

## Dd 35 Races Of The Wild

Three years after American raceplanes failed dismally in the most important air race of 1920, a French magazine lamented that American “pilots have broken the records which we, here in France, considered as our own for so long.” The Pulitzer Trophy Air Races (1920 through 1925), endowed by the sons of publisher Joseph Pulitzer in his memory, brought about this remarkable turnaround. Pulitzer winning speeds increased from 157 to 249 mph, and Pulitzer racers, mounted on floats, twice won the most prestigious international air race—the Schneider Trophy Race for seaplanes. Airplanes, engines, propellers, and other equipment developed for the Pulitzers were sold domestically and internationally. More than a million spectators saw the Pulitzers; millions more read about them and watched them in newsreels. This, the first book about the Pulitzers, tells the story of businessmen, generals and admirals who saw racing as a way to drive aviation progress, designers and manufacturers who produced record-breaking racers, and dashing pilots who gave the races their public face. It emphasizes the roles played by the communities that hosted the races—Garden City (Long Island), Omaha, Detroit and Mt. Clemens, Michigan, St. Louis, and Dayton. The book concludes with an analysis of the Pulitzers’ importance and why they have languished in obscurity for so long.

The issue of social justice has been brought to the forefront of society within recent years, and educational institutions have become an integral part of this critical conversation. Classroom settings are expected to take part in the promotion of inclusive practices and the development of culturally proficient environments that provide equal and effective education for all students regardless of race, gender, socio-economic status, and disability, as well as from all walks of life. The scope of these practices finds itself rooted in curriculum, teacher preparation, teaching practices, and pedagogy in all educational environments. Diversity within school administrations, teachers, and students has led to the need for socially just practices to become the norm for the progression and advancement of education worldwide. In a modern society that is fighting for the equal treatment of all individuals, the classroom must be a topic of discussion as it stands as a root of the problem and can be a major step in the right direction moving forward. Research Anthology on Instilling Social Justice in the Classroom is a comprehensive reference source that provides an overview of social justice and its role in education ranging from concepts and theories for inclusivity, tools, and technologies for teaching diverse students, and the implications of having culturally competent and diverse classrooms. The chapters dive deeper into the curriculum choices, teaching theories, and student experience as teachers strive to instill social justice learning methods within their classrooms. These topics span a wide range of subjects from STEM to language arts, and within all types of climates: PK-12, higher education, online or in-person instruction, and classrooms across the globe. This book is ideal for in-service and preservice teachers, administrators, social justice researchers, practitioners, stakeholders, researchers, academicians, and students interested in how social justice is currently being implemented in all aspects of education.

To what extent is it possible to know the past or to know other cultures? Can one describe the past without imposing one's own cultural, political, social, or personal preconceptions? Testing the current skepticism that insists that it is impossible not to read one's own moment onto other times and cultures, the essays in this collection use the Victorian era as a means of developing a theory and critique of historical reclamation. In *Knowing the Past*, a distinguished group of Victorian scholars reflect on the Victorian past and examine the Victorians' own sophisticated contributions to debates about historical and cultural knowledge. Confronting, confirming, and opposing the skeptics, the essays provide close readings of particular texts. They encompass the larger constellation of ideas and questions that went into the making of the

texts while participating in larger theoretical debates about knowledge of the past and other cultures.

The Master of Seventh Avenue is the definitive biography of David Dubinsky (1892—1982), one of the most controversial and influential labor leaders in 20th-century America. A “character” in the truest sense of the word, Dubinsky was both revered and reviled, but never dull, conformist, or bound by convention. A Jewish labor radical, Dubinsky fled czarist Poland in 1910 and began his career as a garment worker and union agitator in New York City. He quickly rose through the ranks of the International Ladies’ Garment Workers’ Union (ILGWU) and became its president in 1932. Dubinsky led the ILGWU for thirty-four years, where he championed “social unionism,” which offered workers benefits ranging from health care to housing. Moving beyond the realm of the ILGWU, Dubinsky also played a leading role in the American Federation of Labor (AFL), particularly during World War II. A staunch anti-communist, Dubinsky worked tirelessly to rid the American labor movement of communists and fellow-travelers. Robert D. Parmet also chronicles Dubinsky’s influential role in local, national, and international politics. An extraordinary personality whose life and times present a fascinating lens into the American labor movement, Dubinsky leaps off the pages of this meticulously researched and vividly detailed biography.

Race for Empire offers a profound and challenging reinterpretation of nationalism, racism, and wartime mobilization during the Asia-Pacific war. In parallel case studies—of Japanese Americans mobilized to serve in the United States Army and of Koreans recruited or drafted into the Japanese military—T. Fujitani examines the U.S. and Japanese empires as they struggled to manage racialized populations while waging total war. Fujitani probes governmental policies and analyzes representations of these soldiers—on film, in literature, and in archival documents—to reveal how characteristics of racism, nationalism, capitalism, gender politics, and the family changed on both sides. He demonstrates that the United States and Japan became increasingly alike over the course of the war, perhaps most tellingly in their common attempts to disavow racism even as they reproduced it in new ways and forms.

Bringing together leading authorities, this volume synthesizes the breadth of current research on child and adolescent treatment into a practical handbook for students and clinicians. The book was inspired by the preeminent work on adult disorders, *Clinical Handbook of Psychological Disorders* (now in its fifth edition), edited by David H. Barlow. It provides a concise overview of the disorders most commonly encountered in clinical practice and details evidence-based treatment approaches, largely grounded in cognitive-behavioral therapy (CBT). Procedures for assessment, diagnosis, case

formulation, intervention, and progress monitoring are illustrated with rich extended case examples, including session transcripts. The book addresses nuts-and-bolts issues such as how to set up each session, what to cover, and how to broach difficult topics with children and parents. Moving boldly between literary analysis and political theory, contemporary and antebellum US culture, Arthur Riss invites readers to rethink prevailing accounts of the relationship between slavery, liberalism, and literary representation. Situating Nathaniel Hawthorne, Harriet Beecher Stowe, and Frederick Douglass at the center of antebellum debates over the person-hood of the slave, this 2006 book examines how a nation dedicated to the proposition that 'all men are created equal' formulates arguments both for and against race-based slavery. This revisionary argument promises to be unsettling for literary critics, political philosophers, historians of US slavery, as well as those interested in the link between literature and human rights.
