This volume presents the proceedings of Medicon 2016, held in Paphos, Cyprus. Medicon 2016 is the XIV in the series of regional meetings of the International Federation of Medical and Biological Engineering (IFMBE) in the Mediterranean. The goal of Medicon 2016 is to provide updated information on the state of the art on Medical and Biological Engineering and Computing under the main theme "Systems Medicine for the Delivery of Better Healthcare Services". Medical and Biological Engineering and Computing cover complementary disciplines that hold great promise for the advancement of research and development in complex medical and biological systems. Research and development in these areas are impacting the science and technology by advancing fundamental concepts in translational medicine, by helping us understand human physiology and function at multiple levels, by improving tools and techniques for the detection, prevention and treatment of disease. Medicon 2016 provides a common platform for the cross fertilization of ideas, and to help shape knowledge and scientific achievements by bridging complementary disciplines into an interactive and attractive forum under the special theme of the conference that is Systems Medicine for the Delivery of Better Healthcare Services. The programme consists of some 290 invited and submitted papers on new developments around the Conference theme, presented in 3 plenary sessions, 29 parallel scientific sessions and 12 special sessions.

The study of pre-existing film music is a well-established part of Film Studies, covering 'classical' music and popular music. Generally, these broad musical types are studied in isolation. This anthology brings them together in twelve focused case studies. The first section explores art music; it revolves around the debate on the relation between the aural and visual tracks, and whether pre-existing music has an integrative function or not. The second section is devoted to popular music in film, and shows how very similar the functions of popular music in film are to the supposedly more 'elite' classical music and opera.

In the mid-1950s, to combat declining theater attendance, film distributors began releasing pre-packaged genre double-bills—including many horror and science fiction double features. Though many of these films were low-budget and low-end, others, such as *Invasion of the Body Snatchers*, *Horror of Dracula* and *The Fly*, became bona fide classics. Beginning with Universal-International's 1955 pairing of *Revenge of the Creature* and *Cult of the Cobra*, 147 officially sanctioned horror and sci-fi double-bills were released over a 20-year period. This book presents these double features year-by-year, and includes production details, historical notes, and critical commentary for each film. This book combines a critique of the scientific evidence relating to work stress, with an account of the social, historical and cultural changes that produced this phenomenon. the analysis is grounded in workers' accounts of their experiences of work stress, derived from the authors' qualitative research. Sociological theories of embodiment, emotions and medicalization are employed to explore the role of subjectivity in mediating the relationship between work and ill health.

National Bestseller • New York Times “100 Notable Books of the Year” • NPR “Favorite Books of 2019” • Guardian “100 Best Books of the 21st Century” • Winner of the National Outdoor Book Award From the best-selling, award-winning author of *Landmarks* and *The Old Ways*, a haunting voyage into the planet’s past and future. Hailed as “the great nature writer of this generation” (*Wall Street Journal*), Robert Macfarlane is the celebrated author of books about the intersections of the human and the natural realms. In *Underland*, he delivers his masterpiece: an epic exploration of the Earth’s underworlds as they exist in myth, literature, memory, and the land itself. In this highly anticipated sequel to his international bestseller *The Old Ways*, Macfarlane takes us on an extraordinary journey into our relationship with darkness, burial, and what lies beneath the surface of both place and mind. Traveling through “deep time”—the dizzying expanses of geologic time that stretch away from the present—he moves from the birth of the universe to a post-human future, from the prehistoric art of Norwegian sea caves to the blue depths of the Greenland ice cap, from Bronze Age funeral chambers to the catacomb labyrinth below Paris, and from the underground fungal networks through which trees communicate to a deep-sunk “hiding place” where nuclear waste will be stored for 100,000 years to come. Woven through Macfarlane’s own travels are the unforgettable stories of descents into the underland made across history by explorers, artists, cavers, divers, mourners, dreamers, and murderers, all of whom have been drawn for different reasons to seek what Cormac McCarthy calls “the awful darkness within the world.” Global in its geography and written with

great lyricism and power, Underland speaks powerfully to our present moment. Taking a deep-time view of our planet, Macfarlane here asks a vital and unsettling question: “Are we being good ancestors to the future Earth?” Underland marks a new turn in Macfarlane’s long-term mapping of the relations of landscape and the human heart. From its remarkable opening pages to its deeply moving conclusion, it is a journey into wonder, loss, fear, and hope. At once ancient and urgent, this is a book that will change the way you see the world.

This book begins with the assumption that the presence of non-human creatures causes an always-already uncanny rift in human assumptions about reality. Exploring the dark side of animal nature and the ‘otherness’ of animals as viewed by humans, and employing cutting-edge theory on non-human animals, eco-criticism, literary and cultural theory, this book takes the Gothic genre into new territory. After the dissemination of Darwin’s theories of evolution, nineteenth-century fiction quickly picked up on the idea of the ‘animal within’. Here, the fear explored was of an unruly, defiant, degenerate and entirely amoral animality lying (mostly) dormant within all of us. However, non-humans and humans have other sorts of encounters, too, and even before Darwin, humans have often had an uneasy relationship with animals, which, as Donna Haraway puts it, have a way of ‘looking back’ at us. In this book, the focus is not on the ‘animal within’ but rather on the animal ‘with-out’: other and entirely incomprehensible.

and fantasy literature are genres that have become dominant forces in contemporary worldwide culture. The original 1818 text of Mary Shelley's classic novel, with annotations and essays highlighting its scientific, ethical, and cautionary aspects. Mary Shelley's *Frankenstein* has endured in the popular imagination for two hundred years. Begun as a ghost story by an intellectually and socially precocious eighteen-year-old author during a cold and rainy summer on the shores of Lake Geneva, the dramatic tale of Victor Frankenstein and his stitched-together creature can be read as the ultimate parable of scientific hubris. Victor, “the modern Prometheus,” tried to do what he perhaps should have left to Nature: create life. Although the novel is most often discussed in literary-historical terms—as a seminal example of romanticism or as a groundbreaking early work of science fiction—Mary Shelley was keenly aware of contemporary scientific developments and incorporated them into her story. In our era of synthetic biology, artificial intelligence, robotics, and climate engineering, this edition of *Frankenstein* will resonate forcefully for readers with

Creatures is a gorgeous story of friendship, mystery, and discovery that will delight readers of all ages! In Romantic Drama, three dozen comparatists join forces for a supranational, crosscultural reexamination of the deep paradigm shifts appearing around the start of the nineteenth century which revolutionized drama as a literary art within the enormous civilization constituted by Europe and her overseas extensions. Romantic pronouncements on the canon and poetics of drama, the symptomatic subject-matters treated by Romantic playwrights, the structural means by which they expressed their view of the world, and regional peculiarities are illuminated from multiple perspectives. The volume aspires to skirt the pitfalls of simplistic genetic or teleological thinking. It does not treat Romanticism as a limited “period” dominated by some construed singular master-ethos or dialectic; rather, it follows the literary patterns and dynamics of Romanticism as a flow of interactive currents across geocultural frontiers. Finally, this involves recognizing the Romantic heritage in literary phenomena reaching into our own times. Thus the Romantic celebration of imagination, creation of a theater of the mind, experience of intertextuality, dissolving of generic boundaries, and embrace of “myth” as a challenge to older “history” figure among the important topics, as do Romantic foreshadowings of Symbolist, Existentialist, and Absurdist drama. OFFER: 30% discount for a complete set order (5 vols.). The Romanticism series in the Comparative History of Literatures in European Languages is the result of a remarkable international collaboration. The editorial team coordinated the efforts of over 100 experts from more than two dozen countries to produce five independently conceived, yet interrelated volumes that show not only how Romanticism developed and spread in its principal European homelands and throughout the New World, but also the ways in which the affected literatures in reaction to Romanticism have redefined themselves on into Modernism. A glance at the index of each volume quickly reveals the extraordinary richness of the series' total contents. Romantic Irony sets the broader experimental parameters of comparison by concentrating on the myriad expressions of "irony" as one of the major impulses in the Romantic philosophical and artistic revolution, and by combining cross-cultural and interdisciplinary studies with special attention also to literatures in less widely diffused language streams. Romantic Drama traces creative innovations that deeply altered the understanding of genre at large, fed popular imagination through vehicles like the opera, and laid the foundations for a modernist theater of the absurd. Romantic Poetry demonstrates deep patterns and a sharing of crucial themes of the revolutionary age which underlie the lyrical

expression that flourished in so many languages and environments. Nonfictional Romantic Prose assists us in coping with the vast array of writings from the personal and intimate sphere to modes of public discourse, including Romanticism's own self-commentary in theoretical statements on the arts, society, life, the sciences, and more. Nor are the discursive dimensions of imaginative literature neglected in the closing volume, *Romantic Prose Fiction*, where the basic Romantic themes and story types (the romance, novel, novella, short story, and other narrative forms) are considered throughout Europe and the New World. This enormous realm is seen not just in terms of Romantic theorizing, but in the light of the impact of Romantic ideas and narration on later generations. As an aid to readers, the introduction to *Romantic Prose Fiction* explains the relationships among the volumes in the series and carries a listing of their tables of contents in an appendix. No other series exists comparable to these volumes which treat the entirety of Romanticism as a cultural happening across the whole breadth of the "Old" and "New" Worlds and thus render a complex picture of European spiritual strivings in the late eighteenth and the nineteenth centuries, a heritage still very close to our age. This book provides new insights into how Gothic Horror as a whole started, and encourages the reader to think of the relations between such books and films as one
