Drawing on her first-hand experience at top companies as diverse as Lands' End and Microsoft, Jeanne Bliss explains why even great corporations can drift to delivering mediocrity to customers, and she offers a proven solution to break the cycle. Different divisions and departments in corporations can fail to communicate and act as a team—they create silos instead of a superior customer experience. Jeanne Bliss shows in stark detail how profits suffer when businesses focus on their organizational charts and not their customer relationships. This book provides leaders the tools and information they need to overcome organizational inertia and deliver a meaningful customer experience. The author includes diagnostics to determine if a company's core strengths, metrics, and systems improve or harm customer relationships. With all these tools, leaders can address the organizational challenges they face with an exhaustive review of the Chief Customer Officer role and an evaluation to determine the right solution for their culture and company.

In his previously written articles and books, Chris Edwards has argued that teaching should be considered a field that is separate from both the field of education and from the content area fields. Teaching is a field which synthesizes content and method for classroom application. All of the other major intellectual fields have a canon of works which practitioners can learn from and add to, but teaching does not. The Connecting the Dots in World History: A Teacher's Literacy-Based Curriculum series changes this by showing how effective a teacher-generated curriculum can be. These books can inspire other teachers to create their own curricula and inspire a change in the way that the public views teachers and teaching.

What will it take to create equitable educational opportunities for all students? According to veteran educator Vernita Mayfield, teachers and school leaders need to learn how to recognize culturally embedded narratives about racial hierarchy and dismantle the systems of privilege and the institutions that perpetuate them with knowledge, action, and advocacy. Cultural Competence Now provides a structure to begin meaningful conversations about race, culture, bias, privilege, and power within the time constraints of an ordinary school. The 56 exercises include activities, discussions, and readings in which to engage during each of the four quarters of the school year. School leaders will discover how to facilitate learning through the four steps—awaken and assess; apply and act; analyze and align; advocate and lead—as you and your colleagues * Increase your awareness of privilege and bias. * Adapt your professional practices to meet the needs of all students. * Examine policies and practices that inhibit opportunities for marginalized populations. * Align resources to eradicate inequity in your school. Mayfield offers advice on establishing a safe environment for professional conversations, setting goals for cultural competency, overcoming resistance, reviewing school data and the school's vision and mission through the lens of race and culture, and strategically managing what can be a transformative yet uncomfortable change process. Cultural Competence Now responds to the urgent need to build the cultural competency of educators—for the sake of children and in the interest of supporting and retaining all educators.

Silicon Valley visionary John Chambers shares the lessons that transformed a dyslexic kid from West Virginia into one of the world's best business leaders and turned a simple router company into a global tech titan. When Chambers joined Cisco in 1991, it was a company with 400 employees, a single product, and about \$70 million in revenue. When he stepped down as CEO in 2015, he left a \$47 billion tech giant that was the backbone of the internet and a leader in areas from cybersecurity to data center convergence. Along the way, he had acquired 180 companies and turned more than 10,000 employees into millionaires. Widely recognized as an innovator, an industry leader, and one of the world's best CEOs, Chambers has outlasted and outmaneuvered practically every rival that ever tried to take Cisco on--Nortel, Lucent, Alcatel, IBM, Dell, and Hewlett-Packard, to name a few. Now Chambers is sharing his unique strategies for winning in a digital world. From his early lessons and struggles with dyslexia in West Virginia to his bold bets and battles with some of the biggest names in tech, Chambers gives readers a playbook on how to act before the market shifts, tap customers for strategy, partner for growth, build teams, and disrupt themselves. He also adapted those lessons to transform government, helping global leaders like French President Emmanuel Macron and Indian Prime Minister Narendra Modi to create new models for growth. As CEO of JC2 Ventures, he's now investing in a new generation of game-changing startups by helping founders become great leaders and scale their companies. Connecting the Dots is destined to become a business classic, providing hard-won insights and critical tools to thrive during the accelerating disruption of the digital age.
