International terrorism and the development of weapons of mass destruction have given war an unlimited capability that can cause total destruction of all living things as well as the world in which we reside. Although human beings realize that this catastrophic outcome is possible, they continue to engage in wars. What forces drive them to do so? Sounds: A Pathway to World Peace attempts to answer that question by examining the survival and socializing forces that govern human interactions, identifying the behaviors these forces initiate, and reviewing the circumstances that strengthen the influence of one force over the other. This information is used to develop The Behavior Set Theory. This theory is used to explain why wars exist and to provide approaches combatants can take to stop the Arab-Israeli conflict, the war in Iraq, international terrorism, and conditions existing in the United States, where many public policies strengthen survival forces rather than socializing ones. About the Author: Alvin S. Yusin taught neurodevelopmental pediatrics at the Keck School of Medicine and directed the child development division at Los Angeles County Hospital until his retirement, when he pursued his interest in world affairs. He has incorporated his understanding of child and adult development and behavior, as well as ideas developed by observations he has made over the years into his book. A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.
