

Comcast Remote Programming Guide

The Internet didn't kill TV! It has become its best friend. Americans are watching more television than ever before, and we're engaging online at the same time we're tuning in. Social media has created a new and powerful "backchannel", fueling the renaissance of live broadcasts. Mobile and tablet devices allow us to watch and experience television whenever and wherever we want. And "connected TVs" blend web and television content into a unified big screen experience bringing us back into our living rooms. Social TV examines the changing (and complex) television landscape and helps brands navigate its many emerging and exciting marketing and advertising opportunities. Social TV topics include: Leveraging the "second screen" to drive synched and deeper brand engagement Using social ratings analytics tools to find and target lean-forward audiences Aligning brand messaging to content as it travels time-shifted across devices Determining the best strategy to approach marketing via connected TVs Employing addressable TV advertising to maximize content relevancy Testing and learning from the most cutting-edge emerging TV innovations The rise of one technology doesn't always mean the end of another. Discover how this convergence has created new marketing opportunities for your brand.

The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic Automate the Boring Stuff with Python, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to:

- Search for text in a file or across multiple files
- Create, update, move, and rename files and folders
- Search the Web and download online content
- Update and format data in Excel spreadsheets of any size
- Split, merge, watermark, and encrypt PDFs
- Send email responses and text notifications
- Fill out online forms

Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in Automate the Boring Stuff with Python, 2nd Edition.

Moral decision-making made easier From Internet access to lottery tickets, from pet ownership to R-rated entertainment, we're faced with more ethical decisions

than we might realize, every single day. What's a person to do - especially when there is no definitive Catholic teaching on a subject? Do we just brush off these pesky moral dilemmas? Do we happily live in the gray areas of life and simply go along with conventional wisdom? Or do we make an honest attempt to face these moral questions head on? The way we deal with these seemingly small ethical decisions can have a huge impact on our own lives as well as those of our children and families. This book is an ethical toolbox, providing you with a process for making confident choices, asking yourself challenging questions, developing moral virtue, and discovering deeper happiness. "A bracing wake-up call to those of us who often overlook the moral dimensions of the decisions we make in everyday life. Mark Latkovic gently guides us through the ethical minefield of contemporary society." - Mary Ann Glendon, Learned Hand Professor of Law at Harvard Law School "The book will be particularly welcome to parents and catechists, as they fulfill their responsibilities for giving moral guidance to the next generation of believers." - Archbishop Allen H. Vigneron, Detroit "Not only a reliable guide to resolving some of the ethical questions we face in our everyday lives, it is a guidebook to thinking well about decisions that shape our characters." - Robert P. George, McCormick Professor of Jurisprudence, Princeton University About the Author Dr. Mark S. Latkovic is professor of moral and systematic theology at Sacred Heart Major Seminary in Detroit, Michigan, and the author of numerous articles, essays, and other writings on moral theology. He is also a nationally known speaker, panelist, reviewer, and consultant. Dr. Latkovic and his wife, Christine, have four children.

Windows Vista is Microsoft's most important software release in more than a decade. It offers users an abundance of new and upgraded features that were more than five years in the making: a gorgeous, glass-like visual overhaul; superior searching and organization tools; a multimedia and collaboration suite; and above all, a massive, top-to-bottom security-shield overhaul. There's scarcely a single feature of the older versions of Windows that hasn't been tweaked, overhauled, or replaced entirely. But when users first encounter this beautiful new operating system, there's gonna be a whole lotta head-scratchin', starting with trying to figure out which of the five versions of Vista is installed on the PC (Home, Premium, Business, Enterprise, Ultimate). Thankfully, *Windows Vista: The Missing Manual* offers coverage of all five versions. Like its predecessors, this book from New York Times columnist, bestselling author, and Missing Manuals creator David Pogue illuminates its subject with technical insight, plenty of wit, and hardnosed objectivity for beginners, veteran standalone PC users, and those who know their way around a network. Readers will learn how to: Navigate Vista's elegant new desktop Locate anything on your hard drive quickly with the fast, powerful, and fully integrated search function Use the Media Center to record TV and radio, present photos, play music, and record any of the above to DVD Chat, videoconference, and surf the Web with the vastly improved Internet Explorer 7 tabbed browser Build a network for file sharing, set up workgroups, and connect from the road Protect your PC and network with Vista's beefed up security And much more. This jargon-free guide explains Vista's features clearly and thoroughly, revealing which work well and which don't. It's the book that should have been in the box!

Four specific trends are driving the DVR industry: consumer content choice, consumer content control, personalization of content libraries, and the ability to transfer content from device-to-device and person-to-person. "Digital Video Recorders" features a macro and micro views of the already established yet still burgeoning DVR industry. As part of the NAB Executive Technology Briefing series, this book gives you a wealth of market knowledge, business models, case studies, and industry insights explained in a non-technical fashion. "Digital Video Recorders" discusses the impact of the technology across many different industries and platforms, explains hardware, software and technology of set-top boxes, DVR infrastructure, on-

screen guides, planning and scheduling, content security, and more. Whether you are an executive in the broadcast, telecommunications, consumer electronic, or advertising space, you will expand your knowledge on DVR impact, explore new business opportunities, and get a brief overview of the technical terms needed. You will also be able to accurately analyze and understand the trends, projections and other data, all of which will help lead to the expedited growth and development of DVR industry.

Audio and video content is all around us. And these days much of it comes not from TV cables, satellite dishes, and radio antennas, but from our digital devices around the house, streaming over the Internet and local networks. And that's why we created the Digital Entertainment Superguide, a primer with everything you need to know to get started. This book walks you through how to set up your home network and choose the right hardware—set-top boxes, smart TVs, media center computers, streaming speakers, remote controls, and more—for your needs. Like to watch TV shows and movies but not sure where to find what? We've got you covered with a guide to streaming video sources for your TV or mobile devices. We don't leave music lovers out either, as we help you choose the best streaming audio service. Do you want Mog, Rdio, Rhapsody, Slacker, or Spotify? How much does each service cost? Which sounds best? We answer all those questions and more in the pages that follow. Finally, if you're wondering how to move audio and video around the house—stream music wirelessly from an iPhone to an AirPlay speaker in the living room or send video from a computer to your beautiful wall-mounted HDTV—you've come to the right place. We'll even show you how to use your smartphone or tablet to control it all. So read on, and let the fun begin!
