Today's students are tomorrow's leaders, and the college years are a critical period for their development of ethical standards. *Cheating in College* explores how and why students cheat and what policies, practices, and participation may be useful in promoting academic integrity and reducing cheating. The authors investigate trends over time, including internet-based cheating. They consider personal and situational explanations, such as the culture of groups in which dishonesty is more common (such as business majors) and social settings that support cheating (such as fraternities and sororities). Faculty and administrators are increasing their efforts to promote academic honesty among students. Orientation and training sessions, information on college and university websites, student handbooks that describe codes of conduct, honor codes, and course syllabi all define cheating and establish the consequences. Based on the authors' multiyear, multisite surveys, *Cheating in College* quantifies and analyzes student cheating to demonstrate why academic integrity is important and to describe the cultural efforts that are effective in restoring it. -- Gary Pavela, Syracuse University

In a small wooded lot a busy woman stumbles upon a strange doll the neighbors possibly left. She attempts to reveal who brought the toy to her home, but she uncovers no real leads. Then when a letter turns up asking her to give the doll away as soon as possible, she ends up on the edge of reason as the doll is in the midst of being reclaimed by someone. The doll although small and cuddly resembles a somewhat black entity similar to a doll she keeps in her home, but when a nearby psychic and fortune teller comes to her home asking her to give up the doll to keep her sanity, but she refuses. The stuffed animal then turns out to be more than she bargained for when the bear starts to grow a tail and red eyes. When she discovers those details, she desperately tries to send it away to a pawn shop owner, but the next day he ends up dead, and a new feeling that the stuffed bear may not be what she considered a stuffed cuddly toy anymore. The story focuses on the character of Mary, and the stuffed bear that she suddenly inherits when the doll is left on her doorstep. She finds that although the stuffed bear did have an owner, he ended up in a mental institution, and the bear was simply left behind, either by someone else or the bear itself. She doesn't want to come to the terms that it could have ended up on her doorstep, by itself, but when the tale that the previous owner claimed is finally revealed, she desperately searches for an answer to the horror of Truggle.

Situated at the intersection of two of the most important areas in educational research today — literacy and technology — this handbook draws on the potential of each while carving out important new territory. It provides leadership for this newly emerging field, directing scholars to the major issues, theoretical perspectives, and interdisciplinary research pertaining to new literacies. Reviews of research are organized into six sections: Methodologies Knowledge and Inquiry

Communication Popular Culture, Community, and Citizenship: Everyday Literacies Instructional Practices and Assessment Multiple Perspectives on New Literacies Research FEATURES Brings together a diverse international team of editors and chapter authors Provides an extensive collection of research reviews in a critical area of educational research Makes visible the multiple perspectives and theoretical frames that currently drive work in new literacies Establishes important space for the emerging field of new literacies research Includes a unique Commentary section: The final section of the Handbook reprints five central research studies. Each is reviewed by two prominent researchers from their individual, and different, theoretical position. This provides the field with a sense of how diverse lenses can be brought to bear on research as well as the benefits that accrue from doing so. It also provides models of critical review for new scholars and demonstrates how one might bring multiple perspectives to the study of an area as complex as new literacies research. The Handbook of Research on New Literacies is intended for the literacy research community, broadly conceived, including scholars and students from the traditional reading and writing research communities in education and educational psychology as well as those from information science, cognitive science, psychology, sociolinguistics, computer mediated communication, and other related areas that find literacy to be an important area of investigation.

The 20th century has been defined as the American Century, however, the history of the 21st century will be written in Asia. Today, East Asia is home to a third of the world's population and includes some of the world's largest economies. Hence the US has placed more emphasis on the region, to strengthen its economic ties and to show its long term allies that it has not forgotten about them. Disengagement from the Middle East and the rise of China has meant that the US has again turned its focus to the Asia-Pacific and East Asia, a region rife with old, long seated distrust and territorial disputes. The dissertation will focus on how the US is executing its 'Pivot to Asia' focusing on the many security issues which it must deal with, both those involving its allies and those involving its strategic rivals. All while trying to maintain its influence over East Asia in the face of a rising China. Whilst the US is welcomed by some and unwelcomed by others, the dissertation will try and determine whether the US's renewed interest will contribute to the prosperity of East Asia or whether the US will again be bogged down in a region where it is not welcomed.

In God's Empire, Hilary M. Carey charts Britain's nineteenth-century transformation from Protestant nation to free Christian empire through the history of the colonial missionary movement. This wide-ranging reassessment of the religious character of the second British empire provides a clear account of the promotional strategies of the major churches and church parties which worked to plant settler Christianity in British domains. Based on extensive use of original archival and rare published sources, the author explores major debates such as the relationship between religion and colonization, church-state relations, Irish Catholics in the empire, the impact of the Scottish Disruption on colonial Presbyterianism, competition between Evangelicals and other Anglicans in the colonies, and between British and American strands of Methodism in British North America.

It has long been a truism that prior to George W. Bush, politics stopped at the water's edge--that is, that partisanship had no place in national security. In Arsenal of Democracy, historian Julian E. Zelizer shows this to be demonstrably false: partisan fighting has always shaped American foreign policy and the issue of national security has always been part of our domestic conflicts. Based on original archival findings, Arsenal of Democracy offers new insights into nearly every major national security issue since the beginning of the cold war: from FDR's masterful management of World War II to the partisanship that scarred John F. Kennedy during the Cuban Missile Crisis, from Ronald Reagan's fight against Communism to George W. Bush's controversial War on Terror. A definitive account of the complex interaction

between domestic politics and foreign affairs over the last six decades, *Arsenal of Democracy* is essential reading for anyone interested in the politics of national security.

The author provides a thorough treatment of the topic and reveals the serious implications for the future of academia. Media education for digital citizenship is predicated upon the ability to access, analyze, evaluate and produce media content and communication in a variety of forms. While many media literacy approaches overemphasize the end-goal of accessing digital media content through the acquisition of various technology, software, apps and analytics, this book argues that the goals for comprehensive and critical digital literacy require grasping the means through which communication is created, deployed, used, and shared, regardless of which tools or platforms are used for meaning making and social interaction. Drawing upon the intersecting matrices of digital literacy and media literacy, the volume provides a framework for developing critical digital literacies by exploring the necessary skills and competencies for engaging students as citizens of the digital world.

When the government refuses, ICER destroys most of the downed aircraft in airports all over the country. When ICER sends a pulse that will kill millions on the East Coast, only security expert Dan Riker can stop them, but ICER has kidnapped Dan's family. Will Dan save his family or will millions die?

From humble beginnings wholesaling at a small tobacconist-hairdresser shop in 1915, the London Rubber Company rapidly became the UK's biggest postwar producer and exporter of disposable rubber condoms. A first-mover and innovator, the company's continuous product development and strong brands (including Durex) allowed it to dominate supply to the retail trade and family planning clinics, leading it to intercede in the burgeoning women's market. When oral contraceptives came along, however, the company was caught in a bind between defending condoms against the pill and claiming a segment of the new birth control market for itself. In this first major study on the company, Jessica Borge shows how, despite the "unmentionable" status of condoms that inhibited advertising in the early twentieth century, aggressive business practices were successfully deployed to protect the monopoly and squash competition. Through close, evidence-based examination of LRC's first fifty years, encompassing its most challenging decades, the 1950s and 1960s, as well as an overview of later years including the AIDS crisis, Borge argues that the story of the modern disposable condom in Britain is really the story of the London Rubber Company, the circumstances that befell it, the struggles that beset it, the causes that opposed it, and the opportunities it created for itself. LRC's historic intervention in and contribution to female contraceptive practices sits uneasily with existing narratives centred on women's control of reproduction, but the time has come, Borge argues, for the condom to find its way back to the centre of these debates. *Protective Practices* thereby re-examines a key transitional moment in social and cultural history through the lens of this unusual case study.

"A badass debut by any measure—nimble, knowing, and electrifying." —Colson Whitehead, Pulitzer Prize-winning author of *The Nickel Boys* and *Harlem Shuffle* A young woman descended from Thomas Jefferson and Sally Hemings driven from her neighborhood by a white militia. A university professor studying racism by conducting a secret social experiment on his own son. A single mother desperate to buy her first home even as the world hurtles toward catastrophe. Each fighting to survive in America. Tough-minded, vulnerable, and brave, Jocelyn Nicole Johnson's precisely imagined debut explores burdened inheritances and extraordinary pursuits of belonging. Set in the near future, the eponymous novella, "My Monticello," tells of a diverse group of Charlottesville neighbors fleeing violent white supremacists. Led by Da'Naisha, a young Black descendant of Thomas Jefferson and Sally Hemings, they seek refuge in Jefferson's historic plantation home in a desperate attempt to outlive the long-foretold racial and environmental unravelling within the nation. In "Control Negro," hailed by Roxane Gay as "one hell of a story," a university professor devotes himself to the study of racism and the development of ACMs (average American Caucasian males) by clinically observing his own son from birth in order to "painstakingly mark the route of this Black child too, one whom I could prove was so strikingly decent and true that America could not find fault in him unless we as a nation had projected it there." Johnson's characters all seek out home as a place and an internal state, whether in the form of a Nigerian widower who immigrates to a meager existence in the city of Alexandria, finding himself adrift; a young mixed-race woman who adopts a new tongue and name to escape the landscapes of rural Virginia and her family; or a single mother who seeks salvation through "Buying a

House Ahead of the Apocalypse.” United by these characters’ relentless struggles against reality and fate, *My Monticello* is a formidable book that bears witness to this country’s legacies and announces the arrival of a wildly original new voice in American fiction.

The American economy faces two deep problems: expanding innovation and raising the rate of quality job creation. Both have roots in a neglected problem: the resistance of Legacy economic sectors to innovation. While the U.S. has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology, most of its economy is locked into Legacy sectors defended by technological/ economic/ political/ social paradigms that block competition from disruptive innovations that could challenge their models. Americans like to build technology "covered wagons" and take them "out west" to open new innovation frontiers; we don't head our wagons "back east" to bring innovation to our Legacy sectors. By failing to do so, the economy misses a major opportunity for innovation, which is the bedrock of U.S. competitiveness and its standard of living. *Technological Innovation in Legacy Sectors* uses a new, unifying conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors: energy, air and auto transport, the electric power grid, buildings, manufacturing, agriculture, health care delivery and higher education, and develops approaches to understand and transform them. It finds both strengths and obstacles to innovation in the national innovation environments - a new concept that combines the innovation system and the broader innovation context - for a group of Asian and European economies. Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process. By increasingly offshoring production, the U.S. is losing important parts of its innovation capacity. "Innovate here, produce here," where the U.S. took all the gains of its strong innovation system at every stage, is being replaced by "innovate here, produce there," which threatens to lead to "produce there, innovate there." To bring innovation to Legacy sectors, authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation. They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations. In the specific case of advanced manufacturing, the production ecosystem can be recreated to reverse "jobless innovation" and add manufacturing-led innovation to the U.S.'s still-strong, research-oriented innovation system.

Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

With a new preface: A "stunning" analysis of the troubled Republican president by the Pulitzer Prize-winning author of *Lincoln at Gettysburg* (The New York Times Book Review). In this acclaimed biography that earned him a spot on Nixon's infamous "enemies list," Garry Wills takes a thoughtful, in-depth, and often "very amusing" look at the thirty-seventh US president, and draws some surprising conclusions about a man whose name has become synonymous with scandal and the abuse of power (Kirkus Reviews). Arguing that Nixon was a reflection of the country that elected him, Wills examines not only the psychology of the man himself and his relationships with others—from his wife, Pat, to his vice-president, Spiro Agnew—but also the state of the nation at the time, mired in the Vietnam War and experiencing a cultural rift that pitted the young against the old. Putting his findings into moral, economic, intellectual, and political contexts, he ultimately "paints a broad and provocative landscape of the nation's—and Nixon's—travails" (The New York Times). Simultaneously compassionate and critical, and raising interesting perspectives on the shifting definitions of terms like "conservative" and "liberal" over recent decades, *Nixon Agonistes* is a brilliant and indispensable book from one of America's most acclaimed historians.

An estimated one million Armenians were killed in the dying days of the Ottoman Empire in 1915. Against the backdrop of World War I, reports of massacre, atrocity, genocide and exile sparked the largest global humanitarian response up to that date. Britain and its empire - the most powerful internationalist institutional force at the time - played a key role in determining the global response to these events. This book considers the first attempt to intervene on behalf of the victims of the massacres and to prosecute those responsible for 'crimes against humanity' using newly uncovered archival material. It looks at those who attempted to stop the violence and to prosecute the Ottoman perpetrators of the atrocities. In the process it explores why the Armenian question emerged as one of the most popular humanitarian causes in British society, capturing the imagination of philanthropists, politicians and the press. For liberals, it was seen as the embodiment of the humanitarian ideals espoused by their former leader (and four-time Prime Minister), W.E. Gladstone. For conservatives, as articulated most clearly by Winston Churchill, it proved a test case for British imperial power. In looking at the British response to the events in Anatolia, Michelle Tusan provides a new perspective on the genocide and sheds light on one of the first ever international humanitarian campaigns.
