With a vibrant, fresh style Suzanne Woods Fisher brings readers into the world of a young Amish woman torn between following the man she loves--or joining the community of faith that sustains her, even as she questions some of the decisions of her elders. Her choice begins a torrent of change for her and her family, including a marriage of convenience to silent Daniel Miller. Both bring broken hearts into their arrangement--and secrets that have been held too long. Filled with gentle romance, *The Choice* opens the world of the Amish--their strong communities, their simple life, and their willingness to put each other first.

This book explores the rich depths of a distinctively Lutheran spirituality that begins in Baptism and is founded upon God's Word. Discover how eight biblical practices and concepts can support your life including the Word, prayer, confession, the cross, witness, vocation, community, and promise.

*Patients at Risk: The Rise of the Nurse Practitioner and Physician Assistant in Healthcare* exposes a vast conspiracy of political maneuvering and corporate greed that has led to the replacement of qualified medical professionals by lesser trained practitioners. As corporations seek to save money and government agencies aim to increase constituent access, minimum qualifications for the guardians of our nation's healthcare continue to decline—with deadly consequences. This is a story that has not yet been told, and one that has dangerous repercussions for all Americans. With the rate of nurse practitioner and physician assistant graduates exceeding that of physician graduates, if you are not already being treated by a non-physician, chances are, you soon will be.

While advocates for these professions insist that research shows that they can provide the same care as physicians, patients do not know the whole truth: that there are no credible scientific studies to support the safety and efficacy of non-physicians practicing without physician supervision. Written by two physicians who have witnessed the decline of medical expertise over the last twenty years, this data-driven book interweaves heart-rending true patient stories with hard data, showing how patients have been sacrificed for profit by the substitution of non-physician practitioners. Adding a dimension neglected by modern healthcare critiques such as *An American Sickness*, this book provides a roadmap for patients to protect themselves from medical harm. WORDS OF PRAISE and REVIEWS

Al-Agba and Bernard tell a frightening story that insiders know all too well. As mega corporations push for efficiency and tout consumer focused retail services, American healthcare is being dumbed down to the point of no return. It's a story that many media outlets are missing and one that puts you and your family's health at real risk. --John Irvine, *Deductible Media*

Laced with actual patient cases, the book's data and patterns of large corporations replacing physicians with non-physician practitioners, despite the vast difference in training is enlightening and astounding. The authors' extensively researched book methodically lays out the problems of our changing medical care landscape and solutions to ensure quality care. --Marilyn M. Singleton, MD, JD

A masterful job of bringing to light a rapidly growing issue of what should be great concern to all of us: the proliferation of non-physician practitioners that work predominantly inside algorithms rather than applying years of training, clinical knowledge, and experience. Instead of a patient-first mentality, we are increasingly met with the sad statement of *Profits Over Patients*, echoed by hospitals and health insurance companies. --John M. Chamberlain, MHA, LFACHE, Board Chairman, Citizen Health A must read for patients attempting to navigate today's healthcare marketplace. --Brian Wilhelmi MD, JD, FASA

Herman Melville's Captain Ahab is perennially seen as the paradigm of a controlling, tyrannical agent. *Ahab Unbound* leaves his position as a Cold War icon behind, recasting him as a contingent figure, transformed by his environment--by chemistry, electromagnetism, entomology, meteorology, diet, illness, pain, trauma, and neurons firing--in ways that unexpectedly force us to see him as worthy of our empathy and our compassion. Why Captain Ahab is worthy of our fear--and our compassion

In sixteen essays by leading scholars, *Ahab Unbound* advances an urgent inquiry into Melville's emergence as a center of gravity for materialist work, reframing his infamous whaling captain in terms of pressing conversations in animal studies, critical race and ethnic studies, disability studies, environmental humanities, medical humanities, political theory, and posthumanism. By taking Ahab as a focal point, we gather and give shape to the multitude of ways that materialism produces criticism in our current moment. Collectively, these readings challenge our thinking about the boundaries of both persons and nations, along with the racist and environmental violence caused by categories like the person and the human. *Ahab Unbound* makes a compelling case for both the vitality of materialist inquiry and the continued resonance of Melville's work. In response to the coronavirus disease 2019 (COVID-19) pandemic and the societal disruption it has brought, national governments and the international community have invested billions of dollars and immense amounts of human resources to develop a safe and effective vaccine in an unprecedented time frame. Vaccination against this novel coronavirus, severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), offers the possibility of significantly reducing severe morbidity and mortality and transmission when deployed alongside other public health strategies and improved therapies. Health equity is intertwined with the impact of COVID-19 and there are certain populations that are at increased risk of severe illness or death from COVID-19. In the United States and worldwide, the pandemic is having a disproportionate impact on people who are already disadvantaged by virtue of their race and ethnicity, age, health status, residence, occupation, socioeconomic condition, or other contributing factors. *Framework for Equitable Allocation of COVID-19 Vaccine* offers an overarching framework for vaccine allocation to assist policy makers in the domestic and global health communities. Built on widely accepted foundational principles and recognizing the distinctive characteristics of COVID-19, this report's recommendations address the commitments needed to implement equitable allocation policies for COVID-19 vaccine.

NEW YORK TIMES BEST SELLER • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY: NPR, The New York Times Book Review, Time, Wall Street Journal, Washington Post • The McKinsey Business Book of the Year The full inside story of the breathtaking rise and shocking collapse of Theranos, the one-time multibillion-dollar biotech startup founded by Elizabeth Holmes—now the subject of the HBO documentary *The Inventor*—by the prize-winning journalist who first broke the story and pursued it to the end. “The story is even crazier than I expected, and I found myself unable to put it down once I started. This book has everything: elaborate scams, corporate intrigue, magazine cover stories, ruined family relationships, and the demise of a company once valued at nearly \$10 billion.” —Bill Gates In 2014, Theranos founder and CEO Elizabeth Holmes was widely seen as the female Steve Jobs: a brilliant Stanford dropout whose startup “unicorn” promised to revolutionize the medical industry with a machine that would make blood testing significantly faster and easier. Backed by investors such as Larry Ellison and Tim Draper, Theranos sold shares in a fundraising round that valued the company at more than \$9 billion, putting Holmes’s worth at an estimated \$4.7 billion. There was just one problem: The technology didn’t work. A riveting story of the biggest corporate fraud since Enron, a tale of ambition and hubris set amid the bold promises of Silicon Valley.

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. “Some of the key concepts discerned in the study,” comments Jim Collins, “fly in the face of our modern business culture and will, quite frankly, upset some people.” Perhaps, but who can afford to ignore these findings?

Praise for America's Corner Store "Who would have thought the story of a drugstore chain could encompass so much vital and fascinating American history? With superb storytelling skills, John Bacon gives us a vivid and insightful chronicle of matters both large and small, from the birth of the milkshake to the rise of America's consumer culture. America's Corner Store is a genuine treat." -James Tobin the National Book Critics' Circle--Award winner, and author of *To Conquer the Air: The Wright Brothers and the Great Race for Flight* "Run the business with your head. Lead the family with your heart. Walgreens' history is filled with good values, strong principles, and immense courage. A family business classic." -Howard "Howdy" S. Holmes President and CEO, "Jiffy" Mixes "John Bacon has crafted a thorough, insightful, readable, and fascinating account of the development of Walgreens: one of the world's most compelling examples of the creation of shareholder value in conjunction with good corporate governance... all in a company run in a highly unique fashion as a 'family' business. As the store that everyone knows, Walgreens has become the envy of corporate America and the darling of shareholders, consistently producing investor returns that place it at the very top among its peers. This book will be required reading in my private equity class at Michigan Business School." -Professor David

The United States, as well as both developed and underdeveloped countries around the world, grapple with escalating healthcare costs. The number of healthcare consumers is increasing worldwide, and while most of such an increase tilts the demographic curve toward younger age groups, older age cohorts are also increasing. These older age cohorts are particularly noticeable in developed countries where useful scientific progress has evolved substantial and extensive healthcare technologies. Access to such expensive technologies has both been widely sought and become available to healthcare consumers. This book offers prescient insights upon various ways to diminish healthcare expenses.
