Hank is a thug. He knows he's a thug. He has no problem with that realization. In his view the galaxy has given him a gift: a mutation that allows him to withstand great deals of physical trauma. He puts his abilities to the best use possible and that isn't by being a scientist. Besides, the space station Belvaille doesn't need scientists. It is not, generally, a thinking person's locale. It is the remotest habitation in the entire Colmarian Confederation. There is literally no reason to be there. Unless you are a criminal. Because of its location, Belvaille is populated with nothing but crooks. Every day is a series of power struggles between the crime bosses. Hank is an intrinsic part of this community as a premier gang negotiator. Not because he is eloquent or brilliant or an expert combatant, but because if you shoot him in the face he keeps on talking. Hank believes he has it pretty good until a beautiful and mysterious blue woman enters his life with a compelling job offer. Hank and Belvaille, so long out of public scrutiny, suddenly find themselves at the epicenter of the galaxy with a lot of very unwelcome attention.

Annotation This important and original book is the first sustained analysis of the unique ways in which oral testimony of survivors contributes to our understanding of the Holocaust. Langer argues that it is necessary to deromanticize the survival experience and that to burden it with accolades about the "indomitable human spirit" is to slight its painful complexity and ambivalence.

The present volume contains the proceedings of the Seventh International East-West Symposium of New Testament Scholars in Moscow 2016. Its contributions are devoted to different aspects of the question of the relation between history and theology in New Testament and extracanonical Gospel literature. They deal with problems regarding the impact of critical historical approaches for New Testament theology, the relation between the Gospels' claim for truth and historical facts, Orthodox receptions of the Gospel literature, and the presentation of "the" Gospel in Byzantine liturgy.

The story of an abandoned endangered baby De Brazza monkey and his rehabilitation.

This ground-breaking text explores the intersection between dominant modes of critical educational theory and the socio-political landscape of American Indian education. Grande asserts that, with few exceptions, the matters of Indigenous people and Indian education have been either largely ignored or indiscriminately absorbed within critical theories of education. Furthermore, American Indian scholars and educators have largely resisted engagement with critical educational theory, tending to concentrate instead on the production of historical monographs, ethnographic studies, tribally-centered curricula, and site-based research. Such a focus stems from the fact that most American Indian scholars feel compelled to address the socio-economic urgencies of their own communities, against which engagement in abstract theory appears to be a luxury of the academic elite. While the author acknowledges the dire need for practical-community based research, she maintains that the global encroachment on Indigenous lands, resources, cultures and communities points to the equally urgent need to develop transcendent theories of decolonization and to build broad-based coalitions.

Revised edition of Financial & managerial accounting by Charles T. Horngren, Walter T. Harrison Jr., and M. Suzanne Oliver, 3rd ed.

"Spiritual Economics" is a cross-disciplinary study combining psychology, economics and the spiritual science of the Vedas to explain why there is vulture capitalism, cut-throat competition, unending economic hardship, exploitation, inequity, and struggle in this world. Spiritual Economics explains why present economic methods can do nothing to solve these problems, reveals the actual source of our economic problems, and explains the only factual solution that can create an economy that serves everyone. Spiritual Economics also explains the origin and solution of our ecological problems. There is a link between economic activity and human consciousness. Economics is not a physical science like electromagnetism that works according to natural laws. It is a set of ideas entirely created by human beings. The most important side of the economic equation therefore, is the human side, but this side is totally neglected in all discussions of economics. Since economics is a man-made creation, if we want to understand the economic problem and its solution we must understand how and why human beings act in this world. That will give us the insight needed to properly adjust all of the parameters of the economic calculus to get the desired result. Only Spiritual Economics explains the whys and wherefores of human behavior in relationship to their economic activity.

Frank Pearce was the first scholar to use the term 'crimes of the powerful.' His ground-breaking book of the same name provided insightful critiques of liberal orthodox criminology, particularly in relation to labelling theory and symbolic interactionism, while making important contributions to Marxist understandings of the complex relations between crime, law and the state in the reproduction of the capitalist social order. Historically, crimes of the powerful were largely neglected in crime and deviance studies, but there is now an important and growing body of work addressing this gap. This book brings together leading international scholars to discuss the legacy of Frank Pearce's book and his work in this area, demonstrating the invaluable contributions a critical Marxist framework brings to studies of corporate and state crimes, nationally, internationally and on a global scale. This book is neither a hagiography, nor a review of random areas of social scientific interest. Instead, it draws together a collection of scholarly and original articles which draw upon and critically interrogate the continued significance of the approach pioneered in Crimes of the Powerful. The book traces the evolution of crimes of the powerful empirically and theoretically since 1976, shows how critical scholars have integrated new theoretical insights derived from post-structuralism, feminism and critical race studies and offers perspectives on how the crimes of the powerful - and the enormous, ongoing destruction they cause - can be addressed and resisted.
