Blacksmithing: 15 Modern DIY Metal Projects for Beginners (FREE Bonus Included) If you've ever needed to do a bit of DIY at home or you've started a woodwork project, you will probably have headed down to the hardware store to buy nails at some point. You can get a box of hundreds of nails for a very small amount of money as they are mass-produced in places like China where the steel is a lot cheaper and the factories can churn out millions of units per hour. It's hard to imagine that just a few generations ago, these nails were handmade by blacksmith on a nail-by-nail basis. Blacksmiths made everything from nails to horseshoes to spears and only 150 years ago, the census taken at the time listed a fifth of the population as being involved in this profession. In the age of mass-production, many trades like this one are dying away and the skills our forefathers used to create tools and building materials are rapidly being lost. Blacksmithing is a creative hobby that can allow you to make useful and artistic objects from metal. In this book we will look at the basics and give you 15 fantastic ideas on how to get creative with metal. Download your E book "Blacksmithing: 15 Modern DIY Metal Projects for Beginners " by scrolling up and clicking "Buy Now with 1-Click" button!

Although most strategic metal reserves are unlikely to run out over the coming decades the perception of scarcity of certain minerals and metals may lead to increased speculation and volatility in price and supply. Strategically important metals are vital to advanced manufacturing, low-carbon technologies and other growing industries and the Government should provide reliable information on potential resource risks in a coordinated and coherent way. The UK also exports large quantities of scrap metal and waste electrical and electronic equipment (WEEE), often to developing countries. This metal not only is a potential resource for the UK but it is also an example of the UK exporting its environmental problems elsewhere. There are also concerns about the illegal export of WEEE, which is often labelled as second hand equipment for re-use, and calls for safeguards to be put in place. Despite a rate of 90% (by weight) metal recycling in the UK, it is of great concern that some strategic metals are likely to be lost in the 10% not being recycled. The report recommends: Improving existing legislation to ensure companies implement requirements on reporting non-financial information, such as human rights and health and safety issues; an evaluation by the Government of the potential for introducing similar legislation to that in the US whereby companies are required to produce detailed reports on 'conflict minerals' that they use. This report also brings the alleged activities of large dealers on the London Metals Exchange to the attention of the Office of Fair Trading. Finally, the report looks at domestic extraction and says planning regulations should not unnecessarily restrict the use of significant potential reserves and that domestic mining could alleviate risks associated with sourcing metals from external supply monopolies. In parallel the Government has to invest in research to ensure that future domestic mining has the least possible environmental impact

Ever since he was a child, Metal Gear Solid and Death Stranding creator Hideo Kojima was a voracious consumer of movies, music, and books. They ignited his passion for stories and storytelling, and the results can be seen in his groundbreaking, iconic video games. Now the head of independent studio Kojima Productions, Kojima's enthusiasm for entertainment media has never waned. This collection of essays explores some of the inspirations behind one of the titans of the video game industry, and offers an exclusive insight into one of the brightest minds in pop culture. -- VIZ Media

Urban riverbanks are attractive locations and highly prized recreational environments. However, they must meet the requirements of flood control, open space design and ecology at the same time, often a challenging task for the designer. This book is the product of extensive research that identified some 60 best-practice examples and subjected them to a comparative analysis. The result is a systematic catalog of effective strategies and innovative design tools that provides readers with an inspiring overview of the broad spectrum of design possibilities for river spaces. Each project is illustrated with photographs taken especially for the book and each design strategy and tool is explained by diagrams. This revised edition introduces ten new case studies chiefly from North America.

Now in its third edition, Teachers Investigate Their Work introduces both the theoretical concepts and the practical methods necessary for readers wishing to develop their action research. Drawing from studies carried out by teachers and other professionals, as well as from the authors' own international practical experience, the book provides detail on multiple educational contexts from primary education to university training and beyond. It contains over 50 practical methods and strategies to put into action, and explores key areas, such as: the purpose, roots, and varieties of action research collaborating with a critical friend, research participants, or your peers choosing a data collection method observing and documenting situations making sense of your data action research for professional development. This key text also provides crucial tools, such as: a simple 'quick start' nine step guide a toolbox for producing written reports a criteria for guiding the quality of action research. A concise yet thorough introduction to action research, Teachers Investigate Their Work is an essential, practical, and easily accessible handbook for teachers, senior staff, and researchers who want to engage in innovation and improve their practice.

Why simply play music or go online when you can use your iPhone or iPad for some really fun projects, such as building a metal detector, hacking a radio control truck, or tracking a model rocket in flight? Learn how to build these and other cool things by using iOS device sensors and inexpensive hardware such as Arduino and a Bluetooth Low Energy (LE) Shield. This hands-on book shows you how to write simple applications with techBASIC, an Apple-approved development environment that runs on iOS devices. By using code and example programs built into techBASIC, you'll learn how to write apps directly on your Apple device and have it interact with other hardware. Build a metal detector with the iOS magnetometer Use the HiJack hardware platform to create a plant moisture sensor Put your iPhone on a small rocket to collect acceleration and rotation data Hack a radio control truck with Arduino and Bluetooth LE Create an arcade game with an iPad controller and two iPhone paddles Control a candy machine with an iOS device, a micro servo, and a WiFi connection

An ordinary family lives in a small community outside ancient Jerusalem. They don't expect what takes place inside the massive walls of the city to have much impact on them or their daily lives. The patriarch of the household is concerned with supporting his family, especially after soldiers destroy work he had completed for wealthy customers, threatening his income and reputation. His wife concentrates on running their home and raising their family. The older children are restless, only concerned with their future. The younger children seem oblivious to all that goes on around them. Caught between worrying about a coming baby and surviving the present, none of them expect that a new kind of life awaits them. Danger threatens this community and its inhabitants. From the lively rabbi who embraces the rumblings of new teachings to the old women who reject any change around them, everyone in the village faces challenges to their traditions, lives, and beliefs. An unstoppable momentum beyond their control strengthens, and resistance to change forms the beginnings of a new faith—but faith in what? Something amazing has happened, and none of their lives will ever be the same again. A Man Named Jesus offers a powerful glimpse into what it would have been like to live during the time that Jesus lived, died, and was resurrected—the beginning of Christianity. All proceeds from book sales will be donated to the Backpack Ministry at Bethany United Methodist Church, Austin, Texas, providing weekend meals to elementary school students on assistance programs who otherwise would go hungry. For more information, contact www.bethany-umc.org.
