Nowadays thousands of grammar books, textbooks, outlines, references and language guides of Spanish, Portuguese, Italian and French are published year by year. However, all of them teach these languages separately. Here you will find a comparative grammar of the four major Romance languages together based on their grammatical and lexical similarities for you, lovers of foreign languages, to learn and compare Spanish, Portuguese, Italian and French simultaneously. It is an audacious endeavor to find or create a novel way of learning to speak several languages and becoming a multilingual person. It took me over 3 years to finish the book. It consists of over 800 pages, 10 chapters covering all the grammatical aspects of these 4 languages. It includes over 1000 examples, 500 easy-to-follow charts and tables. It contains 138 geographical, historical and cultural facts about Spanish, Portuguese, Italian and French

countries. Below I will discuss several reasons why I decided to write this book and why you need it. 1) First of all, this book is written for readers like you who are fond of or would like to learn Spanish, Portuguese, Italian and French simultaneously or just to get an all-round knowledge of all these four Romance languages. It is designed not only for beginners who do not have an extensive knowledge of grammar, yet need a guide through the grammatical concepts of all mentioned above languages, but also intermediate and advanced students who would like to have a reference book of several Romance languages at once. 2) Second of all I spent many years learning these languages separately, which was a complete waste of time before I realized it. This book will hopefully save you a great deal of time and allow you to study and compare at a glance the four main Neo-Latin languages. 3) Knowledge of foreign languages is fast becoming a necessary requirement for those who are involved in international business, tourism, culture and education. This book offers you four languages to learn, which will make you feel at homewherever you go, whether as a tourist or businessman. 4) Learning several languages simultaneously or one by one will train and strengthen your memory and can help stave off such terrible diseases as Alzheimer's. 5) If you have never studied several languages at once before and you

like challenges, then you should definitely try it. Because it is a really entertaining and challenging task to do. In conclusion, I would like to sincerely thank you for preordering the book and your interest in it. I hope it will help you improve your languages and become multilingual.

An in-depth exploration of the birth of cooking, as charted by leading authority Ferran Adrià's eBullifoundation This essential volume examines the foundations of cuisine, starting with its earliest sources. Tracing every element of the produce, implements, and skills involved in food preparation, it asks such timely questions as: is the choice of raw food an act of cooking, or does cooking begin when specific tools are used to adapt it? Can food be considered 'cooked' when eaten in its raw state? Packed with intriguing text and illuminating eBullifoundation diagrams and images, it's a must-have for every cook's library.

This volume investigates the ways in which Italian women writers, filmmakers, and performers have represented female identity across genres from the immediate post-World War II period to the turn of the twenty-first century. Considering genres such as prose, poetry, drama, and film, these essays examine the vision of female agency and self-actualization arising from women artists' critique of female identity. This dual approach reveals unique interpretations of womanhood in Italy spanning more

than fifty years, while also providing a deep investigation of the manipulation of canvases historically centered on the male subject. With its unique coupling of generic and thematic concerns, the volume contributes to the ever expanding female artistic legacy, and to our understanding of postwar Italian women's evolving relationship to the narration of history, gender roles, and these artists' use and revision of generic convention to communicate their vision.

“A necessary book for anyone truly interested in what we take from the sea to eat, and how, and why.” —Sam Sifton, *The New York Times Book Review* Acclaimed author of *American Catch* and *The Omega Principle* and life-long fisherman, Paul Greenberg takes us on a journey, examining the four fish that dominate our menus: salmon, sea bass, cod, and tuna. Investigating the forces that get fish to our dinner tables, Greenberg reveals our damaged relationship with the ocean and its inhabitants. Just three decades ago, nearly everything we ate from the sea was wild. Today, rampant overfishing and an unprecedented biotech revolution have brought us to a point where wild and farmed fish occupy equal parts of a complex marketplace. *Four Fish* offers a way for us to move toward a future in which healthy and sustainable seafood is the rule rather than the exception.

Resistance as heroines and traitors, and the way they exploited their femininity. In *Red Flag*, a woman hides guns by covering them with a soiled sanitary napkin.

An examination of Italian immigrants and their children in the early twentieth century, *A New Language, A New World* is the first full-length historical case study of one immigrant group's experience with language in America. Incorporating the interdisciplinary literature on language within a historical framework, Nancy C. Carnevale illustrates the complexity of the topic of language in American immigrant life. By looking at language from the perspectives of both immigrants and the dominant culture as well as their interaction, this book reveals the role of language in the formation of ethnic identity and the often coercive context within which immigrants must negotiate this process.

On January 6, 1537, Lorenzino de' Medici murdered Alessandro de' Medici, the duke of Florence. This episode is significant in literature and drama, in Florentine history, and in the history of republican thought, because Lorenzino, a classical scholar, fashioned himself after Brutus as a republican tyrant-slayer. *Wings for Our Courage* offers an epistemological critique of this republican politics, its invisible oppressions, and its power by reorganizing the meaning of Lorenzino's assassination around issues of gender, the body, and political subjectivity. Stephanie H. Jed brings into brilliant conversation figures including the Venetian nun and political theorist Archangela Tarabotti, the French feminist writer Hortense Allart, and others in a study that closely examines the material bases—manuscripts, letters, books, archives, and bodies—of writing as generators of social relations that organize and conserve knowledge in particular political arrangements. In her highly original study Jed reorganizes republicanism in history, providing a new theoretical framework for understanding the work of the scholar and the social structures of archives, libraries, and erudition in which she is inscribed.

The refreshed insights into early-imperial Roman historiography this book offers are linked to a recent discovery. In the spring of 2014, the binders of the archive of Robert Marichal were dusted off by the ERC funded project PLATINUM (ERC-StG 2014 n°636983) in response to Tiziano Dorandi's recollections of a series of unpublished notes on Latin texts on papyrus. Among these was an in-progress edition of the Latin rolls from Herculaneum, together with Marichal's intuition that one of them had to be ascribed to a certain 'Annaeus Seneca'. PLATINUM followed the unpublished intuition by Robert Marichal as one path of investigation in its own research and work. Working on the Latin P.Herc. 1067 led to confirm Marichal's intuitions and to go beyond it: P.Herc. 1067 is the only extant direct witness to Seneca the Elder's *Historiae*. Bringing a new and important chapter of Latin literature arise out of a charred papyrus is significant. The present volume is made up of two complementary sections, each of which contains seven contributions. They are in close dialogue with each other, as looking at the same literary matter from several points of view yields undeniable advantages and represents an innovative and fruitful step in Latin literary criticism. These two sections express the two different but interlinked axes along which the contributions were developed. On one side, the focus is on the starting point of the debate, namely the discovery of the papyrus roll transmitting the *Historiae* of Seneca the Elder and how such a discovery can be integrated with prior knowledge about this historiographical work. On the other side, there is a broader view on early-imperial Roman historiography, to which the new perspectives opened by the rediscovery of Seneca the Elder's *Historiae* greatly contribute. Innovation is everywhere. In the world of goods (technology), but also in the world of words: innovation is discussed in the scientific and technical literature, but also in the social sciences and humanities. Innovation is also a central idea in the popular imaginary, in the media and in public policy. Innovation has become the emblem of the modern society and a panacea for resolving many problems. Today, innovation is spontaneously understood as technological innovation because of its contribution to economic "progress". Yet for 2,500 years, innovation had nothing to do with economics in a positive sense. Innovation was pejorative and political. It was a contested idea in philosophy, religion, politics and social affairs. Innovation only got de-contested in the last century. This occurred gradually beginning after the French revolution. Innovation shifted from a vice to a virtue. Innovation became an instrument for achieving political and social goals. In this book, Benoît Godin lucidly examines the representations and meaning(s) of innovation over time, its diverse uses, and the contexts in which the concept emerged and changed. This history is organized around three periods or episteme: the prohibition episteme, the instrument episteme, and the value episteme.

This is the essential book about the cookery as well as zoology of the fish and shellfish that inhabit the Mediterranean; now published in more than a dozen languages and available in France, Italy, Spain, Greece and many other home territories. It combines natural history and cookery in a most enticing way, providing information for the fisherman and seafood enthusiast as well as for the cook. Its genesis was while the author was posted to the British Embassy in Tunis, his wife needed an overview of the local fish markets to plan her shopping. It was taken up with enthusiasm by Elizabeth David and has been required reading ever since. The book is split between a catalogue, with drawings and description of each sort of fish, together with cookery notes and any information that might put it in context; and a recipe section which draws on the best methods of cooking these types of fish from the many countries best acquainted with them.

This textbook provides a sound foundation in physical optics by covering key concepts in a rigorous but accessible manner. Propagation of electromagnetic waves is examined from multiple perspectives, with explanation of which viewpoints and methods are best suited to different situations. After an introduction to the theory of electromagnetism, reflection, refraction, and dispersion, topics such as geometrical optics, interference, diffraction, coherence, laser beams, polarization, crystallography, and anisotropy are closely examined. Optical elements, including lenses, mirrors, prisms, classical and Fabry-Perot interferometers, resonant cavities, multilayer dielectric structures, interference and spatial filters, diffraction gratings, polarizers, and birefringent plates, are treated in depth. The coverage also encompasses such seldom-covered topics as modeling of general astigmatism via 4×4 matrices, FFT-based numerical methods, and bianisotropy, with a relativistic treatment of optical activity and the Faraday and Fresnel-Fizeau effects. Finally, the history of optics is discussed.

discussions on functional communications give readers early success in the language and encourage them to use it in practical situations. First published in 1891, Pellegrino Artusi's *La scienza in cucina e l'arte di mangiar bene* has come to be recognized as the most significant Italian cookbook of modern times. It was reprinted thirteen times and had sold more than 52,000 copies in the years before Artusi's death in 1910, with the number of recipes growing from 475 to 790. And while this figure has not changed, the book has consistently remained in print. Although Artusi was himself of the upper classes and it was doubtful he had ever touched a kitchen utensil or lit a fire under a pot, he wrote the book not for professional chefs, as was the nineteenth-century custom, but for middle-class family cooks: housewives and their domestic helpers. His tone is that of a friendly advisor – humorous and nonchalant. He indulges in witty anecdotes about many of the recipes, describing his experiences and the historical relevance of particular dishes. Artusi's masterpiece is not merely a popular cookbook; it is a landmark work in Italian culture. This English edition (first published by Marsilio Publishers in 1997) features a delightful introduction by Luigi Ballerini that traces the fascinating history of the book and explains its importance in the context of Italian history and politics. The illustrations are by the noted Italian artist Giuliano Della Casa.

Why are human food habits so diverse? Why do Americans recoil at the thought of dog meat? Jews and Moslems, pork? Hindus, beef? Why do Asians abhor milk? In *Good to Eat*, best-selling author Marvin Harris leads readers on an informative detective adventure to solve the worlds major food puzzles. He explains the diversity of the worlds gastronomic customs, demonstrating that what appear at first glance to be irrational food tastes turn out really to have been shaped by practical, economic, or political necessity. In addition, his smart and spirited treatment sheds wisdom on such topics as why there has been an explosion in fast food, why history indicates that its bad to eat people but good to kill them, and why children universally reject spinach. *Good to Eat* is more than an intellectual adventure in food for thought. It is a highly readable, scientifically accurate, and fascinating work that demystifies the causes of myriad human cultural differences.
