A sourcebook of initials and ornamental letters reproduces designs from the eighth century to the present

Russian Society and the Orthodox Church examines the Russian Orthodox Church's social and political role and its relationship to civil society in post-Communist Russia. It shows how Orthodox prelates, clergy and laity have shaped Russians' attitudes towards religious and ideological pluralism, which in turn have influenced the ways in which Russians understand civil society, including those of its features - pluralism and freedom of conscience - that are essential for a functioning democracy. It shows how the official church, including the Moscow Patriarchate, has impeded the development of civil society, while on the other hand the non-official church, including nonconformist clergy and lay activists, has promoted concepts central to civil society.

This brochure highlights a few examples of how the EU has implemented the CBD. It shows that concerted international action can be highly effective. A lot has been achieved, and this is something that we should be proud of. However, despite current efforts, biodiversity is continuing to be lost in Europe and in the world at large. This is therefore a time not only to take stock but to re-double our efforts.

Black Medea is Wesley Enoch's richly poetic adaptation of Euripides' Medea. Blending the cultures of Ancient Greek and Indigenous storytelling, Enoch weaves a commentary on contemporary Aboriginal experience.

A practical and philosophical book of therapy. "A stunning work! Not only is it a masterful summary of the works and lives of these two pioneers. . . but it points to new avenues of thought and experience".--Mayron Sharaf, Reich's biographer. (Philosophy/Psychology)

Culture, Literature and Migration gives us a unique insight into the emotional and physical experiences of immigrants. By shedding light on the challenges of the plight, the chapters in this book raise awareness of the global scale of the crisis and reduces hostility towards the displaced as a result of a better understanding of that which is often left unspoken of and unheard of. The distinctiveness of voluntary and involuntary immigration is brought forward and contextualized in order to emphasise the trauma of forced departure and the often forgotten psychological complications of the host nation. With such matters arising, there is an ultimate return to notions of hegemony, colonialism, otherness, hybridity and citizenship. New understandings of identity, nationalism and multiculturalism are explored in context of transnationalism and multiculturalism. Culture, Literature and Migration critically analyzes the transformation of the immigrant and highlights the importance of hope and the power of inclusiveness in a fragmented global environment. The international creation of typefaces after 1950 was decisively influenced by the Swiss type designer Adrian Frutiger. His Univers typeface and the machine-readable font OCR-B, which was adopted as an ISO standard, are milestones, as is his type for the Paris airports, which set new standards for signage types and evolved into the Frutiger typeface. With his corporate types, he helped to define the public profiles of companies such as the Japanese Shiseido line of cosmetics. In all he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research in France, England, Germany, and Switzerland, this publication provides a highly detailed and accurate account of the type designer’s artistic development. For the first time, all of his types – from the design phase to the marketing stage – are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture.

In Intelligence: The Creative Response to Now, one of the twentieth century’s greatest spiritual teachers reveals a different approach to thinking about our brainpower. In Intelligence, Osho challenges the common conception that the best way to promote intelligence is to train the intellect. Intellect is logical, he says; intelligence is paradoxical. Intellect takes things apart to see how they work; intelligence puts things together to see the functioning of the whole. Osho posits that when our education systems put too much emphasis on developing

intellect, an imbalance is created and both the individual and the society suffer. It is only through intelligence that we can respond creatively to the challenges of a changing world. By exploring the distinction between intellect and intelligence, Intelligence encourages readers to be more aware of how they approach problems—logical, emotional, and practical—and how they solve them. Osho challenges readers to examine and break free of the conditioned belief systems and prejudices that limit their capacity to enjoy life in all its richness. He has been described by the Sunday Times of London as one of the “1000 Makers of the 20th Century” and by Sunday Mid-Day (India) as one of the ten people—along with Gandhi, Nehru, and Buddha—who have changed the destiny of India. Since his death in 1990, the influence of his teachings continues to expand, reaching seekers of all ages in virtually every country of the world. EditBuild

This new edition of Perfect Daughters, a pivotal book in the ACoA movement, identifies what differentiates the adult daughters of alcoholics from other women. When this groundbreaking book first appeared over ten years ago, Dr. Ackerman identified behavior patterns shared by daughters of alcoholics. Adult daughters of alcoholics—"perfect daughters"—operate from a base of harsh and limiting views of themselves and the world. Having learned that they must function perfectly in order to avoid unpleasant situations, these women often assume responsibility for the failures of others. They are drawn to chemically dependent men and are more likely to become addicted themselves. More than just a text that identifies these behavior patterns, this book collects the thoughts, feelings and experiences of twelve hundred perfect daughters, offering readers an opportunity to explore their own life's dynamics and thereby heal and grow. This edition contains updated information throughout the text, and completely new material, including chapters on eating disorders and abuse letters from perfect daughters in various stages of recovery, and helpful, affirming suggestions from Dr. Ackerman at the end of every chapter. This book is essential for every one who found validation, hope, courage and support in the pages of the original Perfect Daughters, as well as new readers and every therapist who confronts these issues. Also includes: a comprehensive reference section and complete index.

A holistic and comprehensive overview of nutrition including Eastern and Western perspectives.

Making God Laugh follows one typical American family over the course of thirty years' worth of holidays. Starting in 1980, Ruthie and Bill's grown children -- a priest, an aspiring actress, and a former football star -- all return home, where we learn of their plans and dreams as they embark on their adult lives. The empty-nester parents contend with their own changes, too, as old family rituals are trotted out and ancient tensions flare up. As time passes, the family discovers that, despite what we may have in mind, we often arrive at unexpected destinations. Since the end of the Cold War, the Middle East has been the focus of various projects for the establishment of arms control (including CBMs) regimes. Whereas some of these projects were initiated at the global level, others were discussed and debated at the regional level. This book analyses the global and regional dynamics of arms control in the Middle East in the post-Cold War era. It examines American and European arms control projects, the contexts in which they were presented, the reactions of major regional actors, and their impacts on arms control efforts in the region. It assesses Arab perceptions of the motivations for and constraints on establishing arms control regimes. It also explores the prospects of regional arms control in the context of the ongoing Arab Spring with its ramifications for Arab regional politics, and provides a new perspective on arms control in the Middle East. This volume enriches the ongoing

discourse, which to date has been dominated by mainly Western perspectives.
