The Doberman Pinscher: Brains and Beauty gives potential owners, new converts and veteran Doberman lovers all they need to know about this strong but sensitive companion. There are chapters on the Doberman's history, buying a dog, grooming, temperament, understanding the breed standard, breeding, health concerns and more. Dog shows, obedience competitions and all the activities Dobermans can participate in are discussed. Five appendices include useful resources and top dogs in the breed. Howell Best of Breed Library

A rebellious pup makes life challenging for his parents in this heartwarming and hilarious story for young readers, beautifully illustrated in bold and brilliant color. ABOUT THE BOOK Doberman Pinschers have a reputation. They are alert watchdogs, fearless war-dogs and loyal protectors of their owners. Karl Lewis Dobermann envisioned a faithful and steadfast companion when he developed the breed in the 19th century. There is no historical record of the various breeds that helped comprise the Doberman's genetic mix, but many speculate that the Doberman is a product of breeds such as the Manchester Terrier, the greyhound, the Weimaraner, and the Rottweiler. The dogs were bred to optimize quick reaction time, speed, power, and ferocity. This has helped to influence the

reputation that has followed the Doberman Pinscher over the years. The breed has been repeatedly, and often unfairly, saddled with a reputation for being vicious and untrustworthy. The reputation is largely a product of exaggeration in the media and fear-mongering. Any claims regarding the Doberman Pinscher viciousness have been mitigated by the fact that breeders have worked to eliminate extraordinary aggression from the breeding pool in recent years. The modern American Doberman Pinscher is considerably less ferocious than its ancestors. MEET THE AUTHOR Pauline T. is an experienced writer and a member of the Hyperink Team, which works hard to bring you high-quality, engaging, fun content. Happy reading! EXCERPT FROM THE BOOK The Doberman Pinscher is often described as a "medium-sized" breed, but this description depends on an one's frame of reference. The standard height of the breed is roughly 28 inches. They typically weigh between 70 and a 100 pounds. The Dobermans long, lanky legs also tend to give an illusion of even greater size. Many consider Dobermans to be a rather large dog. The most unique aspects of the breeds appearance are their cropped ear and docked tail. The pointed, erect ears of the Doberman symbolise the its power and predatory skills. Pointed ears aid the canine in hunting and stalking its prey. Breeders have maintained the Dobermans natural predatory traits, while domesticating the breed and

familiarizing the breed with humans. Cropping the ears involves cutting away the outer parts of the ear, and then using a technique called "posting" which causes them to stand erect. While not presently illegal in the United States, the process of cropping ears and docking tails is against the law in many countries around the world. The dog's reputation as an attack dog, combined with its look, provide a unique, distinctive appearance that seems to signal the breed's willingness and ability to protect its home and family. Introduces the history of the doberman pinscher breed, its distinctive behaviors, and the best way to train this breed.

This book provides you with a thorough description and positive attributes of this breed including origin, purpose, history, normal heights and weights, acceptable colors and behavioral traits. Our books differ from most books on dog breeds because this book also provides you with a comprehensive and authoritative source of all the known predisposed hereditary health syndromes for the breed. You will find extensive references for each problem described. We also provide the breed club address for this breed and a list of laboratories and organizations that can provide professional help and information. As a small animal veterinarian, I have always been intrigued by the way dogs have been bred to fill a purpose in life and further impressed that they also tend to love performing that service. Greyhounds and other sight hounds are built for speed with aerodynamic bodies consisting of small head, deep chest, narrow waist and large leg muscles. On the other hand Dachshunds take their name from German words meaning "badger dog" and they use their long nose, long body and short legs to both track, enter and dig into badger dens. After developing a practice that catered to clients

with show dogs, my interest in each breed continued to grow as I studied and observed more and more about the unique predisposition and incidence of health problems in each breed. Breeders of purebred dogs for show were a challenge and inspirational for me to research and help them with their unique health problems. Historically references to hereditary problems are scattered throughout various Veterinary medical texts and journals such as ophthalmology, neurology, gastroenterology, cardiovascular and dermatology. This book, as well as the other books and articles I have written, is researched and compiled with the intention to provide both veterinarians and dog owners with comprehensive and authoritative predisposition information under the breed name. At the date of this publication, The American Kennel Club Canine Health Foundation and the The Kennel Club of England reports over 400 known hereditary health syndromes throughout the dog kingdom. At the writing of my first book in 1983, less than 50 hereditary issues are able to be predicted and or diagnosed. Sequencing of the canine genome, DNA tests, metabolic testing including blood tests and urine testing; plus, phenotypic examinations such as radiographs, ultrasound, and CERF or OFA eye registry exams by a Board Certified Veterinary Ophthalmologist have advanced the science of breed related health and behavioral problems. This book will provide veterinarians, researchers, pet owners and breeders with a comprehensive guide to all the known problems veterinarians and dog owners should consider during pet selection and throughout each life stage of our canine friends.

The Doberman pinscher has a long head and a sleek, muscular body. The ears are often cropped to stand erect, and the tail is usually docked short. The Doberman pinscher has a short, sleek and shiny coat that is black, dark red, blue or fawn with rust-colored markings on the face, body and tail. This dog is an average shedder and requires minimal grooming. Dobermans live about 10 to 12 years. Doberman pinschers are considered people-oriented dogs that are affectionate and sweet with people, if socialized and trained properly. They are loyal to their owners and are good with children if raised with them; however, some Dobermans bond only to one person. Doberman pinschers are powerful, energetic dogs that need lots of exercise. If they are not exercised, they are more likely to become irritable or even aggressive. They can adjust well to apartment living if exercised daily. Careful socialization and obedience training from a young age are essential for this breed. Doberman pinschers respond very well to positive reinforcement. No special guard training is needed for anyone who wants a good family protector. In fact, Doberman pinscher experts often advise against special guard training, which could result in over-guarding and aggression. Do you know that that Doberman Pinschers need to have their owner be their guide and in command? And do you know that the size alone of Doberman Pinschers acts as a deterrent for most burglars? It is sometimes difficult to make our children understand the beauty of nature, to make them appreciate the small things, the beauty of a flower, the freshness of the air, the scent of grass. Many times we are not fortunate to be in contact with nature, far from a meadow, closed in the cities. Still, so often, while looking out from our balcony in a beautiful country house, we know how to observe but do not appreciate creation's beauty. Know the details and habits of a dog as common as it is surprising, through a simple path, which fuels your child's interest and curiosity. That's the purpose of this book. But beware, prepare for the challenge! You will have to be able to answer the questions that your child will ask you by showing off their deep knowledge in the microworld of the Doberman Pinscher: -Mom, do you know what the other names Doberman Pinschers are called? I do! -Hey dad, do you know where Doberman Pinschers came from? I do! -Grandpa, do you know why Doberman Pinschers need to be an inside dog? I do! -Grandma, do you know what the average height of a Doberman Pinscher is? I do! -Sarah, you're my big sister, and you've studied a lot, but I bet you don't know what the standard colors of a Doberman Pinscher is! I know that. You don't need anything else; just one click on "Buy Now," and you will let your child live a magical new adventure with his new friend Doberman Pinscher and the magic natural world of dogs.

As much a favorite in the United States as it is in its native Germany, the Doberman Pinscher remains one of the world's most recognizable guardian breeds. Prized for versatility, intelligence, and sleek good looks, the Doberman excels in various forums, including dog shows, working trials, military and police work, assistance dog roles for the blind and deaf, and therapy work. As the history chapter depicts, the Doberman Pinscher was the brain child of Herr Louis Dobermann, who needed a protection dog to accompany him on his rounds as a tax collector. That the breed's history only goes back to the mid-1830s makes the Doberman Pinscher a fairly new breed to come into the world of purebred dogs. A powerful and stanch protection breed, the Doberman is not a dog for everyone, as author Lou-Ann Cloidt explains in the chapter on characteristics. If a potential owner understands the demands and requirements of this breed, in terms of training, exercise, socialization, and so forth, and still believes that he or she will make a qualified, responsible owner, then this Comprehensive Owner's Guide provides all the information a he or she wants and needs to become the best possible owner of a Doberman Pinscher. New owners will welcome the well-prepared chapter on finding a reputable breeder and selecting a healthy, sound puppy. Chapters on puppy-proofing the home and yard, purchasing the right supplies for the puppy as well as house-training, feeding, exercise, and grooming are illustrated with photographs of handsome adults and puppies. In all, there are over 135 full-color photographs in this useful and reliable volume. The author's advice on obedience training will help the

reader better mold and train into the most well-mannered dog in the neighborhood. The extensive and lavishly illustrated chapter on healthcare provides up-to-date detailed information on selecting a qualified veterinarian, vaccinations, preventing and dealing with parasites, infectious diseases, and more. Sidebars throughout the text offer helpful hints, covering topics as diverse as historical dogs, breeders, or kennels, toxic plants, first aid, crate training, carsickness, fussy eaters, and parasite control. Fully indexed.
