The world has many pressing problems. Thanks to the efforts of governments, NGOs, and individual activists there is no shortage of ideas for resolving them. However, even if all governments were willing to spend more money on solving

the problems, we cannot do it all at once. We have to prioritize; and in order to do this we need a better sense of the costs and benefits of each 'solution'. This book offers a rigorous overview of twenty-three of the world's biggest problems relating to the environment, governance, economics, and health and population. Leading economists provide a short survey of the analysis and sketch out policy solutions for which they provide cost-benefit ratios. A unique feature is the provision of freely downloadable software which allows readers to make their own cost-benefit calculations for spending money to make the world a better place.

The complete works of one of England's greatest Edwardian writers Saki is perhaps the most graceful spokesman for England's 'Golden Afternoon' - the slow and peaceful years before the First World War. Although, like so many of his generation, he died tragically young, in action on the Western Front, his reputation as a writer continued to grow long after his death. His work is humorous, satiric, supernatural, and macabre, highly individual, full of eccentric wit and unconventional situations. With his great gift as a social satirist of his contemporary upper-class Edwardian world, Saki is one of the few undisputed English masters of the short story and one of the great writers of a bygone era. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

In *How Jesus Became Christian*, Barrie Wilson asks "How did a young rabbi become the god of a religion he wouldn't recognize, one which was established through the use of calculated anti-Semitism?" Colourfully recreating the world of Jesus Christ, Wilson brings the answer to

life by looking at the rivalry between the "Jesus movement," informed by the teachings of Matthew and adhering to Torah worship, and the "Christ movement," headed by Paul, which shunned Torah. Wilson suggests that Paul's movement was not rooted in the teachings and sayings of the historical Jesus, but solely in Paul's mystical vision of Christ, a man Paul actually never met. He then shows how Paul established the new religion through anti-Semitic propaganda, which ultimately crushed the Jesus Movement. Sure to be controversial, this is an exciting, well-written popular religious history that cuts to the heart of the differences between Christianity and Judaism, to the origins of one of the world's great religions and, ultimately, to the question of who Jesus Christ really was – a Jew or a Christian.

The critical work examines the vampire as a spiritual figure--whether literal or metaphorical--analyzing how the use of the vampire in literature has served to convey both a human sense of alienation from the divine and a desire to overcome that alienation. While expressing isolation, the vampire also represents the transcendent agent through which individuals and societies must confront questions about innate good or evil, and belief in the divine and the afterlife. Textual experiences of the numinous in the form of the vampire propel the subject on a spiritual journey involving both psychological and religious qualities. Through this journey, the reader and the main character may begin to understand the value of their existence and the divine. A variety of works, poetry and fiction by British and American authors, is discussed, with particular concentration on

Coleridge's "The Rime of the Ancient Mariner," Bram Stoker's *Dracula*, and Anne Rice's *Vampire Chronicles*, as representative of the Romantic, Victorian, and late twentieth century periods of literature. A conclusion looks at the future of the literary vampire.

"A delightful and courageous tale and a romping good read. Voila!" —Mark Greenside, author of *I'll Never Be French (No Matter What I Do)* William Alexander is more than a Francophile. He wants to be French. There's one small obstacle though: he doesn't speak la langue française. In *Flirting with French*, Alexander sets out to conquer the language he loves. But will it love him back? Alexander eats, breathes, and sleeps French (even conjugating in his dreams). He travels to France, where mistranslations send him bicycling off in all sorts of wrong directions, and he nearly drowns in an immersion class in Provence, where, faced with the riddle of masculine breasts, feminine beards, and a turkey cutlet of uncertain gender, he starts to wonder whether he should've taken up golf instead of French. While playing hooky from grammar lessons and memory techniques, Alexander reports on the riotous workings of the Académie française, the four-hundred-year-old institution charged with keeping the language pure; explores the science of human communication, learning why it's harder for fifty-year-olds to learn a second language than it is for five-year-olds; and, frustrated

with his progress, explores an IBM research lab, where he trades barbs with a futuristic hand-held translator. Does he succeed in becoming fluent? Readers will be as surprised as Alexander is to discover that, in a fascinating twist, studying French may have had a far greater impact on his life than actually learning to speak it ever would. “A blend of passion and neuroscience, this literary love affair offers surprise insights into the human brain and the benefits of learning a second language. Reading William Alexander’s book is akin to having an MRI of the soul.” —Laura Shaine Cunningham, author of *Sleeping Arrangements*  
“Alexander proves that learning a new language is an adventure of its own--with all the unexpected obstacles, surprising breakthroughs and moments of sublime pleasure traveling brings.” —Julie Barlow, author of *Sixty Million Frenchmen Can’t Be Wrong*
