Nudes captures a seemingly impossible, but beautiful moment in the history of the West Side Rail Yards, Chelsea and an ever changing New York City. The cloth hardcover book is beautifully printed in color and rich black and white duotone images.

This pioneering monograph on the anthropology of the Badi, an untouchable caste in West Nepal whose livelihood depends on the proceeds of prostitution, serves to raise awareness of the risks of their way of life, and to facilitate empowerment of new leaders within their communities. While the initial focus of aid organisations was on prevention of the spread of the HIV virus, the ensuing resources, training and encouragement provided by these various agencies have changed the Badi's culture of fatalism and have facilitated development of female leaders.

Rituals of Ethnicity is a transnational study of the relationships between mobility, ethnicity, and ritual action. Through an ethnography of the Thangmi, a marginalized community who migrate between Himalayan border zones of Nepal, India, and the Tibetan Autonomous Region of China, Shneiderman offers a new explanation for the persistence of enduring ethnic identities today despite the increasing realities of mobile, hybrid lives. She shows that ethnicization may be understood as a process of ritualization, which brings people together around the shared sacred object of identity. The first comprehensive ethnography of the Thangmi, Rituals of Ethnicity is framed by the Maoist-state civil conflict in Nepal and the movement for a separate state of Gorkhaland in India. The histories of individual nation-states in this geopolitical hotspot—as well as the cross-border flows of people and ideas between them—reveal the far-reaching and mutually entangled discourses of democracy, communism, development, and indigeneity that have transformed the region over the past half century. Attentive to the competing claims of diverse members of the Thangmi community, from shamans to political activists, Shneiderman shows how Thangmi ethnic identity is produced collaboratively by individuals through ritual actions embedded in local, national, and transnational contexts. She builds upon the specificity of Thangmi experiences to tell a larger story about the complexities of ethnic consciousness: the challenges of belonging and citizenship under conditions of mobility, the desire to both lay claim to and remain apart from the civil society of multiple states, and the paradox of self-identification as a group with cultural traditions in need of both preservation and development. Through deep engagement with a diverse, cross-border community that yearns to be understood as a distinctive, coherent whole, Rituals of Ethnicity presents an argument for the continued value of locally situated ethnography in a multisited world. Leila Farsakh provides the first comprehensive analysis of the rise and fall of Palestinian labour flows to Israel. Highlighting the interdependence between Israel's confiscation of Palestinian land and the use of Palestinian labour, she shows how migration has been the result of evolving dynamics of Israeli occupation and the reality of Palestinian labour force growth. This study analyzes the pattern of Palestinian labour supply, the role of Israel's territorial and economic policies in the Occupied Territories in releasing Palestinian labour from the land, and the nature of Israeli demand for Palestinian workers, especially in the construction sector where the majority of commuting labourers are concentrated. New light is shed on the growth of illegal Israeli settlements in the West Bank and Gaza Strip, which are being built by Palestinian workers. Palestinian Labour Migration to Israel is original in its analysis of the contrasting forces of separation and the integration between Israel and the Palestinian territories, showing that the changing patterns in labour flows reflect a process of redefinition of the 1967 borders. It will be of valuable interest to economists and development specialists as well as to scholars, policy makers and all those concerned with the Palestinian-Israeli conflict.

Here, Thierry Zarcone and Angela Hobart offer a vigorous and authoritative exploration of the link between Islam and shamanism in contemporary Muslim culture, examining how the old practice of shamanism was combined with elements of Sufism in order to adapt to wider Islamic society. Shamanism and Islam thus surveys shamanic practices in Central Asia, the Middle East, North Africa and the Balkans, to show how the Muslim shaman, like his Siberian counterpart, cultivated personal relations with spirits to help individuals through healing and divination. It explores the complexities and variety of rituals, involving music, dance and, in some regions, epic and bardic poetry, demonstrating the close links between shamanism and the various arts of the Islamic world. This is the first in-depth exploration of 'Islamized shamanism', and is a valuable contribution to the field of Islamic Studies, Religion, Anthropology, and an understanding of the Middle East more widely.

The Principles and Practice of International Aviation Law provides an introduction to, and demystification of, the private and public dimensions of international aviation law. Unlike other global sectors, the air transport industry is not governed by a discrete area of the law, but by disparate transnational regulatory instruments. Everything from the routes that an international air carrier can serve to the acquisition of its fleet and its liability to passengers and shippers for incidents arising from its operations can be the object of bilateral and multilateral treaties that represent diverse and often contradictory interests. Beneath this are hundreds of domestic regulatory regimes that also apply national and international rules in disparate ways. The result is an agglomeration of legal cultures that can leave even experienced lawyers and academics perplexed. By combining classical doctrinal analysis with insights from newer disciplines such as international relations and economics, the book maps international aviation law's complex terrain for new and veteran observers alike.
