Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals July - December)

Year after year, this book has immensely helped students in their comprehension of the subject and score good marks in examinations. It has been written specifically for the prescribed syllabus of Cost Accounting Paper of BCom (Hons) Semester IV of the University of Delhi and of School of Open Learning. Its basic features are the same as the mother book Cost Accounting—Principles and Practice, which is a UGC-recommended text for the last many years. Thus, it gives a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been organized on ‘first things first’ basis to sustain the interest of the students. Every discussion involving conceptual difficulties is immediately followed by a numerical example.

Advanced Accounting delivers an in-depth, comprehensive introduction to advanced accounting theory and application, using actual business examples and relevant news stories to demonstrate how core principles translate into real-world business scenarios. Clearly defined and logically organized Learning Objectives aid in student comprehension, while

highlighted Related Concepts illustrate how individual concepts fit into the larger picture. Short answer questions throughout the chapter allow students to test their knowledge before reaching the more in-depth end-of-chapter questions, promoting a deeper understanding of both technical and conceptual aspects of the field. Written by active accounting researchers, this text brings clarity and flexibility to the central ideas underlying business combinations, consolidated financial statements, foreign currency transactions, partnerships, non-profit accounting and more. This new Seventh Edition has been updated to reflect the latest changes to FASB and GASB standards, allowing students to build a skill set based on up-to-date practices. With a student-oriented pedagogy designed to enhance comprehension, promote engagement, and build real-world understanding, this user-friendly book provides an essential foundation in current advanced accounting methods and standards.

A UGC recommended textbook for various commerce undergraduate programmes like BCom, BBA, BBM and BBS. Also useful for CA, CS, ICMA, MCom and MBA. The revised edition of Cost Accounting: Principles and Practice gives students a thorough grounding in cost concepts, cost behaviour and costing methods. The subject matter has been presented in a student-friendly, systematic and intelligible manner. Every discussion involving conceptual difficulties is immediately followed by a numerical example. A large number of charts and diagrams bring to light finer points of the subject and make it easily comprehensible. The subject matter has been organized on 'first things first' basis to sustain the interest of the students. An authentic book on Cost Accounting, which is indispensable for students at the undergraduate level

New in this Edition • Reworked text for better understanding of the concepts • Recent questions from BCom, BBA, MBA, CA and CS examinations • Model test papers in Appendix

The third edition of Management and Cost Accounting continues to offer a wide ranging suite of resources to serve the needs of students, instructors and professionals. With a strong European focus, this text provides a definitive coverage of established and contemporary issues within Management and Cost Accounting. Drawing on the latest research and surveys, the authors bring technical and theoretical concepts to life through extensive use of real world examples and case studies. Features Richly illustrated with a striking new full colour text design and photographs to further engage the reader, reinforce the practical relevance of issues discussed. Extended and fully updated coverage of Strategic Management Accounting In depth European and Harvard Case Studies. A mix of new, and classic cases which pull together themes and offer a broader perspective of how management accounting can be applied in a range of different contexts. Cases include questions, and guided solutions are provided on the CWS accompanying the book. Extensive assessment material, including questions taken from past papers to allow students to consolidate learning and practice their exam technique. Questions are

A UGC recommended textbook for various commerce graduate programmes like B.Com, BBA, BBM and BBS. Also useful for CA, CS, ICMA, M.Com and MBA. The revised edition of Cost Accounting—Principles and Practice gives students a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject matter has been presented in a student-friendly, systematic and intelligible manner. Every discussion involving conceptual difficulties is immediately followed by a numerical example. A large number of charts and diagrams bring to light finer points of the subject and make it easily comprehensible. The subject matter has been organized on 'first things first' basis to sustain the interest of the students. Additional problems and solutions have been included in the Appendix to help students.

The authors have kept the text concise by focusing on the key concepts students need to master. Opening vignettes & 'in action' boxes show realistic applications of these concepts throughout. Comprehensive end-of-chapter problems provide

students with all the practice they need to fully learn each concept.

This text provides students with a thorough, but abbreviated, understanding of concepts, behavior, and accounting techniques applicable to manufacturing cost systems. It is designed for the brief cost accounting course found in career and community colleges.

M: Advertising 2e was created with students' and professors' needs in mind. It explores the core principles that drive advertising, using a lively voice that goes beyond academic theory. The authors' goal was to present advertising as it is actually practiced and make the fundamentals accessible and relevant to the student's "real life." This approach truly transcends the conceptual and propels students into an exciting and practical dimension. Students receive a cost-effective, easy to read, focused text complete with study resources to help them review for tests and apply chapter concepts. Professors receive a text that contains all the pertinent information - yet in a more condensed format that is easier to cover by students. McGraw-Hill Connect assignments are provided to utilise the power of the web, providing application of concepts for students and automatically grade materials to support instructors.

Decision Accounting and Marginal Costing System.

This book provides a thorough coverage of the essentials of cost accounting from a health care perspective. It covers all of the basic tools of cost accounting common to all industries, and uses health care examples. Part I provides the reader with a solid foundation in the essentials of cost accounting. The chapters in this section provide an introduction to costing and cost definitions. Various approaches to product costing and cost allocation are discussed. Breakeven analysis is also covered, as are techniques for making nonroutine decisions. Part II presents a number of specific tools for improved planning and control. The

chapters in this section focus on forecasting and prediction of future costs, budgeting, flexible budgeting, variance analysis, and management control. Part III addresses a number of additional cost accounting tools that can be helpful in generating management information for decision making. Specifically, there are chapters on cost accounting, productivity measurement, inventory, uncertainty, information systems, and performance evaluation. The criticisms of cost accounting and a number of suggested approaches for improvement are discussed in Part IV. The chapters in this part also examine activity-based costing, total quality management, and the future of costing. Each chapter is followed by one or more articles that apply some of the material discussed in the chapter. The last chapter provides a summary of the book.

Hansen/Mowen's CORNERSTONES OF COST MANAGEMENT, 4E demonstrates the dynamic nature of cost accounting in today's changing business environment. The book covers functional-based cost and control, and then activity-based cost systems, giving students the skills to manage any cost management system. Developed using extensive research on student learning behavior, this book presents concepts in a unique format that speaks to how students learn. Cornerstones examples in each chapter emphasize the How, Why, and What-ifs of basic cost management concepts, while delving into the conceptual nature of each equation or topic. Gain first-hand experience and the thorough foundation needed to calculate payroll, complete payroll taxes, and prepare payroll records and reports. Bieg/Toland's market-leading PAYROLL ACCOUNTING 2021 introduces the latest payroll laws and developments. This edition focuses on practical applications rather than theory with hands-on exercises, detailed examples and business applications that highlight the relevance of concepts. In addition, each problem corresponds to a specific example or illustration that clearly demonstrates the steps to solve the problem. An extensive project in the last chapter lets you apply what you've learned as a payroll accountant. This edition also covers the Fundamental Payroll Certification (FPC) from the American Payroll Association. PAYROLL ACCOUNTING 2021 provides a thorough understanding of payroll for success both now and throughout your business career. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

For courses in Financial and Managerial Accounting. Weygandt's Managerial Accounting provides students with a clear introduction to fundamental managerial accounting concepts. This edition helps students get the most out of their accounting course by making practice simple. Designed for a one-semester, undergraduate Managerial Accounting course, the authors provide new opportunities for self-guided practice allowing students to check their knowledge of accounting concepts, skills, and problem solving techniques and receive personalized feedback at the question, learning objective, and course level. Newly streamlined learning objectives help students use their study time efficiently by creating clear connections between the reading and video content, and the practice, homework, and assessment questions. Using metric units and companies with a more global

feel, this new text is ideal for courses across the world.

Introduction to Managerial Accounting, 4/e by Brewer/Garrison/Noreen is based on the market-leading text, Managerial Accounting, by Garrison, Noreen and Brewer. However, this is not simply a briefer book with chapters removed; B/G/N has been rethought and retooled to meet the needs of the market. B/G/N 4/e is a more accessible, yet thoroughly student-friendly text that satisfies the basic needs of the managerial accounting student without unnecessary depth on advanced topics associated with the follow-up course: cost accounting/cost management. Faculty and students alike will find this new edition has retained the hallmark features of the Garrison brand: author-written supplements, excellent readability, terrific examples, and balanced end-of-chapter material.
