Polychromatic screen printing is for painters, monoprinters, watercolorists, textile artists, screen printers, deconstructed screen printers, and anyone interested in obtaining multiples from one painted image on paper or fabric. Why labor over one painting when you can paint once and get multiples? This innovative process produces a limited-edition series from the original painted screen - with no color registration. Similar to an extended monoprint process, it yields 4-6 prints from a single painted image. For all levels of ability. No solvents are used. This method combines both painting and printing. It allows the same flexibility and spontaneity as painting on paper or fabric. You simply paint all the colors of your image directly on one print screen. One pull of the squeegee prints the image onto fabric or paper. Then pull the squeegee again for more prints. This newly expanded book is a complete step-by-step manual for the process with 88 photos and 11 illustrations. Included is background information for traditional screen printing, highlighting the distinct advantages of polychromatic screen printing. Mixing the versatility of paper with the dimensional qualities of cloth, this inventive handbook to crafting with "paper-cloth" provides mixed-media artists with the knowledge to easily transform their works into collaged quilts using embellishment techniques, such as painting, stitching, needlefelting, and beading. Though the technique is inexpensive and requires less space, equipment, and skill than dyeing fabrics for quilt making, readers will learn step-by-step how the use of paper-cloth--from making the paper-cloth itself; adding color and interest to the foundation with inks, stains, paints, and glazes; texturizing; implementing printmaking techniques; and more--can allow layers of complexity and textural appeal. Common projects include art quilts, art dolls, jewelry, and artist books. Perfect for artists interested in altered art, found and recycled art, needle felting, and nontraditional elements, this original resource is the first to cross the paper and cloth mediums.

Internationally renowned dyer and artist India Flint draws on her years of experience and experimentation in natural dyeing techniques to present an expert, highly accessible and achievable handbook of ecologically sustainable plant dye methods using renewable resources, most of which can be found in the average home garden. Projects range from solar dyeing to dyeing with 'ice-flowers'. The result is a boundless range of pure, gentle, natural colours produced with the least possible harm to the environment and the dyer.

More and more textile artists are using natural processes in their work, from dyeing with rust to working with found and scavenged items, and this book is the first to cover this increasingly popular subject. It promotes a way of working creatively with what is close at hand, whether gathered on walks by the seashore or collected in your garden, and working in tune with natural processes, bringing the rhythms and unpredictability of nature into your work. Examples of this type of working include burying embroidered fabric to give it a natural patina, dyeing with garden fruits or seaweed, weaving with pieces of beachcombed fibre, printing with found objects and making sun prints. In some cases nature is directly harnessed to make its mark on work; for one of her pieces, the author wrapped cloth around rusty bolts on sea defences, then unwrapped them weeks later to reveal patterns made by rust. The book is illustrated with the finest examples of contemporary embroidery and textile-art work using nature, by artists whose practice is tied up with their experience of and respect for the natural environment, often capturing a very strong sense of place and a feeling of calmness and contemplation.
