Data Analytics and Decision-Making The text provides numerous discussions on how decision-makers are increasingly relying on data analytics to make decisions using accounting information. As both data access and analytical software improve, the use of data analytics to support decisions is becoming increasingly common at virtually all types of companies"--

Abbott helps social science students discover what questions to ask. This exciting book is not about habits and the mechanics of doing social science research, but about habits of thinking that enable students to use those mechanics in new ways, by coming up with new ideas and combining them more effectively with old ones. Abbott organizes his book around general methodological moves, and uses examples from throughout the social sciences to show how these moves can open new lines of thinking. In each chapter, he covers several moves and their reverses (if these exist), discussing particular examples of the move as well as its logical and theoretical structure. Often he goes on to propose applications of the move in a wide variety of empirical settings. The basic aim of *Methods of Discovery* is to offer readers a new way of thinking about directions for their research and new ways to imagine information relevant to their research problems. *Methods of Discovery* is part of the *Contemporary Societies* series.

The screenplay for McCarthy's classic film, bearing in full measure his gift—the ability to fit complex and universal emotions into ordinary lives and still preserve all of their power and significance. In the spring of 1975 the film director Richard Pearce approached Cormac McCarthy with a screenplay idea. Though already a widely acclaimed novelist, the author of such modern classics as *The Orchard Keeper* and *Child of God*, McCarthy had never before written a screenplay. Using a few photographs in the footnotes to a 1928 biography of a famous pre-Civil War industrialist as inspiration, McCarthy and Pearce roamed the mill towns of the South researching their subject. A year later McCarthy finished *The Gardener's Son*, a taut, riveting drama of impotence, rage, and violence spanning two generations of mill owners and workers, fathers and sons, during the rise and fall of one of America's most bizarre utopian industrial experiments. Produced as a two-hour film and broadcast on PBS in 1976, *The Gardener's Son* received two Emmy Award nominations and was shown at the Berlin and Edinburgh Film Festivals. Set in Graniteville, South Carolina, *The Gardener's Son* is the tale of two families: the wealthy Greggs, who own and operate the local cotton mill, and the McEvoy's, a family of mill workers beset by misfortune. The action opens as Robert McEvoy, a young mill worker, is having his leg amputated after an accident rumored to have been caused by James Gregg, the son of the mill's founder. Crippled and consumed by bitterness, McEvoy deserts both his job and his family. Returning two years later at the news of his mother's terminal illness, McEvoy arrives only to confront the grave diggers preparing her final resting place. His father, the mill's gardener, is now working on the factory line, the gardens forgotten. These proceedings stoke the slow-burning rage McEvoy carries within him, a fury that will ultimately consume both families.
