There are times when what a youngster does or says is absolutely baffling to mom or dad. How can 15-year-old Sarah spend hours prepping her hair and not give one second to cleaning her room? Likewise, what's wrong with 10-year-old Mark who knows he shouldn't bully his little brother but does so anyway? Certainly parents want answers, and no one is surprised when a parent falls back on interrogating a child or teen with repeated "Why?" or "What were you thinking?" questions. Unfortunately, searching for the reasons children behave as they do by asking the ubiquitous "Why?" is ultimately unsuccessful and, frankly, irrelevant. "I don't know," "Because," or "I wasn't thinking," is the usual child response, resulting in frustrated parents and youngsters who feel embarrassed, stupid or annoyed. Drs. Charles C. Larson

and John B. Dockstader, each with more than thirty years of experience working with parents and youngsters, advise parents to step back from situations such as those described and offer, instead, techniques for evaluating and solving family problems without needing to know “Why?”. The authors counsel parents how to determine if a problem exists, who owns the problem and who is best equipped to solve it. Numerous real-life examples are presented to illustrate the problem-solving process and solutions. In *Parenting Without Guilt*, parents learn not only to solve family problems, but also why the challenges parents and youngsters face today are more demanding than ever before. In addition, parents are guided through each stage of child development, from birth to young adulthood, with attention to typical problems any parent may anticipate. Resources that parents can use to help them resolve family discords are discussed, to include working with educators, clergy, pediatricians, private practitioners and others. With compassion, humor and wisdom gained through practical experience, Drs. Larson and Dockstader offer information and advice that provides any parent with the skills to raise successful children without guilt, anxiety or distress.

Teachers, especially those in nursery and pre-primary schools, know that it takes specialized learning aids to help children learn how to identify objects, develop eye-

hand and fine motor coordination, improve attention span, and learn to focus on the activity in which they are participating. The aim of BEE CLEVER Activity Books Keeping these important learning factors in mind, a pre-school educator and counsellor has created a series of simple and stimulating activity books. These help develop the skills a child needs, plus contribute to the further development of the child's 'writing readiness'. Pallavi Dalal - the creator of BEE CLEVER Activity Books - has spent over 25 years working with pre-school children. She says, "There has been much thought, care, understanding, laughter and joy that has gone into creating these books. I can only hope that they will bring children many 'magical moments' of learning, and spending time with each other in a happy and relaxed frame of mind." Two Important Factors While planning any activity for children, two important principles of learning are always uppermost in her mind: 1. "I see and I remember." 2. "I do and I understand." She has designed these books to develop differentiating and logical thinking skills in children and evaluate their interests in certain areas, without making them feel like they are being 'tested'! How BEE CLEVER books are DIFFERENT - Objects illustrated are those a child is generally familiar with. - Instructions can be read to a child without having to simplify them. - Illustrations are bold and clear for the child to see and work comfortably. - Accurate use of grammar, punctuation and spelling. - Each book in the series explains the value of doing that specific activity. - Simple 'Do's and Don'ts' create a 'win-win' situation for the child. A clear and student friendly introduction to the field of child development, from a psychological approach.

Inspired by his years as a clinical psychologist, first-time

author, Dan Dylan, writes about the cycle of abuse in his novel, "Chameleon" (ISBN 1439234140). Adults interested in psychology, sociopathy, and the cyclical nature of child abuse should find this novel realistic and gripping. Retired FBI profiler John Foster, Ph.D., now a respected Chicago psychologist, has diagnosed and treated mental disorders throughout his career, but he finds himself seriously challenged by the diagnostic puzzle presented by suspected sociopath Eddie Vinson. Foster becomes snared in a lethal game of one-up-manship and must draw on his years of professional training and experience to anticipate Vinson's actions as he consults with law enforcement to bring him to justice. Foster's brief therapeutic contacts with Vinson yield a complex clinical picture, but there is sufficient evidence to indicate that Eddie Vinson was a victim of chronic parental neglect and repeated sexual abuse. Thus, "Chameleon" chronicles the evolution of a child victim to adult sociopath whose actions and distorted views of self and society perpetuate the cycle of abuse. "Incidents of abuse grab headlines and occur every minute of every day," Dylan said. "Neglect and abuse have consequences that impact us all. In the absence of treatment, some abused children can-and do-become abusive or violent adults." With more than 35 years of practice in clinical psychology, Dylan has witnessed the cycle of abuse firsthand, often spanning multiple generations, and in extreme cases, adult survivors of abuse pass on to their children the trauma of their own victimization. Using fiction as his medium, Dylan shares with his readers one psychologist's perspective of child abuse and its ramifications.

Poor Sid was getting too big for his shell, so he sets off on an adventure in search of a new one. During this time he discovers all of the shells are missing and in their place remains only garbage. Stacey Marie Johnston has created a

book that is not only heartfelt and humorous but one that shows the effect of pollution on the environment. Follow Sid's journey to find a new home as he runs into a few surprise's, along with exciting and interesting encounters.

A man patiently watches a group of young girls walk home from school, waiting for the perfect moment to take the one child he has designated as his next victim. However, what this predator does not know is that he, too, is being stalked. There is someone in the shadows-a trained Citizen-who is ready to make sure that the child under his assigned protection is never harmed. One pedophile, one abuser, one killer at a time; this Citizen and others like him will take a stand against those who prey on the weak and the innocent.

More students learn from John Santrock's Adolescence than from any other text in this field. Students and instructors rely on the careful balance of accurate, current research and applications to the real lives of adolescents. The fully-revised eleventh edition includes a new chapter on health, expanded coverage of late adolescence, and more than 1200 research citations from the 21st century.

There are many challenges that children with Asperger's syndrome (AS) will have to overcome to reach their highest potential. In order to help them progress in constructive ways, those who care for and about these children often need to make changes too, sometimes difficult ones. Stuck provides a roadmap for understanding and addressing the complexities of AS, especially the presence of obsessive-compulsive behaviors (OCBs) that so frequently complicate basic functioning for both the child and others involved in their lives. The more knowledge and skills that caregivers can gain about these issues the better. Whether you are a parent, an educator, or a healthcare professional that wants to increase their awareness about Asperger's syndrome and obsessive-compulsive behaviors, you can benefit from the useful

concepts and practical, action-oriented activities presented throughout this book.

"God Made This/Dieu a fait ceci" is an English/French bilingual book for children. This is Volume 5 in the series and this is Level 1 for infants to toddlers. The books in this juvenile non-fiction series are intended to teach reading in two languages; they are not "story" books. This book includes single words and pairs of words for the ear training of infants as well as toddlers. The pictures help infants associate sounds with symbols--images at first and ultimately words at the toddler level and beyond. Toddlers will be able to repeat words, word pairs, phrases, and brief sentences aided by the picture cues. They will gradually be able to read the words using the printed word as their cue. This volume presents images of the natural world around us and are of high interest to young children. The natural environment, earth, sky, water features, animals, flowers, fruits, vegetables, and a variety of types of people are included. The book teaches that "God made this." Color photos and illustrations were carefully selected to captivate your child's interest. Words and sentences were judiciously chosen and crafted to facilitate learning for both age groups. Words are re-entered throughout

the book to help your child feel a sense of accomplishment. It is suggested that only one language be read at a time. Start with the child's first or "maternal" language for several reading sessions, then introduce the second language. At no time should the two languages be read during the same session. This volume should be of interest to English speakers who want to teach their child(ren) French as well as French speakers who wish to teach their child(ren) English. In addition, speakers of other languages will find the book useful for teaching their child(ren) both French and English. The books are ideal for day care centers, preschools, and elementary schools that offer or wish to include bilingual education or ESL in their educational programs. These bilingual print books and ebooks are suitable for the bilingual education of young people from infant to early elementary school. These bilingual print books and ebooks for children can play a major role in any bilingual or ESL education program for children. There are four levels for each topic or title making it easier for ESL or bilingual children to progress from one level to the next. Level 1 is for infants and toddlers and would be primarily read by parents. Level 2 is for toddlers and pre-schoolers and could be used by parents for the younger children or by day care and pre-school personnel in environments where an English/French bilingual component is included in the program. Level 3 is for pre-schoolers through kindergarten. And level 4 is intended for K-2. There is a full range of topics, 20 volumes in all, in the series of English/French print and ebooks that provide a thorough preparation in

English/French education. Offering children's print books as well as children's ebooks provides parents, caregivers, and teachers with a choice and flexibility of format to meet the needs of child education. Children's bilingual print books have the advantage of convenience of use while children's bilingual ebooks include media and are easier to store, making children's bilingual education more accessible and convenient than ever before. These are not fiction story books or picture books. They are juvenile non-fiction bilingual print books and ebooks that are educational in nature, scope, and purpose. As such they meet the academic content standards for juvenile non-fiction bilingual education. For book examination and consideration by schools and teachers these books may also be categorized as juvenile non-fiction education French, juvenile non-fiction languages French, and juvenile non-fiction English/French. The BISAC Category is FOR018000 Foreign Language Study / Multi-Language Phrasebooks. Children, Fourteenth Edition provides an overview of children's development, from biological beginnings through infancy and early childhood to adolescence. By highlighting the connections among different aspects of development, the text helps students to better understand the concepts covered. With the help of several experts in the field, John Santrock discusses current research and real-world applications, helping students see how developmental psychology plays a role in their own lives and future careers. Additionally, through an integrated, personalized digital learning program, students gain the insight they need to study

smarter and improve performance. The Milestones video program shows students what developmental concepts look like by letting them watch actual humans develop. Students are able to track several individuals starting from infancy and watch them achieve major developmental milestones, both physically and cognitively. Reaching Today's Learners Today's students are as different in some ways from the learners of the last generation as today's discipline of child development is different from the field 30 years ago. Students now learn in multiple modalities; rather than sitting down and reading traditional printed chapters in linear fashion from beginning to end, their work preferences tend to be more visual and more interactive, and their reading and study often occur in short bursts. For many students, a traditionally formatted printed textbook is no longer enough when they have instant, 24/7 access to news and information from around the globe. Two features that specifically support today's students are the adaptive ebook (SmartBook) and the Learning Goals System. • SmartBook helps students distinguish the concepts they know from the concepts they don't, while pinpointing the concepts they are about to forget. SmartBook continuously adapts to create a truly personalized learning path and offers students learning resources such as videos, Concept Clips, and slides to further reinforce difficult concepts. • The Learning Goals Systems provides extensive learning connections through the chapters, connecting the chapter-opening outline, goals, mini-chapter maps, questions, and end-of-chapter summary. • Assignable within Connect, Concept

Clips help students break down key themes and difficult concepts in psychology. Using easy-to-understand analogies, visual cues, and stimulating animations, Concept Clips make psychology meaningful to everyday life. New to This Edition Students helped inform the revision strategy of Children. Content revisions are informed by data collected anonymously through McGraw-Hill's SmartBook; the data pinpoint the concepts that give students the most difficulty. Additional changes include the following: ? The latest research features more than 1,200 newly added citations from 2016, 2017, and 2018. ? This edition places further emphasis on diversity and culture. ? Identity issues, in particular, gender and transgender, are explored more in-depth. ? New content highlights the increasing use of e-cigarettes during pregnancy. ? The text now features a discussion on how infant growth is not smooth and continuous but rather is episodic, occurring in spurts.
