“[An] impressive history of timekeeping.”—Horn Book Bruce Koscielniak, in this Common Core text exemplar, tells the intriguing story of the many years spent tinkering and inventing to perfect the art of telling time. When time itself was undefined, no one knew the difference between a minute, an hour, and a day. Then people started creating tools to measure time. First they used the sun, the moon, and the water, but soon after people began using their knowledge about the natural world to build clocks and to create calendars made up of months and years. Centuries later, we have clocks and calendars all around us! This title has been selected as a Common Core Text Exemplar (Grades 4-5, Informational Texts)

Arizona was born in a log cabin her papa built. She grew into a tall girl who liked to sing, square-dance, and -- most of all -- read and dream of the faraway places she would visit one day. Arizona never did make it to those places. Instead she became a teacher, helping generations of children in the one-room schoolhouse which she herself had attended. Gloria Houston's Joyous recounting of her great-aunt Arizona's quiet yet meaningful life reminds us of the magical place a special teacher can hold in our hearts.
