The United Nations Guidelines for Consumer Protection are an influential declaration of best practices in consumer protection law and policy. But as they were last amended in 1999, they are now overdue for an update - not least in areas where advances in technology have affected consumers, such as access to knowledge, Internet and telecommunications services, e-commerce, and digital products and services. Consumers International (CI), as the global campaigning voice for consumers, is well placed to make recommendations about what amendments should be made to address these new and emerging areas of consumer rights. This publication - which is a companion volume to a broader set of amendments developed by CI - explains our reasoning behind those proposed amendments that particularly affect consumers in the digital age. A focus of this volume - and of the Guidelines themselves - is on how effective consumer laws and policies can benefit consumers in developing and emerging economies. As such, in-depth analysis is provided of how the proposed amendments relate to consumers in India, Brazil and South Africa, either by

reflecting existing best practices in those countries, or by shining light on problem areas that the proposed amendments could help address.

This book addresses this need by considering the impact of technological innovation on the foundations of consumer advocacy, contracting behaviour, control over intellectual capital and information privacy. The collection presents a unique and timely perspective on these issues. The authors, internationally renowned experts, from diverse areas such as consumer issues in technology markets, contract, and intellectual property provide a fresh perspective on these topics. On May 24, 2018, President Donald J. Trump signed into law the Economic Growth, Regulatory Relief, and Consumer Protection Act (P.L. 115-174), an act intended to ease many of the post-recession restrictions that were imposed on the financial services industry by the Dodd-Frank Act. The law is intended principally to assist community banks, but significant provisions will change which bank holding companies are subject to enhanced prudential standards, benefiting larger banks. The legislation also contains provisions dealing with algorithmic trading in securities markets, the financial exploitation of seniors, cybersecurity, and hedge fund names. Although the effort for a major overhaul of the Dodd-Frank Act sought by Congressional Republicans fell short, the Economic Growth, Regulatory Relief, and Consumer Protection Act contains significant regulatory changes. Further rollbacks of Dodd-Frank are now left to regulators in implementing the changes or for future lawmaking by Congress. The Economic Growth, Regulatory Relief, and Consumer Protection Act: Law, Explanation and Analysis provides a thorough analysis of these provisions and immediate insight into the impact of the new law. Written by the banking and securities law experts at Wolters Kluwer, the publication analyzes all sections of the Act, explaining the changes, the historical context, the congressional intent and the practical impact, and includes citations to new and amended law sections. The publication also features the full text of

Telephone Consumer Protection Act (US Federal Communications Commission Regulation) (FCC) (2018 Edition) The Law Library presents the complete text of the Telephone Consumer Protection Act (US Federal Communications Commission Regulation) (FCC) (2018 Edition). Updated as of May 29, 2018 In this document, the Commission modifies its rules under the Telephone Consumer Protection Act (TCPA) to implement a provision of the Bipartisan Budget Act of 2015 that excepts from the TCPA's prior-express-consent requirement autodialed and prerecorded calls "made solely to collect a debt owed to or guaranteed by the United States." While certain debt servicing calls are permitted under the exception, the Commission caps the number of permitted calls to wireless numbers at no more than three within a thirty-day period; ensures that consumers have the right to stop such calls at any time; and adopts other consumer protections. These measures implement Congress's mandate to ensure the TCPA does not thwart important calls that can help consumers avoid debt troubles while preserving consumers' ultimate right to determine what calls they wish to receive. This casebook recognises the increasing importance of the rights & remedies created by the Act in its discussion of the law governing consumer protection & product liability. The assumption that competition law and consumer protection are mutually reinforcing is rarely challenged. The theory seems uncontroversial. However, because a positive interaction between the two is presumed to be self-evident, the frequent conflicts that do in fact arise are often dealt with on an ad hoc basis, with no overarching legal authority. There is a clear need for a detailed and coherent understanding of exactly where the complements and tensions between the two policy areas exist. Dr Csere's in-depth analysis provides that understanding. Proceeding from the dual perspective of law and economics that is, of justice, fairness, and reasonableness on the one hand, and of efficiency of the other she fully considers such underlying issues as the following: the role of competition law and consumer law in a free market economy; the notion of consumer welfare; the effect of the modernisation of EC competition law for consumers; economics theories of information, bounded rationality, and transaction costs; the special significance of vertical agreements and merger

control; and, how consumers are affected by information asymmetries. The ultimate focus of the book is on current and emerging EC law, in which a rapprochement between the two areas seems to be under way. Dr. Csere provides a knowledgeable guide to the various strands of theory, policy, and jurisprudence that (she shows) ought to be taken into account in the process, including schools of thought and law and policy experience in both Europe and the United States. A special chapter on Hungary, where post-1989 law and practice reveal a fresh and distinctly forward-looking understanding of the matter, is one of the book's most extraordinary features. Competition Law and Consumer Protection stands alone as a committed contribution to bridging a gap in legal knowledge the significance of which grows daily. It will be of immeasurable value to a wide range of professionals from academics and researchers to officials, policymakers, and practitioners in competition law, consumer protection advocacy, economic theory and planning, business administration, and various pertinent government authorities.
