The Precolumbian ballgame, played on a masonry court, has long intrigued scholars because of the magnificence of its archaeological remains. From its lowland Maya origins it spread throughout the Aztec empire, where the game was so popular that sixteen thousand rubber balls were imported annually into Tenochtitlan. It endured for two thousand years, spreading as far as to what is now southern Arizona. This new collection of essays brings together research from field archaeology, mythology, and Maya hieroglyphic studies to illuminate this important yet puzzling aspect of Native American culture. The authors demonstrate that the game was more than a spectator sport; serving social, political, mythological, and cosmological functions, it celebrated both fertility and the afterlife, war and peace, and became an evolving institution functioning in part to resolve conflict within and between groups. The contributors provide complete coverage of the archaeological, sociopolitical, iconographic, and ideological aspects of the game, and offer new information on the distribution of ballcourts, new interpretations of mural art, and newly perceived relations of the game with material in the Popol Vuh. With its scholarly attention to a subject that will fascinate even general readers, *The Mesoamerican Ballgame* is a major contribution to

the study of the mental life and outlook of New World peoples.

In this volume, Stephen Prince has collected essays reviewing the history of the horror film and the psychological reasons for its persistent appeal, as well as discussions of the developmental responses of young adult viewers and children to the genre.

The book focuses on recent postmodern examples such as *The Blair Witch Project*. In a daring move, the volume also examines Holocaust films in relation to horror. Part One features essays on the silent and classical Hollywood eras. Part Two covers the postWorld War II era and discusses the historical, aesthetic, and psychological characteristics of contemporary horror films. In contrast to horror during the classical Hollywood period, contemporary horror features more graphic and prolonged visualizations of disturbing and horrific imagery, as well as other distinguishing characteristics. Prince's introduction provides an overview of the genre, contextualizing the readings that follow. Stephen Prince is professor of communications at Virginia Tech. He has written many film books, including *Classical Film Violence: Designing and Regulating Brutality in Hollywood Cinema, 1930-1968*, and has edited *Screening Violence*, also in the *Depth of Field Series*.

Published on the occasion of the Missoni, Art, Colour exhibition, this visually rich catalogue surveys the history and inspiration behind one of the most iconic fashion houses of all time. Rosita and Ottavio Missoni launched their eponymous fashion house in the 1950s, combining art and fashion to create a unique style that is recognized all over the world. This book is both a celebration of the unmistakable Missoni style, whose innovative approach mixes color, pattern, and matter with an extraordinary sense of balance, and an exploration of works by artists who have influenced the designers over the course of their creative, cultural, and artistic journey. The book is divided into four thematic sections that describe the creative process of the Missoni house, from the sources of their inspiration to their transformation of material. It begins with "Roots," which presents the historical avant-garde in Europe, including works by Kandinsky, Klee, Balla, and Severini, and is followed by "Color, Material, and

Shape," which focuses on Missoni fashion and design. "Conversations" explores Missoni's creativity in relation to Italian visual culture from the 1950s to the 1980s, and "Tapestries" reveals Ottavio Missoni's most significant works of art made of knitted patchwork."

In this New York Times bestselling book, award-winning Chicago Tribune journalist Lee Strobel investigates and unpacks the scientific evidence that points toward God. "My road to atheism was paved by science . . . but, ironically, so was my later journey to God," Strobel says. During his academic years, Lee Strobel became convinced that God was obsolete, a belief that colored his journalism career. Science had made the idea of a Creator irrelevant - or so Strobel thought. But today science points in a different direction. A diverse and impressive body of research has increasingly supported the conclusion that the universe was intelligently designed. At the same time, Darwinism has faltered in the face of concrete facts and hard reason. Has science discovered God? At the very least, it's giving faith an immense boost, as new findings emerge about the

incredible complexity of our universe. Join Strobel as he reexamines the theories that once led him away from God. Through his compelling and highly readable account, you'll encounter the mind-stretching discoveries from cosmology, cellular biology, DNA research, astronomy, physics, and human consciousness that present astonishing evidence in *The Case for a Creator*. Also available: *The Case for a Creator* small group video study and study guide, Spanish edition, kids' edition, student edition, and more.

Both an unflinching indictment of past wrongs and an impassioned call to America to educate its citizens about the history of Africa and its people, *The Debt* says in no uncertain terms what white America owes blacks—and what blacks owe themselves. In this powerful and controversial book, distinguished African-American political leader and thinker Randall Robinson argues for the restoration of the rich history that slavery and segregation severed. Drawing from research and personal experience, he shows that only by reclaiming their lost past and proud heritage can blacks lay the foundation for their future. And white Americans can begin making reparations for slavery and the century of racial discrimination that followed with monetary restitution, educational programs, and the kinds of equal opportunities that will ensure the social and economic success of all citizens. “Engaging...Robinson continues an important conversation...His anecdotes support his attempts to reclaim African American heritage and empower African Americans.”—*The Washington Post*

"This book is about taking the head off an evil witch". With these words Marion Woodman begins her spiral journey, a powerful and authoritative look at the psychology and attitudes of modern women. Marion Woodman continues her remarkable exploration of women's mysteries through case material, dreams, literature and mythology, in food rituals, rape symbolism, Christianity, imagery in the body, sexuality, creativity and relationships.

What would be the odds of a poor Mexican boy who migrated with his family to southern California in the 1920s rising through the ranks of the American education system to become the first Hispanic principal of a junior and senior high school in San Diego, the second Hispanic to be a college president in California, and to serve in the administrations of

four U.S. presidents? Armando Rodriguez spoke no English when he first set foot in the United States and was just old enough to start school in a district with few Spanish-speaking teachers. But with parents who emphasized the importance of education and who taught him the value of hard work, Armando Rodriguez became fluent in English, received a doctorate in bilingual education, and was instrumental in developing the field of bilingual education while serving as Assistant Commissioner of Education for the nation.

Rodriguez recalls his inspirational journey from a short child who was so dark he was nicknamed "Shadow" to being influential in shaping education on district, state, and national levels. Some still call him Shadow, though it is now spoken with respect and admiration for an immigrant who overcame many obstacles to become an instrument of change for his country. "Armando Rodriguez offers the gift of his fascinating life in this timely and candid autobiography of a poor immigrant child who arrived speaking no English and climbed the entire staircase of the American dream to power in Washington."--Eleanor Holmes Norton

In this illuminating and provocative survey, Stephen Barber examines the historical relationship between film and the urban landscape. *Projected Cities* looks with particular focus at the cinema of Europe and Japan, two closely linked cinematic cultures which have been foremost in the use of urban imagery, to reveal elements of culture, architecture and history. By examining this imagery, especially at moments of turmoil and experimentation, the author reveals how cinema has used images of cities to influence our perception of everything from history to the human body, and how cinematic images of cities have been fundamental to the ways in which the city has been imagined, formulated and remembered. The book goes on to assess the impact of media culture on the status of film and cinema spaces, and

concludes by considering digital renderings of the modern city. *Projected Cities* will appeal to all readers engaged with the city, film and contemporary culture.

The most complete corpus of the proverbs and fables of Aesop ever assembled Ben Edwin Perry's *Aesopica* remains the definitive edition of all fables reputed to be by Aesop. The volume begins traditionally with a life of Aesop, but in two different and previously unedited Greek versions, with collations that record variations in the major recensions. It includes 179 proverbs attributed to Aesop and 725 carefully organized fables, for which Perry also provides their eldest known sources. To better evaluate the place of Aesop in literary history, Perry includes testimonies about Aesop made by Greek and Latin authors, from Herodotus to Maximus Planudes.

The instant New York Times bestseller | Named one of the ten best books of 2019 by People magazine A chance encounter at a summer party on Martha's Vineyard blossomed into an improbable but enduring friendship. Carly Simon and Jacqueline Kennedy Onassis made an unlikely pair—Carly, a free and artistic spirit still reeling from her recent divorce, searching for meaning, new love, and an anchor; and Jackie, one of the most celebrated, meticulous, unknowable women in American history.

Nonetheless, over the next decade their lives merged in inextricable and complex ways, and they forged a connection deeper than either could ever have foreseen. The time they spent together—lingering lunches and creative collaborations, nights out on the town and movie dates—brought a welcome lightness and comfort to their days, but their conversations often veered into

more profound territory as they helped each other navigate the shifting waters of life lived, publicly, in the wake of great love and great loss. An intimate, vulnerable, and insightful portrait of the bond that grew between two iconic and starkly different American women, Carly Simon's *Touched by the Sun* is a chronicle, in loving detail, of the late friendship she and Jackie shared. It is a meditation on the ways someone can unexpectedly enter our lives and change its course, as well as a celebration of kinship in all its many forms. "In *Touched by the Sun*, Simon reveals an easy-going, playful side of [Jackie] that most people never saw — sneaking a smoke during intermission at the opera, frolicking in the ocean off the Vineyard . . . The woman who would later edit several of Simon's children's books was 'just fun to be around.'" —Juliet Pennington, *The Boston Globe*

¿Cabe hablar de "inteligencia moral" en el contexto de las inteligencias múltiples? Sin duda se puede proponer un concepto descriptivo de inteligencia moral afirmando que es la capacidad para razonar en términos de bondad, de lo bueno y justo, de lo que es mejor, de lo que más humaniza, de lo que nos hace mejores; es la capacidad para discernir lo que es debido en cada momento, razonando y argumentando; es una capacidad cognitiva que, ayudada de la habilidad emocional y social, impulsa a la acción buena, a lo mejor en cada caso. Es la

capacidad para resolver dilemas y problemas morales. La inteligencia moral puede coincidir en parte con lo que se entiende como discernimiento ético, como capacidad para distinguir el bonum, lo que "se debe hacer", en medio de una pluralidad axiológica o en la ausencia total de esta. Es una capacidad para hacer juicios morales correctos, para dirimir argumentativamente dilemas que incluyen la carga de lo ético. Este tipo de capacidad se basa en la racionalidad y se sitúa cerca de un pensamiento abstracto, activo y crítico que va más allá de lo dado. La inteligencia moral así entendida se sitúa en línea con las aportaciones de Piaget, de Kohlberg y, antes, de Kant, donde se supone que el ser humano, en una evolución deseable, es capaz de hacer juicios morales cada vez más profundos y matizados. La inteligencia moral pretende, en virtud de su vertiente lógica, encontrar soluciones equilibradas en los conflictos morales en los que se ve involucrada.

Did this border caudillo fight to defend the rights, honor, and legal claims of the Mexicans of South Texas, as he claimed? Or was his a quest for personal vengeance against the newcomers who had married into his family, threatened his mother's land holdings, and insulted his honor?

“[A] beautiful book of hope and inspiration . . . Pope Francis speaks frankly about problems facing the young and the elderly, Catholic and non-Catholic.”—*Publishers Weekly* (starred review) Pope Francis examines the role of millennials in the future of the Catholic Church in this urgent call to believers of all generations to work together to build a better world. Since his election in 2013, Pope Francis has reinvigorated the Catholic Church and become one of the most popular global leaders. Now, in this extraordinary interview with journalist Thomas Leoncini, His Holiness reminds Catholics of all ages that “God is young; He is always new.” God has energy, spontaneity, and the desire for

change—youthful qualities that can be rallied to fight the many problems facing the Catholic Church and the world at large. In this inspiring volume, published in English for the first time, Pope Francis’s solution to these challenges is simple: a “revolution of tenderness” that unites believers of all ages in a mission to remake the world. “God is young! God is the Eternal One who has no time, but is able to renew and rejuvenate Himself and all things continually. The most distinctive attributes of the young are also His. He is young because He makes all things new and loves innovation; because He astonishes and loves astonishment; because He dreams and wants us to dream.”—Pope Francis *Praise for God Is Young* “Enlightening . . . The interview is extremely wide-ranging. [Pope Francis’s] answers contemplate not only philosophy but such quotidian things as plastic surgery, pets, cell phones, consumerism, and more. The pope’s answers are generous in their length, some being even mini homilies. But all are thoughtful and thought-provoking, of interest and benefit to readers of all ages.”—Booklist (starred review)
