When parents first hear that their child has ADHD, many feel as if they've been set adrift on an emotional sea of guilt, isolation, confusion, and fear. To help these parents and their children navigate the challenges of home life, school, and ADHD treatment, Tracey Bromley Goodwin and Holly Oberacker have created *Navigating ADHD: Your Guide to the Flip Side of ADHD*. This solutions-based guide to living with ADHD is a beacon for parents and children alike. Holly, an art therapist, and Tracey, an educational consultant and learning coach, have over 20 years of combined experience working with children and families living with ADHD. They use this experience to provide a depth of examples and hands-on solutions to the challenges of ADHD. The authors steer readers through an understanding of the ADHD diagnosis, communication strategies, social and organizational skills, and ADHD treatments, among other subjects. Each chapter presents real-life scenarios, concrete strategies, and proven solutions that give parents the confidence they need to help their child excel. Appendices in the back of the book provide additional resources for easy reference. Parents will come back to this book again and again for guidance, support, and peace of mind as they watch their child move from shame and isolation to understanding and excellence.

A foundational text offering a unified design vocabulary and a common methodology for maximizing the expressive power of digital artifacts. Digital artifacts from iPads to databases pervade our lives, and the design decisions that shape them affect how we think, act, communicate, and understand the world. But the pace of change has been so rapid that technical innovation is outstripping design. Interactors are often mystified and frustrated by their enticing but confusing new devices; meanwhile, product design teams struggle to articulate shared and enduring design goals. With *Inventing the Medium*, Janet Murray provides a unified vocabulary and a common methodology for the design of digital objects and environments. It will be an essential guide for both students and practitioners in this evolving field. Murray explains that innovative interaction designers should think of all objects made with bits—whether games or Web pages, robots or the latest killer apps—as belonging to a single new medium: the digital medium. Designers can speed the process of useful and lasting innovation by focusing on the collective cultural task of inventing this new medium. Exploring strategies for maximizing the expressive power of digital artifacts, Murray identifies and examines four representational affordances of digital environments that provide the core palette for designers across applications: computational procedures, user participation, navigable space, and encyclopedic capacity. Each chapter includes a set of *Design Explorations*—creative exercises for students and thought experiments for practitioners—that allow readers to apply the ideas in the chapter to particular design problems. *Inventing the Medium* also provides more than 200 illustrations of specific design strategies drawn from multiple genres and platforms and a glossary of design concepts.

What's the time, Mr Wolf? It's story time with Debi Gliori! Accompany Mr Wolf as he goes about his daily routine from breakfast to bedtime - and get to know the real Mr Wolf! Little ones will enjoy recognising familiar faces from a plethora of nursery rhymes, including Little Red Riding Hood (masquerading as the post girl), three cheeky little pigs (who make prank calls), a cat who's a dab hand at the fiddle, plus four and twenty blackbirds . . . IDEO founder and Stanford d.school creator David Kelley and his brother Tom Kelley, IDEO partner and the author of the bestselling *The Art of Innovation*, have written a powerful and compelling book on unleashing the creativity that lies within each and every one of us. Too often, companies and individuals assume that creativity and innovation are the domain of the "creative types." But two of the leading experts in innovation, design, and creativity on the planet show us that each and every one of us is creative. In an incredibly entertaining and inspiring narrative that draws on countless stories from their work at IDEO, the Stanford d.school, and with many of the world's top companies, David and Tom Kelley identify the principles and strategies that will allow us to tap into our creative potential in our work lives, and in our personal lives, and allow us to innovate in terms of how we approach and solve problems. It is a book that will help each of us be more productive and successful in our lives and in our careers.
