System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. Sin evaluación no existiría ni el éxito ni el fracaso escolar. Ambos calificativos son fruto de las valoraciones, intuiciones y técnicas que emplea el profesorado para evaluar y clasificar a sus alumnos y alumnas. En esta obra se describe el modo en que la escuela «fabrica» día a día los juicios y las jerarquías de excelencia escolar. Del análisis de los programas y de las reglas que gobiernan la evaluación el autor pasa a la descripción del trabajo cotidiano en las aulas y de aquellas cuestiones que son constantemente objeto de atención y que condicionan la evaluación del profesorado. Constata también que no se evalúa del mismo modo ni los mismos aspectos en cada asignatura, sino que se toman en consideración notas idiosincrásicas, a veces contradictorias y, en la mayoría de los casos, con pesos muy diferentes. ¿Cuáles son las

cuestiones y las reglas que guían la evaluación? ¿Cómo queda ésta incluida en el curriculum real? ¿Cuáles son los procedimientos, los instrumentos y las arbitrariedades de la evaluación? ¿Qué funciones tiene la evaluación dentro del sistema escolar? Estas son algunas de las preguntas fundamentales a las que el presente libro ofrece respuestas basadas en la cuidadosa observación de un gran número de aulas.

Daniel Goleman argues that our view of human intelligence is far too narrow, and that our emotions play major role in thought, decision making and individual success. Self-awareness, impulse control, persistence, motivation, empathy and social deftness are all qualities that mark people who excel: whose relationships flourish, who are stars in the workplace. With new insights into the brain

"Cyrulink has healed people and countries." (The Times, London) Renowned French neuropsychiatrist and psychoanalyst Boris Cyrulnik's parents were deported to a concentration camp during the Second World War.

They never returned. This early personal trauma at the age of five led Cyrulnik to his life's work helping individuals and countries come to terms with their pasts and forge ahead to create positive futures. It is his firm belief that trauma does not equal destiny-that, rather, we can find strength in the face of pain. Drawing on years of experience working around the globe with children who have been abused, orphaned, fought in wars and escaped genocide, Cyrulnik here tells many amazing and moving stories of individuals whose experiences prove that suffering, however appalling, can be the making of somebody rather than their destruction. This inspiring book teaches us that we can not only survive in the shadow of adversity-we can thrive.

Del cáñamo, o Cannabis sativa, se ha dicho que es el mejor aliado que tiene el hombre en el mundo vegetal. Se ha venerado como fuente de iluminación espiritual y sustento de la vida humana. Hasta hace poco, el asombroso pasado del cáñamo estaba prácticamente olvidado. En un tiempo estuvo en los cimientos de la economía de la civilización y apenas en el siglo XX se volvió ilegal. Pero ha regresado; Europa y Canadá; ya han levantando la prohibición del cultivar cáñamo industrial y lo han introducido al mercado en un asombroso despliegue de productos: desde jeans hasta playeras, bálsamo labial, papel no hecho de árbol, tablas de fibra y aislantes. Con la nueva tecnología, se puede hacer de cáñamo todo lo que se fabrica con petróleo, incluyendo pintura, plásticos y energía de biomasa. En esta guía amplia e ilustrada, Rowan Robinson muestra la historia oculta del cáñamo: examina su rol como primer cultivo de fibra, su papel en el hinduismo y en otras religiones, y su función como catalizador de la revolución cultural de los años 60. Robinson también expone los prejuicios que desencadenó y la histeria que ha venido provocando la marihuana durante los últimos 50 años. Robinson cita los estudios contemporáneos y la sabiduría antigua, y efectúa un amplio análisis de los usos alimenticios y medicinales del cáñamo, y su sorprendente potencial para resolver algunos de los más perturbadores problemas ambientales del mundo, como la erosión y la contaminación del suelo, o la deforestación. El gran libro del cannabis es una guía completa de la planta más extraordinaria del mundo.

Each year Americans start one million new businesses, nearly 80 percent of which fail within the first five years. try. This is the exact situation Mike Michalowicz found himself in when he was trying to grow his first company. Although it was making steady money, there was never very much left over and he was chasing customers left and right, putting in twenty-eight-hour days, eight days a week. The punishing grind never let up. His company was alive but stunted, and he was barely breathing. That's when he discovered an unlikely source of inspiration—pumpkin farmers. After reading an article about a local farmer who had dedicated his life to growing giant pumpkins, Michalowicz realized the same process could apply to growing a business. He tested the Pumpkin Plan on his own company and transformed it into a remarkable, multimillion-dollar industry leader. First he did it for himself. Then for others. And now you. So what is the Pumpkin Plan? Plant the right seeds: Don't waste time doing a bunch of different things just to please your customers. Instead, identify the thing you do better than anyone else and focus all of your attention, money, and time on figuring out how to grow your company doing it. Weed out the losers: In a pumpkin patch small, rotten pumpkins stunt the growth of the robust, healthy ones. The same is true of customers. Figure out which customers add the most value and provide the best opportunities for sustained growth. Then ditch the worst of the worst. Nurture the winners: Once you figure out who your best customers are, blow their minds with care. Discover their unfulfilled needs, innovate to make their wishes come true, and overdeliver on every single promise. Full of stories of other successful entrepreneurs, The Pumpkin Plan guides you through unconventional strategies to help you build a truly profitable blue-ribbon company that is the best in its field.

A menudo vemos cómo personas que consideramos muy inteligentes e incluso brillantes a nivel profesional se ven superadas por la incomprensión y la angustia cuando se trata de gestionar su propia vida. El resultado es siempre el sufrimiento y la soledad. La inteligencia emocional, ampliamente estudiada como indicador claro del potencial que tenemos para ser felices, deriva en la inteligencia romántica cuando de lo que se trata es de desarrollar actitudes y comportamientos orientados a construir una relación de pareja feliz y consolidada. De carácter eminentemente práctico y con una gran lucidez, este libro se centra en este aspecto concreto de la inteligencia y nos enseña a mejorar nuestra conciencia emocional, a ser honestos con nuestras emociones y aprender a luchar contra
