This exciting, contemporary approach to World Regional Geography acknowledges the geographic changes that accompany today's rapid rate of globalization. The authors' unique approach gives you access to the latest ideas, concepts and theories in geography while also developing a strong foundation in the fundamentals of world regions, including a strong sense of place and an understanding of the connections within and between world regions. Globalization and Diversity is a briefer version of the popular Diversity Amid Globalization by the same authors.

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, New York Review of Books) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and ventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, Guns, Germs, and Steel chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal.

This timely interdisciplinary book considers national identity through the lens of urban spaces. By bringing together scholars from a range of disciplines, The City as Power provides broad comparative perspectives about the critical importance of urban landscapes as forums for creating, maintaining, and contesting identity and belonging.

The authors maintain that regions are the outcomes of a set of twin forces of globalization and regionalization. Therefore, each regional chapter stresses the global systems of connection that drive unique regional processes, making regions different. By studying regions, students not only learn the critical elements of different places, but also come to understand the fundamental processes that drive change. The Fifth Edition discusses geographies of emerging regions, incorporates cutting-edge data visualizations and infographics, including Quick Response codes linking to online media, features a completely modernized cartography program, and much more.

"A damning denunciation of things as they are, and a platform for how we can do better."—Andrew Leonard, Salon Building on the international bestseller Globalization and Its Discontents, Joseph E. Stiglitz offers here an agenda of inventive solutions to our most pressing economic, social, and environmental challenges, with each proposal guided by the fundamental insight that economic globalization continues to outpace both the political structures and the moral sensitivity required to ensure a just and sustainable world. As economic interdependence continues to gather the peoples of the world into a single community, it brings with it the need to think and act globally. This trenchant, intellectually powerful, and inspiring book is an invaluable step in that process.

This exciting contemporary approach to World Regional Geography introduces the latest ideas, concepts, and theories in geography while also developing a strong foundation in the fundamentals of world regions. It helps professors convey a strong sense of place and an understanding of the connections within and between world regions. Globalization and Diversity is a briefer version of the popular Diversity Amid Globalization by the same authors; this distillation focuses on the core materials that students need in a World Regional Geography course. The Fourth Edition features a new and unique focus on sustainability.

For a century, economists have driven forward the cause of globalization in financial institutions, labour markets, and trade. Yet there have been consistent warning signs that a global economy and free trade might not always be advantageous. Where are the pressure points? What could be done about them? Dani Rodrik examines the back-story from its seventeenth-century origins through the milestones of the gold standard, the Bretton Woods Agreement, and the Washington Consensus, to the present day. Although economic globalization has enabled unprecedented levels of prosperity in advanced countries and has been a boon to hundreds of millions of poor workers in China and elsewhere in Asia, it is a concept that rests on shaky pillars, he contends. Its long-term sustainability is not a given. The heart of Rodrik's argument is a fundamental 'trilemma': that we cannot simultaneously pursue democracy, national self-determination, and economic globalization. Give too much power to governments, and you have protectionism. Give markets too much freedom, and you have an unstable world economy with little social and political support from those it is supposed to help. Rodrik argues for smart globalization, not maximum globalization.

Rarely, if ever, have business schools experienced change as far-reaching and powerful as during the current wave of globalization. Understanding these changes, and their implications, was the charge given to an AACSB Task Force on Globalization of Management Education. In this comprehensive report, the Task Force explores broad globalization trends in management education that command the attention of any individual or institution striving to navigate in today's environment. Then, by exploring individual business school strategies, it provides valuable insights into how business schools can and should respond. The report aims to encourage and guide business schools to embrace globalization in ways that are mission-appropriate, manageable given available resources, and meaningful to the stakeholders being served. For organizations serving business schools, it will be a catalyst for action that elevates and improves business schools' capabilities. Readers will be left with the conviction that great opportunities exist for business schools to move from keeping pace with the sweeping changes of globalization, to leading the way.

This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

This book explains not only why the world isn't flat but also the patterns that govern cross-border interactions.

Globalisation is apparent in increased flows of objects, people and ideas and in the creation of translocal consciousness in everyday life. Based on these criteria, there is a case for globalisation in the ancient Roman world. Essential for anyone interested in Romanisation, this volume provides the first sustained critical exploration of globalisation theories in Roman archaeology and history. It is written by an international group of scholars who address a broad range of subjects, including Roman imperialism, economics, consumption, urbanism, migration, visual culture and heritage. The contributors explore the implications of understanding material culture in an interconnected Roman world, highlighting several novel directions for future research.

This reference work delivers an interdisciplinary, applied spatial and geographical approach to the study of languages and linguistics. This work includes chapters and sections related to language origins, diffusion, conflicts, policies, education/instruction, representation, technology, regions, and mapping. Also addressed is the mapping of languages and linguistic diversity, on language in the context of politics, on the relevance of language to cultural identity, on language minorities and endangered languages, and also on language and the arts and non-human language and communication. This reference work looks at the subject matter and contributors to the disciplines and programs in the social sciences and humanities, and the dearth of materials on languages and linguistics. The topics covered are not only discipline-centered, but in the cutting-edge fields that intersect several disciplines and also cut across the social sciences and humanities. These include gender studies, sustainability and development, technology and social media impacts, law and human rights, climate change, public health and epidemiology, architecture, religion, visual representation and mapping. These new and emerging research directions and other intersecting fields are not traditionally discipline-bounded, but cut across numerous fields. The volumes will appeal to those within existing fields and disciplines and those working the intersections at local, regional and global scales.

Immigration today touches the lives and economies of more people and places than ever before. Yet the places that are disproportionately affected by immigrant flows are not countries but cities. This remarkable collection examines contemporary global immigration trends and their profound effect on specific host cities. The book focuses not only on cities with long-established diverse populations, such as New York, Toronto, and Sydney, but also on less known gateway cities, such as Birmingham (UK), Marseille, and the emerging gateways of Johannesburg, Washington, D.C., and Dublin. The essays gathered here provide a global portrait of accelerating, worldwide immigration driven by income differentials, social networks, and various state policies that recruit skilled and unskilled laborers. Gateway cities vary in form and function but many are hyperdiverse, globally linked through transnational networks, and often increasingly segregated spaces. Offering penetrating analysis by the leading scholars in the field, *Migrants to the Metropolis* redirects the global narrative surrounding migration away from states and borders and into cities, where the vast majority of economic migrants settle.

Great is no longer good enough. Beyond Great delivers a powerful new playbook of 9 core strategies to thrive in a post-COVID world where all the rules of the game are being re-written. Beyond Great answers to two fundamental questions which face business leaders today in a world shaped by daunting and disruptive technological, economic, and social change. First, what is outstanding performance in this new volatile era? Second, how do we build competitive advantage in a world with new and often uncertain rules? Supported by years of research and hands-on consulting practice, this book presents a comprehensive framework for building a high performing, resilient, adaptive, and socially responsible global company. The book begins by taking an incisive look at these disruptive forces transforming globalization, including economic nationalism; the boom in data flows and digital commerce; the rise of China; heightened public concerns about capitalism and the environment; and the emergence of borderless communities of digitally connected consumers. Distilled from the study of hundreds of companies and interviews with dozens of business leaders, the authors have distilled nine core strategies – the new winning playbook of the 21st century. Beyond Great argues that business leaders today must lead with a new kind of openness, flexibility and light-footedness, constantly layering in new strategies and operational norms atop existing ones to allow for "always-on" transformation. Leaders must master a whole new set of rules about what it takes to be "global," becoming shapeshifters adept at handling contradiction, multiplicity, and nuance. This book will show them how.
