Almost all organisations today face unprecedented levels of change, complexity and volatility. Navigating the resultant disruption dynamics is one of the most important stewardship challenges facing strategic leaders. Getting it right can pay enormous dividends, but getting it wrong can lead to spectacular failure and the ultimate demise of once admired organisations. To address this threat, strategic leaders need to better understand how to navigate complexity and volatility and how to execute strategy in this rapidly changing environment. This book identifies 12 different strategy execution processes used to realise deliberate and emergent strategies – each illustrated with case studies and essential lessons for strategic leaders. The authors then discuss the effectiveness of these processes in different types of complex environments, showing how, used in isolation, each process can, at times, impede performance, sometimes creating survival risks that materialise today or in the future. The authors show the importance of "ambidexterity" and the need for organisations to balance the pursuit of internal efficiency and external market flexibility, both of which are essential to thriving in complex environments. This book provides essential tools for leaders to rethink

and reconfigure their strategy execution practices in light of the significant change surrounding their organisations. The book is based on a 5-year, multistage study comprehensively reviewing cutting-edge research on strategy execution, reviewing seminal texts on strategy execution and, through in-depth case study interviews and cross-sectional surveys, identifying contemporary strategy execution practices of a range of different organisations across industries and sectors.

Today Sunday morning worship competes with youth soccer, Starbucks, Facebook, and the allure of being “spiritual but not religious.” To share the gospel in a world like this, Christians need to reach beyond the boundaries of concrete and virtual communities to become evangelists. That takes faith. It also

requires skill with public relations, social media, traditional print materials and other techniques to increase church visibility. The authors, both recognized experts and consultants, walk readers through the theology of church communications and introduce steps to help us deliver clutter-busting messages to reach our technologically sophisticated and faith-challenged world.

"So while the assumption when I was born was that I was or would grow up to be a neurotypical heterosexual boy, that whole idea didn't really pan out long term." In this candid, first-of-its-kind memoir, Laura Kate Dale recounts what life is like growing up as a gay trans woman on the autism spectrum. From struggling with sensory processing, managing socially demanding situations and learning social cues and feminine presentation, through to coming out as trans during an autistic meltdown, Laura draws on her personal experiences from life prior to transition and diagnosis, and moving on to the years of self-discovery, to give a unique insight into the nuances of sexuality, gender and autism, and how they intersect. Charting the ups and downs of being autistic and on the LGBT spectrum with searing honesty and humour, this is an empowering, life-affirming read for anyone who's felt they don't fit in.

Designed for teaching astrophysics to physics students at advanced undergraduate or beginning graduate level, this textbook also provides an overview of astrophysics for astrophysics graduate students, before they delve into more specialized volumes.

Assuming background knowledge at the level of a physics major, the textbook develops astrophysics from the basics without requiring any previous study in astronomy or astrophysics. Physical concepts, mathematical derivations and observational data are combined in a balanced way to provide a unified treatment. Topics such as general relativity and plasma physics, which are not usually covered in physics courses but used extensively in astrophysics, are developed from first principles. While the emphasis is on developing the fundamentals thoroughly, recent important discoveries are highlighted at every stage.

In this lavishly illustrated and arresting study, Warwick Ball presents the story of Rome's overwhelming fascination with the East through a coverage of the historical, architectural and archaeological evidence unparalleled in both breadth and detail. This was a fascination of the new world for the old, and of the mundane for the exotic - a love affair that took literal form in the story of Antony and Cleopatra. From Rome's legendary foundation by Aeneas and the Trojan heroes as the New Troy, through the installation of Arabs as Roman emperors, to the eventual foundation of the new Rome by a latter-day Aeneas at Constantinople, the East took over Rome, - and Rome eventually ditched Europe to the barbarians. Rome in the East overturns the received wisdom about Rome as the bastion of European culture. Newly available in paperback, and illustrated with almost 300 photographs, plans and drawings, its accessible and comprehensive approach makes it an ideal resource for both the academic and general reader.
