A NEW YORK TIMES NOTABLE BOOK OF 2020 From the bestselling author of Nixonland and The Invisible Bridge comes the dramatic conclusion of how conservatism took control of American political power. Over two decades, Rick Perlstein has published three definitive works about the emerging dominance of conservatism in modern American politics. With the saga's final installment, he has delivered yet another stunning literary and historical achievement. In late 1976, Ronald Reagan was dismissed as a man without a political future: defeated in his nomination bid against a sitting president of his own party, blamed for President Gerald Ford's defeat, too old to make another run. His comeback was fueled by an extraordinary confluence: fundamentalist preachers and former segregationists reinventing themselves as militant crusaders against gay rights and feminism; business executives uniting against regulation in an era of economic decline; a cadre of secretive "New Right" organizers deploying state-of-the-art technology, bending political norms to the breaking point—and Reagan's own unbending optimism, his ability to convey unshakable confidence in America as the world's "shining city on a hill." Meanwhile, a civil war broke out in the Democratic party. When President Jimmy Carter called Americans to a new ethic of austerity, Senator Ted Kennedy reacted with horror, challenging him for reelection. Carter's Oval Office tenure was further imperiled by the

Iranian hostage crisis, the Soviet invasion of Afghanistan, near-catastrophe at a Pennsylvania nuclear plant, aviation accidents, serial killers on the loose, and endless gas lines. Backed by a reenergized conservative Republican base, Reagan ran on the campaign slogan “Make America Great Again”—and prevailed. Reaganland is the story of how that happened, tracing conservatives’ cutthroat strategies to gain power and explaining why they endure four decades later.

The Climate Change 2007 volumes of the Fourth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) provide the most comprehensive and balanced assessment of climate change available. This IPCC Working Group II volume provides a completely up-to-date scientific assessment of the impacts of climate change, the vulnerability of natural and human environments, and the potential for response through adaptation. Written by the world's leading experts, the IPCC volumes will again prove to be invaluable for researchers, students, and policymakers, and will form the standard reference works for policy decisions for government and industry worldwide.

Over the last five years, widespread concern about the effects of social media on democracy has led to an explosion in research from different disciplines and corners of academia. This book is the first of its kind to take stock of this emerging multi-disciplinary field by synthesizing what we know, identifying what we do not know and obstacles to future research, and charting a course for the future inquiry. Chapters by

leading scholars cover major topics – from disinformation to hate speech to political advertising – and situate recent developments in the context of key policy questions. In addition, the book canvasses existing reform proposals in order to address widely perceived threats that social media poses to democracy. Few relationships have proved more pivotal in changing the course of American politics than those between presidents and social movements. For all their differences, both presidents and social movements are driven by a desire to recast the political system, often pursuing rival agendas that set them on a collision course. Even when their interests converge, these two actors often compete to control the timing and conditions

of political change. During rare historical moments, however, presidents and social movements forged partnerships that profoundly recast American politics. *Rivalry and Reform* explores the relationship between presidents and social movements throughout history and into the present day, revealing the patterns that emerge from the epic battles and uneasy partnerships that have profoundly shaped reform. Through a series of case studies, including Abraham Lincoln and abolitionism, Lyndon Johnson and the civil rights movement, and Ronald Reagan and the religious right, Sidney M. Milkis and Daniel J. Tichenor argue persuasively that major political change usually reflects neither a top-down nor bottom-up strategy but a crucial interplay between the two. Savvy leaders, the authors show, use social movements to support their policy goals. At the same time, the most successful social movements target the president as either a source of powerful support or the center of opposition. The book concludes with a consideration of Barack Obama's approach to contemporary social movements such as Black Lives Matter, United We Dream, and Marriage Equality.

The cold war came to a grinding halt during the astounding developments of 1989-1991. The Berlin Wall fell, Eastern European countries freed themselves from Soviet domination, and the Soviet Union itself disintegrated after witnessing a failed coup presumably aimed at restoring a communist dictatorship. Suddenly the "evil empire" was no more, and U.S. foreign policy was forever changed. This volume explores the revisions to a variety of bureaucratic institutions and policy areas in the

wake of these political upheavals.

The emperor Nero is etched into the Western imagination as one of ancient Rome's most infamous villains, and Tacitus' *Annals* have played a central role in shaping the mainstream historiographical understanding of this flamboyant autocrat. This section of the text plunges us straight into the moral cesspool that Rome had apparently become in the later years of Nero's reign, chronicling the emperor's fledgling stage career including his plans for a grand tour of Greece; his participation in a city-wide orgy climaxing in his publicly consummated 'marriage' to his toy boy Pythagoras; the great fire of AD 64, during which large parts of central Rome went up in flames; and the rising of Nero's 'grotesque' new palace, the so-called 'Golden House', from the ashes of the city. This building project stoked the rumours that the emperor himself was behind the conflagration, and Tacitus goes on to present us with Nero's gruesome efforts to quell these mutterings by scapegoating and executing members of an unpopular new cult then starting to spread through the Roman empire: Christianity. All this contrasts starkly with four chapters focusing on one of Nero's most principled opponents, the Stoic senator Thrasea Paetus, an audacious figure of moral fibre, who courageously refuses to bend to the forces of imperial corruption and hypocrisy. This course book offers a portion of the original Latin text, study aids with vocabulary, and a commentary. Designed to stretch and stimulate readers, Owen's and Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and

undergraduate level. It extends beyond detailed linguistic analysis and historical background to encourage critical engagement with Tacitus' prose and discussion of the most recent scholarly thought.

Even among people who would never subscribe to its more dramatic claims, the "Eurabia" movement has popularized a set of seemingly common-sense assumptions about Muslim immigrants to the West: that they are disloyal, that they have a political agenda driven by their faith, that their high reproduction rates will soon make them a majority. These beliefs are poisoning politics and community relations in Europe and North America--and have led to mass murder in Norway. Rarely challenged, these claims have even slipped into the margins of mainstream politics. Doug Saunders believes it's time to debunk the myth that immigrants from Muslim countries are wildly different and pose a threat to the West. Drawing on voluminous demographic, statistical, scholarly and historical documentation, Saunders examines the real lives and circumstances of Muslim immigrants in the West: their politics, their beliefs, their observances and their degrees of assimilation. In the process he shatters the core claims that have built a murderous ideology and draws haunting historical parallels showing how the same myths stuck to earlier groups, such as Jews and Roman Catholics. His work will become a vital handbook in the culture wars that threaten to dominate North American and European elections and media discussions in 2012 and afterwards, and will provoke considerable debate over the actual nature of our polyglot societies.

Syngman Rhee (Yi Sûng-man, 1875-1965) is undoubtedly one of the most important figures in modern Korean history. He emerged as the dominant leader in Korea's nationalist struggle against Japan and served as the first president of the Republic of Korea from 1948 through

1960. Rhee's political career as founder and president, however, was not without controversy. While some hailed him as "the George Washington of Korea," others regarded Rhee as "a little Chiang Kai-shek." This first English translation of Rhee's magnum opus, *The Spirit of Independence* (Tongnip chôngsin), provides readers with an essential key to understanding the breadth and depth of Rhee's thought at a critical juncture in his life and his country's history.

This highly readable narrative history of the Republican Party profiles the G.O.P. from its emergence as an antislavery party during the 1850s to its current place as champion of political conservatism.

Longlisted for the National Book Award New York Times Bestseller A former Wall Street quant sounds an alarm on the mathematical models that pervade modern life -- and threaten to rip apart our social fabric We live in the age of the algorithm. Increasingly, the decisions that affect our lives--where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when they're wrong. Most troubling, they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil

exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort resumes, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016 Goodreads Choice Awards (Science and Technology) -- Kirkus, Best Books of 2016 -- New York Times, 100 Notable Books of 2016 (Non-Fiction) -- The Guardian, Best Books of 2016 -- WBUR's "On Point," Best Books of 2016: Staff Picks -- Boston Globe, Best Books of 2016, Non-Fiction

The remarkable story of Sandra Day O'Connor's family and early life, her journey to adulthood in the American Southwest that helped make her the woman she is today: the first female justice of the U.S. Supreme Court and one of the most powerful women in America. "A charming memoir about growing up as sturdy cowboys and cowgirls in a time now past."—USA Today In this illuminating and unusual book, Sandra Day O'Connor tells, with her brother, Alan, the story of the Day family, and of growing up on the harsh yet beautiful land of the Lazy B ranch in Arizona. Laced throughout these stories about three generations of the Day family, and everyday life on the Lazy B, are the lessons Sandra and Alan learned about the world, self-reliance, and survival, and how the land, people, and values of the Lazy B shaped them. This fascinating glimpse of life in the Southwest in the last century recounts an important time in American history, and provides an enduring portrait of an independent young woman on the

brink of becoming one of the most prominent figures in America.

To young Christians of the world, Pope Francis has a message for you: "Christ is alive, and he wants you to be alive!" In his fourth apostolic exhortation, *Christus Vivit*, Pope Francis encapsulates the work of the 2018 synod of bishops on "Young People, The Faith, and Vocational Discernment." Pope Francis has always had a special relationship with young people, and in his fatherly love for you he shows that: You can relate to young people in Scripture who made a difference You identify with the Christ who is always young You face difficult issues in the world today You yearn for the truth of the Gospel You are capable of amazing things when you respond to the Gospel You learn and grow with help from the faithful of all generations You need bold and creative youth ministry You can discover who God made you to be You are urged to pray for discernment *Christus Vivit* is written for and to young people, but Pope Francis also wrote it for the entire Church, because, as he says, reflecting on our young people inspires us all. "May the Holy Spirit urge you on as you run this race. The Church needs your momentum, your intuitions, your faith. We need them! And when you arrive where we have not yet reached, have the patience to wait for us."

The perfect gift! A specially priced, beautifully designed hardcover edition of *The Joy of the Gospel* with a foreword by Robert Barron and an afterword by James Martin, SJ. "The joy of the gospel fills the hearts and lives of all who encounter Jesus... In this Exhortation I wish to encourage the Christian faithful to embark upon a new chapter of evangelization marked by this joy, while pointing out new paths for the Church's journey in years to come." – Pope Francis This special edition of Pope Francis's popular message of hope explores themes that are important for believers in the 21st century. Examining the many obstacles to faith and what

can be done to overcome those hurdles, he emphasizes the importance of service to God and all his creation. Advocating for “the homeless, the addicted, refugees, indigenous peoples, the elderly who are increasingly isolated and abandoned,” the Holy Father shows us how to respond to poverty and current economic challenges that affect us locally and globally. Ultimately, Pope Francis demonstrates how to develop a more personal relationship with Jesus Christ, “to recognize the traces of God’s Spirit in events great and small.” Profound in its insight, yet warm and accessible in its tone, *The Joy of the Gospel* is a call to action to live a life motivated by divine love and, in turn, to experience heaven on earth. Includes a foreword by Robert Barron, author of *Catholicism: A Journey to the Heart of the Faith* and James Martin, SJ, author of *Jesus: A Pilgrimage*

Globalisation and Historiography of National Leaders: Symbolic Representations in School Textbooks, the 18th book in the 24-volume book series *Globalisation, Comparative Education and Policy Research*, explores the interrelationship between ideology, national identity, national history and historical heroes, setting it in a global context. Based on this focus, the chapters represent hand-picked scholarly research on major discourses in the field of history textbooks and symbolic representations of national heroes, and draw upon recent studies in the areas of globalisation, history textbooks, and national leaders. A number of researchers have written on the importance of teaching national history in order to foster national identity and a sense of belonging to a certain society, state, and

people among the younger generation. Some nations prefer to create national heroes out of their political leaders who are still in power, and whose lives and reputation are portrayed as being eminently spotless. Using diverse comparative education paradigms from critical theory, social semiotics, and historical-comparative research, the authors analyse the unpacking of the ideological agenda hidden behind the choice and lionization (or silencing) of the preferred national heroes. They provide an informed critique of various historical narratives depicting national leaders and national heroes. The book provides an easily accessible, practical yet scholarly source of information on international concerns in the field of globalisation, history education and policy research. Offering an essential sourcebook of ideas for researchers, history educators, practitioners and policymakers in the fields of globalisation and history education, it also provides a timely overview of current changes in politically correct history education narratives in history textbooks.

The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT

professors, answer these questions based on years of field research from around the world. Called "marvelous, rewarding" by the Wall Street Journal, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. Poor Economics shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

"THE PURPOSE OF POLITICS IS NOT TO DEFEAT YOUR OPPONENT AS MUCH AS IT IS TO PROVIDE SUPERIOR LEADERSHIP AND BETTER IDEAS THAN THE OPPOSITION." —JACK KEMP

The late 1970s were miserable for America. It was the post-Vietnam, post-Watergate era, a time of high unemployment, ruinous inflation, gasoline lines, Communist advances, and bottomed-out U.S. morale. In the 1980s, it all turned around: "stagflation" ended and nearly two decades of prosperity ensued. The Soviet Union retreated, then collapsed. America again believed in itself. And around the world, democratic capitalism was deemed "the end of history." Ronald Reagan's policies sparked the American renaissance, but the Gipper's leadership is only part of the story. The economic theory that underpinned America's success was pioneered by a star professional quarterback turned self-taught intellectual and "bleeding-heart conservative": Jack Kemp. Kemp's role in a pivotal period in American history is at last illuminated in this first-ever biography, which also has lessons for the

politics of today. Kemp was the congressional champion of supply-side economics—the idea that lowering taxes would foster growth. Even today, almost no one advocates a return to a top income tax rate of 70 percent. Kemp didn't just challenge the Democratic establishment. He also encouraged his fellow Republicans to be growth (not austerity) minded, open their tent to minorities and blue-collar workers, battle poverty and discrimination, and once again become "the party of Lincoln." Kemp approached politics the same way he played quarterback for the Buffalo Bills: with a refusal to accept defeat. Yet he also was incapable of personal attack, arguing always on the level of ideas. He regarded opponents as adversaries, not enemies, and often cooperated with them to get things done. Despite many ups and downs, including failed presidential and vice-presidential bids, he represented a positive, idealistic, compassionate Republicanism. Drawing on never-published papers and more than one hundred Kemp Oral History Project interviews, noted journalists Morton Kondracke and Fred Barnes trace Kemp's life, from his childhood through his pro football career to his influential years as a congressman and cabinet secretary. As the American Dream seems to be waning and polarized politics stifles Washington, Kemp is a model for what politics ought to be. The Republican party and the nation are in desperate need of another Kemp.

This book provides a review of the principles and methods of drainage with an emphasis on design. The whole field of drainage is covered, and although the book concentrates mainly on the practice in North America, Europe and Britain, the practice in developing countries is also included. The book is directed primarily at the graduate engineer entering professional practice, but will also provide a useful reference for more senior engineers and for those in adjunct professions. Chapter 1 outlines the necessity for drainage on a large or small scale, for rural and urban areas. As the drainage engineer must decide how much unwanted water there will be and when it will occur, the chapter discusses climatic types, prediction of rainfall, evapotranspiration effects, return periods (of design storms and runoff events), river flow and flood prediction, and various sensing systems for providing short term predictions of rainfall, runoff, streamflow and flood warning. Chapter 2 gives a thorough review of the properties of soil in the context of drainage design. The extensive mathematical theories which relate to the crucial area of soil water movement are outlined and due attention is paid to the growing importance of predicting soil water movement in partially saturated

soils.

On the hundredth anniversary of Ronald Reagan's birth comes the twentieth-anniversary edition of Peggy Noonan's critically acclaimed bestseller *What I Saw at the Revolution*, for which she provides a new Preface that demonstrates this book's timeless relevance. As a special assistant to the president, Noonan worked with Ronald Reagan—and with Vice President George H. W. Bush—on some of their most memorable speeches. Noonan shows us the world behind the words, and her sharp, vivid portraits of President Reagan and a host of Washington's movers and shakers are rendered in inimitable, witty prose. Her priceless account of what it was like to be a speechwriter among bureaucrats, and a woman in the last bastion of male power, makes this a Washington memoir that breaks the mold—as spirited, sensitive, and thoughtful as Peggy Noonan herself.

This book, which has been prepared by an international group of experts, provides comprehensive guidance for the design, planning and implementation of assessments and monitoring programmes for water bodies used for recreation. Argues that public finance--the study of the government's role in economics--should incorporate principles from behavior economics and other branches of psychology.

The most powerful force in the world economy today is the redefinition of the relationship between state and marketplace - a process that goes by the name of privatization though this term is inadequate to express its far-reaching changes. We are moving from an era in which governments sought to seize and control the 'commanding heights' of the economy to an era in which the idea of free markets is capturing the commanding heights of world economic thinking. Basic views of how society ought to be organized are undergoing rapid change, trillions of dollars are changing hands and so is fundamental political power. Great new wealth is being created - as are huge opportunities and huge risks. Taking a worldwide perspective, including Britain, where the process began with Mrs Thatcher, Europe and the former USSR, China, Latin America and the US, **THE COMMANDING HEIGHTS** shows how a revolution in ideas is transforming the world economy - why it is happening, how it can go wrong and what it will mean for the global economy going into the twenty-first century.

Local newspapers can hold back the rising tide of political division in America by turning away from the partisan battles in Washington and focusing their opinion page on local issues. When a local newspaper in California dropped national politics from its opinion page, the resulting

space filled with local writers and issues. We use a pre-registered analysis plan to show that after this quasi-experiment, politically engaged people did not feel as far apart from members of the opposing party, compared to those in a similar community whose newspaper did not change. While it may not cure all of the imbalances and inequities in opinion journalism, an opinion page that ignores national politics could help local newspapers push back against political polarization.

This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.
