'Stimulating, intelligent and enjoyable discussions of the most important issues of our day.' STEVEN PINKER 'From entrepreneurs to athletes, and world leaders to entertainers, this is a fascinating collection of interviews with some of the world's most influential individuals.' MARK CUBAN 'Thought Economics is a fine rebuke to the soundbite culture; these interviews are driven by real curiosity, and there is a wealth of wisdom here.' EDWARD STOURTON Since 2007, entrepreneur and philanthropist Vikas Shah has been on a mission to interview the people shaping our century. Including conversations with Nobel prizewinners, business leaders, politicians, artists and Olympians, he has been in the privileged position of questioning the minds that matter on the big issues that concern us all. We often talk of war and conflict, the economy, culture, technology and revolutions as if they are something other than us. But all these things are a product of us - of our ideas, our dreams and our fears. We live in fast-moving and extraordinary times, and the changes we're experiencing now, in these first decades of the twenty-first century, feel particularly poignant as decisions are made that will inform our existence for years to come. What started out as a personal interest in the mechanisms that inform our views of the world, and a passion for understanding, has grown into a phenomenal compilation of once-in-a-lifetime conversations. In this incredible collection, Shah shares some of his most emotive and insightful interviews to date. Chapters include: Chapter 1. On Identity: Who We Are Chapter 2. On Culture: The Context of Humanity Chapter 3. On Leadership: Bringing Humanity Together Chapter 4. On Entrepreneurship: The Creators and the Makers Chapter 5. The Brave Athlete solves the 13 most common mental conundrums athletes face in their everyday training and in races. You don't have one brain—you have three; your ancient Chimp brain that keeps you alive, your modern Professor brain that navigates the civilized world, and your Computer brain that accesses your memories and runs your habits (good and bad). They fight for control all the time and that's when bad things happen; you get crazy nervous before a race, you choke under pressure, you quit when the going gets tough, you make dumb mistakes, you worry about how you look. What if you could stop the thoughts and feelings you don't want? What if you could feel confident, suffer like a hero, and handle any stress? You can. The Brave Athlete from Dr. Simon Marshall and Lesley Paterson will help you take control of your brain so you can train harder, race faster, and better enjoy your sport. Dr. Marshall is a sport psychology expert who trains the brains of elite professional athletes. Paterson is a three-time world champion triathlete and coach. Together, they offer this innovative, brain training guide that is the first to draw from both clinical science and real-world experience with athletes. That means you won't find outdated "positive self-talk" or visualization gimmicks here. No, the set of cutting-edge mental skills revealed in The Brave Athlete actually work because they challenge the source of the thoughts and feelings you don't want. The Brave Athlete is packed with practical, evidence-based solutions to the most common mental challenges athletes face. Which of these sound like you? · Why do I have thoughts and feelings I don't want? · I wish I felt more like an athlete. · I don't think I can. · I don't achieve my goals. · Other athletes seem tougher, happier, and more badass than me. · I feel fat. · I don't cope well with injury. · People are worried about how much I exercise. · I don't like leaving my comfort zone. · When the going gets tough, the tough leave me behind. · I need to harden the f\*ck up. · I keep screwing up. · I don't handle pressure well. With The Brave Athlete: Calm the F\*ck Down and Rise to the Occasion, you can solve these problems to become mentally strong and make your brain your most powerful asset. Whatever your biggest goals are in life, learning to think like an athlete is a game changer. If you ask research psychologist Noel Brick and bestselling fitness author and journalist Scott Douglas, the "dumb jock" stereotype is way out of bounds. Modern advances in sports psychology confirm what fans have known all along: No world-class athlete—whether an Olympic runner, swimmer, or cyclist, or a pro basketball, baseball, or football player—gets to the top without a strong mental game. Champion competitors have unique ways of taking stock of a situation, self-motivating, and even thinking about time. Cutting-edge discoveries (including those by Dr. Brick) reveal exactly how they do it—and how we can, too. You don't need to be facing a literal hurdle to use elite athletes' tool kits of strategies: They can help you stick the landing at a job interview or get your thesis to the finish line. Brick and Douglas pair groundbreaking science with a highlight reel of instructive moments from across the sports realm to show how legendary marathoner Meb Keflezighi runs on self-talk and how making if-then plans at practice buoyed Michael Phelps to a gold medal at the Olympics. Wherever you are in your own ambitions—from the "middle muddle" to the final stretch—The Genius of Athletes will put you right in the zone.

From one of the world's most admired business leaders, here is a remarkable book that will forever change the way you think about management. The meteoric rise of UK supermarket chain Tesco from humble beginnings to its current status as one of the largest retailers in the world can be largely credited to one man—its recently departed CEO, Terry Leahy. Leahy's unflagging drive and commitment to progress, his no-nonsense approach to leadership, and his visionary perspective on the manager's role made him a transformative figure not only within his company but within the culture at large—he was voted Business Person of the Year by the Sunday Times in 2010. But what's Leahy's secret? How did a workingclass kid whose first job with Tesco was stocking shelves rise to become his company's most dynamic leader—quadrupling the firm's profits and creating a new job every twenty minutes for more than ten years? How did he steer a midlevel supermarket chain to such success that it now accounts for one-seventh of all British spending on consumer goods, with truly global reach and thriving departments in everything from mobile-phone operation to financial services? The answer can be found in ten deceptively simple words—words such as truth, loyalty, courage, and balance. Everyone thinks they understand what these words mean. But what Leahy learned in his fourteen years as the world's greatest turnaround artist was that there is far more to actually practicing these time-honored values than most people know. Management in 10 Words is Terry Leahy's unflinchingly honest, deeply insightful account of the most valuable, hard-won lessons of his career. For any leader who aspires to be truly exceptional, this book is a must-read.

"The Motivation Manifesto is a poetic and powerful call to reclaim our lives and find our own personal freedom. It's a triumphant work that transcends the title, lifting the reader from mere motivation into a soaringly purposeful and

meaningful life. I love this book." —Paulo Coelho The Motivation Manifesto is a pulsing, articulate, ferocious call to claim our personal power. World-renowned high performance trainer Brendon Burchard reveals that the main motive of humankind is the pursuit of greater Personal Freedom. We desire the grand liberties of choice—time freedom, emotional freedom, social freedom, financial freedom, spiritual freedom. Only two enemies stand in our way: an external enemy, defined as the social oppression of who we are by the mediocre masses, and an internal enemy, a sort of self-oppression caused by our own doubt and fear. The march to Personal Freedom, Burchard argues, can be won only by declaring our intent and independence, stepping into our personal power, and battling through self-doubt and the distractions of the day until full victory is won. Recalling the revolutionist voices of the past that chose freedom over tyranny, Burchard—at times poetic yet always fierce—motivates us to free ourselves from fear and take back our lives once and for all.

A step-by-step system for mastering trading psychology. Think about your most costly and recurring trading mistakes. Chances are that they're related to common errors, such as chasing price, cutting winners short, forcing mediocre trades, and overtrading. You've likely tried to fix these errors by improving your technical skills, and yet they persist. That's because the real source of these mistakes is not technical—they actually stem from greed, fear, anger, or problems with confidence and discipline. If you are like most traders, you probably overlook or misunderstand mental and emotional obstacles. Or worse, you might think you know how to manage them, but you don't, and end up losing control at the worst possible time. You're leaving too much money on the table, which will either prevent you from being profitable or realizing your potential. While many trading psychology books offer sound advice, they don't show you how to do the necessary work. That's why you haven't solved the problems hurting your performance. With straight talk and practical solutions, Jared Tendler brings a new voice to trading psychology. In *The Mental Game of Trading*, he busts myths about emotions, greed, and discipline, and shows you how to look past the obvious to identify the real reasons you're struggling. This book is different from anything else on the market. You'll get a step-by-step system for discovering the cause of your problems and eliminating them once and for all. And through real stories of traders from around the world who have successfully used Tendler's system, you'll learn how to tackle your problems, improve your day-to-day performance, and increase your profits. Whether you're an independent or institutional trader, and regardless of whether you trade equities, forex, or cryptocurrencies, you can use this system to improve your decision-making and execution. Finally, you have a way to reach your potential as a trader. Now's the time to make it happen.

#1 New York Times Bestseller Legendary venture capitalist John Doerr reveals how the goal-setting system of Objectives and Key Results (OKRs) has helped tech giants from Intel to Google achieve explosive growth—and how it can help any organization thrive. In the fall of 1999, John Doerr met with the founders of a start-up whom he'd just given \$12.5 million, the biggest investment of his career. Larry Page and Sergey Brin had amazing technology, entrepreneurial energy, and sky-high ambitions, but no real business plan. For Google to change the world (or even to survive), Page and Brin had to learn how to make tough choices on priorities while keeping their team on track. They'd have to know when to pull the plug on losing propositions, to fail fast. And they needed timely, relevant data to track their progress—to measure what mattered. Doerr taught them about a proven approach to operating excellence: Objectives and Key Results. He had first discovered OKRs in the 1970s as an engineer at Intel, where the legendary Andy Grove ("the greatest manager of his or any era") drove the best-run company Doerr had ever seen. Later, as a venture capitalist, Doerr shared Grove's brainchild with more than fifty companies. Wherever the process was faithfully practiced, it worked. In this goal-setting system, objectives define what we seek to achieve; key results are how those top-priority goals will be attained with specific, measurable actions within a set time frame. Everyone's goals, from entry level to CEO, are transparent to the entire organization. The benefits are profound. OKRs surface an organization's most important work. They focus effort and foster coordination. They keep employees on track. They link objectives across silos to unify and strengthen the entire company. Along the way, OKRs enhance workplace satisfaction and boost retention. In *Measure What Matters*, Doerr shares a broad range of first-person, behind-the-scenes case studies, with narrators including Bono and Bill Gates, to demonstrate the focus, agility, and explosive growth that OKRs have spurred at so many great organizations. This book will help a new generation of leaders capture the same magic.

"The Inner Winner" contains proven performance psychology tactics that can be used to enhance performance in sport, business, and life in general.

'Entertaining and enlightening ... offers ways to temper our anti-social tendencies.' Dr Michael Mosley, science journalist and TV presenter It can often seem that we are utterly surrounded by temptation, from the ease of online shopping and the stream of targeted advertising encouraging us to greedily acquire yet more stuff, to the coffee, cake and fast-food shops that line our streets, beckoning us in to over-indulge on all the wrong things. It can feel like a constant battle to stay away from the temptations we know we shouldn't give in to. Where exactly do these urges come from? If we know we shouldn't do something, for the sake of our health, our pockets or our reputation, why is it often so very hard to do the right thing? Anyone who has ever wondered why they never seem to be able to stick to their diet, anyone to whom the world seems more vain and self-obsessed than ever, anyone who can't understand why love-cheats pursue their extra-marital affairs, anyone who struggles to resist the lure of the comfy sofa, or anyone who makes themselves bitter through endless comparison with other people, anyone who is addicted to their smartphone – this book is for you. The Science of Sin brings together the latest findings from neuroscience research to shed light on the universally fascinating subject of temptation – where it comes from, how to resist it and why we all tend to succumb from time to time. With each chapter inspired by one of the seven deadly sins, neurobiologist Jack Lewis illuminates the neural battles between temptation and restraint that take place within our brains, suggesting strategies to help us better manage our most troublesome impulses with the explicit goal of improving our health, our happiness and our productivity – helping us to say 'no!' more often, especially when it really counts.
