Are you stuck in an underwater home you want to sell? What are your options when you can afford your home but don't have the equity needed to sell it? Where's your bailout? Attempting a short sale, walking away, begging for a loan modification or principal reduction on your mortgage seem to be the only options available to underwater homeowners. Are you tired of waiting for the government and Wall Street to solve your negative equity problem? It's time to create your own housing bailout! The Underwater Social walks you through the Nine Critical Steps responsible underwater homeowners need to take to build equity quickly and position themselves for a successful home sale sooner rather than later! The Underwater Social was written by Paul C Aspelin for the millions of homeowners who are living within their means and paying their mortgages on time each and every month and need or want to sell their homes but cannot because of a negative equity (underwater) situation. The equity in your home has eroded over the last few years due to no fault of your own, and you have no idea where to turn for answers. Are you stuck wondering how a simple home purchase could have created such a financial mess for your family? You're not alone. It seems as though everyone around you is getting a bailout while you continue to do the responsible thing and are expected to sit back and wait for your home equity to return. Many of you may be thinking of attempting a short sale or even considering a strategic mortgage default, which is to simply walk away from your

home and its future mortgage obligations, even though you can financially afford to make all payments. Saving your credit rating, fear of failure, and/or the morality issues involved in these decisions are the only things keeping you in your underwater home. Have you been turned down for a mortgage modification or principal reduction? Or unsuccessfully tried to sell your home in the past few years, only to realize you couldn't afford to drop your price low enough to compete with the growing inventory of foreclosed and short sale homes? If you answered yes to these questions, this book provides a solution for you. Find out whether sitting back and waiting or renting out your home until the market rebounds is really the best long-term strategy. Learn why the housing bubble happened in the first place and how the housing crisis suddenly shifted from affecting those who were in over their heads to those who became casualties of the downturn. Discover what's looming ahead for the housing market and how quickly your home could start to appreciate. You'll be shocked to find out how long you may have to wait for home prices to rebound to pre-bubble values. This book breaks new ground with a powerful take-charge process, an easy-to-follow, step-by-step game plan that incorporates the help of industry professionals while using a simple online system the banks pray you never find out about. You'll find out exactly what's involved in order to position yourself for a future home sale without financial hardship or ruined credit. Learning to execute a responsible plan of action to rebuild your home equity without drastically changing your current spending habits will change your underwater housing circumstances and the way you look at home ownership forever. The government has labeled you a mere casualty of the housing crisis, but to me, you're an underwater homeowner looking for a real solution. Now you have it in the Underwater Social! ?"Ray Dalio's book is must reading for anyone who aspires to prevent or manage through the next financial crisis." - Larry Summers
"A terrific piece of work from one of the world's top investors who has devoted his life to understanding markets and demonstrated that understanding by navigating the 2008 financial crisis well." - Hank Paulson
"An outstanding history of financial crises, including the devastating crisis of 2008, with a very valuable framework for understanding why the engine of the financial system occasionally breaks down, and what types of policy actions by central banks and governments are necessary to resolve systemic financial crises. This should serve as a play book for future policy makers, with practical guidance about what to do and what not to do." - Tim Geithner
"Dalio's approach, as in his investment management, is to synthesize information, and

to convert a sprawling and multi-faceted issue into a clear-cut process of cause and effect. Critically, he simplifies without over-simplifying." - Financial Times For the 10th anniversary of the 2008 financial crisis, one of the world's most successful investors, Ray Dalio, shares his unique template for how debt crises work and principles for dealing with them well. This template allowed his firm, Bridgewater Associates, to anticipate events and navigate them well while others struggled badly. As he explained in his #1 New York Times Bestseller, Principles: Life & Work, Dalio believes that most everything happens over and over again through time so that by studying their patterns one can understand the cause-effect relationships behind them and develop principles for dealing with them well. In this 3-part research series, he does that for big debt crises and shares his template in the hopes reducing the chances of big debt crises happening and helping them be better managed in the future. The template comes in three parts:: 1) The Archetypal Big Debt Cycle (which explains the template), 2) 3 Detailed Cases (which examines in depth the 2008 financial crisis, the 1930's Great Depression, and the 1920's inflationary depression of Germany's Weimar Republic), and 3) Compendium of 48 Cases (which is a compendium of charts and brief descriptions of the worst debt crises of the last 100 years). Whether you're an investor, a policy maker, or are simply interested, the unconventional perspective of one of the few people who navigated the crises successfully, Principles for Navigating Big Debt Crises will help you understand the economy and markets in revealing new ways.

Entrepreneurship, personal responsibility, and upward mobility: These traditions are at the heart of the free enterprise system, and have long been central to America's exceptional culture. In recent years, however, policymakers have dramatically weakened these traditions—by exploding the size of government, propping up their corporate cronies, and trying to reorient our system from rewarding merit to redistributing wealth. In *The Road to Freedom*, American Enterprise Institute President Arthur C. Brooks shows that this trend cannot be reversed through materialistic appeals about the economic efficiency of capitalism. Rather, free enterprise requires a moral defense rooted in the ideals of earned success, equality of opportunity, charity, and basic fairness. Brooks builds this defense and demonstrates how it is central to understanding the major policy issues facing America today. The future of the free enterprise system has become a central issue in our national debate, and Brooks offers a practical manual for defending it over the coming years. Both a moral manifesto and a prescription for concrete policy changes, *The Road to Freedom* will help Americans in all walks of life translate the philosophy of free enterprise into action, to restore both our nation's greatness and our own well-being in the process.

When Andrew Jackson was sworn in as President of the United States, he had come directly from his wife's funeral. His beloved Rachel had passed on Christmas Eve. Now a grieving widower with decades of public service behind him, he wished nothing more than to retire by his wife's grave until the wet earth would welcome him beside her. But thirty years before the Civil War, the southern states were preparing the road to secession. In Jackson's eyes, they were committing treason and none but he was strong enough to hold the nation together. Amid these crises of politics and spirit, Jackson is lost in a mountain storm and trapped across a flooded river, in a small Appalachian town. There, with a week's growth of beard and no Presidential finery, he enjoys his first taste of anonymity in forty years. As "Jack Andrews," he falls in love with Julie Spring, a beautiful, Kentucky widow with a young son, and finds his spirit renewed. Likewise, resigned to a life of toil and loneliness after the loss of her husband, Julie sees hope in the tall, charismatic and commanding figure whom she does not know is the hero of New Orleans, and President of the United States.

Unfortunately, a last chance at happiness for both Julia Spring and Andrew Jackson, will be set directly against the President's ability to save a young Union from Civil War. In a blending of history and fiction, "A Full Measure of Happiness" reads like a novel of its time, dramatic, romantic and

Once Upon a Car is the fascinating epic story of the rise, fall, and rebirth of the Big Three U.S. automakers, General Motors, Ford, and Chrysler. Written by Bill Vlasic, the Detroit bureau chief for the New York Times and acclaimed author of Taken for a Ride, this eye-opening, richly anecdotal work is more than a riveting and insightful business history. It offers a clear-eyed view of the present day automobile industry and of Detroit, the city that spawned it, going far beyond the corporate and federal maneuverings to explore the impact the car companies' failures have had on the overall economy, and more importantly what they have done to people's lives. Relevant and thought-provoking, Once Upon a Car is an unforgettable journey deep inside this quintessentially American industry.

"Eat Moon Food. Drink Moon Water. Breathe Moon Air." More than a century after the establishment of a Lunar Mining Colony, the inhabitants of this desolate planet are no longer just miners. They are a full civilization of families living in a dangerous environment with no natural resources, neither food nor water nor air, but lacking only one true necessity in their lives: freedom. Picking up where "Breathe Moon Air. Part 1: Rebellion" left off, a massive fleet of warships leaves the Earth to occupy the Lunar Colony and prevent all shipments of food, supplies, and precious water from reaching the Moon. Without water the Colony's plant crops will die; without green plants, the air supply will dwindle. Without air, the people of the Moon cannot survive. Facing an armed armada from Earth, Hampton Stoddard and J.T. Goodwin rally the inspired people of the Moon to repel their invaders. While Goodwin leads troops to secure the Southern ice mines to preserve a source of water, Ham leads an impossible mission across the surface of the Moon to destroy the Earth's ships before they can occupy the Colony. Tragically, it is not only the formidable strength of their opponent but the natural dangers of their own home, the desolate Moon, that will be

their most dangerous challenge. Knowing that the Moon will never again be so close to freedom, Ham looks to Selena Mantiga, and her love, to find the courage he needs to lead the Moon to victory. Freedom for the Moon, however, will require more than battle and more than politics. The secret to freedom is a mystery, buried for decades where Hampton Stoddard survived a cave-in without atmosphere and without air, deep beneath the surface of the Moon, in the conclusion of Kenneth Golde's epic, Lunar adventure, "Breathe Moon Air. Part 2: Revolution." Kenneth Golde is the author of two fiction novels, the "Breathe Moon Air" Series and "A Full Measure of Happiness," as well as the non-fiction "The Do-It-Yourself Bailout," the definitive guide to credit card debt settlement. He is also a professional screenwriter who has adapted classic Sci-Fi to film for Hollywood studios, including the Isaac Asimov novel "The End of Eternity," and Richard K. Morgan's "Thirteen."

An engaging look at what led to the financial turmoil we now find ourselves in Bailout Nation offers one of the clearest looks at the financial lenders, regulators, and politicians responsible for the financial crisis of 2008. Written by Barry Ritholtz, one of today's most popular economic bloggers and a well-established industry pundit, this book skillfully explores how the United States evolved from a rugged independent nation to a soft Bailout Nation-where financial firms are allowed to self-regulate in good times, but are bailed out by taxpayers in bad times. Entertaining and informative, this book clearly shows you how years of trying to control the economy with easy money has finally caught up with the federal government and how its practice of repeatedly rescuing Wall Street has come back to bite them. The definitive book on the financial crisis of 2008 Names the culprits responsible for this tragedy-from financial regulators to politicians Shows how each bailout throughout modern

In *When Giants Fall*, Panzner makes his case for the turbulent economic changes that will be occurring over the next few years and examines the resulting economic opportunities. According to Panzner, the economic changes will be widespread. Businesses will struggle amid wars, shortages, logistical disruptions, and a breakdown of the established monetary order.

Individuals will be forced to rethink livelihoods, lifestyles, living arrangements, and locales. Political structures will be in flux, as local leaders gain influence at the expense of national authorities. For many people, it will be nothing short of a modern Dark Ages, where each day brings fresh anxieties, unfamiliar risks, and a sense of foreboding. However, for those enlightened few who understand what is really going on and what happens next, the chaotic years ahead represent the opportunity of a lifetime - a time when they can realize goals they never thought possible and achieve a level of wealth, security, and inner peace that will leave them head-and-shoulders above everyone else. In this book, Panzner offers cutting-edge insights and strategies that will enable readers to stay well ahead of the game during the uniquely unsettling period ahead.

Owner of the nation's largest tax-resolution firm and a new tax-preparation franchise, Deutch knows the IRS has no problems taking advantage of taxpayers who might be uninformed about tax laws or who are unable to pay due to financial troubles. And the IRS pressure is only going to get worse. With almost \$2 trillion in government bailout money approved by Congress for 2008 and 2009 in addition to a hefty stimulus package, you better believe Uncle Sam has no intention of being stuck with the tab. So how is the government going to get that money? Through taxes, of course, and the IRS is going to audit people at unprecedented rates. And they are going to raise the rates on existing taxes to historically high levels. If you're behind on your taxes, the government is coming after you. Millions of Americans may be down on their luck and hurting financially, but the IRS, whose sole purpose is to confiscate the assets of American taxpayers, will seek you out, regardless of your ability to pay. It's up to you to protect yourself, and that's where the Tax Lady comes in. Deutch identifies what the IRS can do to you if you fall behind on your taxes - wage garnishments, tax levies and liens, interest and penalties, and ruined credit - and how you can prevent these things from happening or fight back if they do. In the book; Why your taxes are going to rise in this economy Steps to avoid getting yourself into back taxes Your options when confronted by the IRS When to file

"Eat Moon Food. Drink Moon Water. Breathe Moon Air."

That is the mantra of the Moon. But more than a century after the establishment of a Lunar Mining Colony, the inhabitants of this isolated planet are no longer just miners.

They are a full civilization of families living in a dangerous environment with no natural resources, neither food nor water nor air, but are lacking only one true necessity in their lives: freedom. These people are still ruled by the Earth. Hampton Stoddard is an ore miner, one of the toughened men of the Moon who risks his life to dig the powerful energy source that Earth relies upon. When a cave-in deep beneath the great mine, Apollo Main, nearly kills him, Ham is catapulted to the status of hero on the Moon, and criminal on Earth.

Together with J.T. Goodwin, the General Supervisor of

all the miners on the Moon, Ham leads a strike, frightening the Earth that the export of essential Moon Ore will stop. Escobar Mantiga, the owner of the Lunar ore mines, enjoys unequalled power on Earth. Entire nations pay homage to the man who owns the sole source of the world's energy: Moon Ore. Furious that the "Lunies" have defied him, Mantiga exerts his influence to send armed troops to the Moon to arrest Stoddard and Goodwin and put an immediate end to the strike. Selena Mantiga, Escobar's beautiful and withdrawn sister, does not share her brother's hardened attitude toward the people of the Moon. She visits the strike at Apollo Main, expecting to meet with Goodwin, but instead finds Hampton Stoddard, whose attraction to Selena is instant and unmitigated, both enticing and alarming her. Ultimately, their love will change the future of both Earth and Moon. Now fugitives in their own homeland, Stoddard and Goodwin will lead the people of the Moon in what begins as a mining strike and becomes a Rebellion, in Part 1 of Kenneth Golde's epic, Lunar adventure series, "Breath Moon Air." Kenneth Golde has written two fiction novels, "Apollo Main" and "A Full Measure of Happiness," also available on Kindle, as well as the non-fiction "The Do-It-Yourself Bailout," the definitive guide to credit card debt settlement. He is also a professional screenwriter who has worked for Hollywood studios adapting classic Sci-Fi for film, such as Isaac Asimov's "The End of Eternity" and Richard K. Morgan's "Thirteen."
