Given the increasing global interest in Chinese culture, this book uses case studies to describe and interpret Chinese cultivation in contemporary Taiwanese schools. Cultivation is a concept unique to Chinese culture and is characterized by different attitudes towards teaching and learning compared to Western models of education. The book starts with a discussion of human nature in Chinese schools of philosophy and levels of goodness. Following the philosophical background is a presentation of how cultivation is practiced in Chinese culture from prenatal through high school education. The case studies focus both on how students are cultivated as they become members of Chinese society, and on what role teachers play in cultivating the children in school. In addition, supports from Chinese educational institutions, including public schools, families, and organizations such as private cram schools, are introduced and explained. In closing, the book presents a critique of the modern school reform movement and the conflicts between the reform proposals and traditional practices. Based on the collective work of Taiwanese researchers in the fields of education, history and anthropology, the book identifies the purpose of education as cultivating virtue in a process of creating an ideal person who serves society, and describes the way teachers have carried on

this tradition despite its faltering status in contemporary educational discourse and in the face of reform movements.

This volume presents research from a variety of perspectives on the enhancement of human intelligence. It is organized around five themes – enhancement via instruction; enhancement via development (over the life cycle); enhancement over time; enhancement via new constructs; and new directions in enhancement. Three key issues are addressed: First, although most of the scientific research on intelligence has concerned what it is, this volume attends to the consequential societal and economic issue concerns of whether it can be increased, and how. Second, intellectual enhancement is particularly important when targeted to minorities and the poor, groups that have typically performed relatively less well on intelligence and achievement measures. This volume reflects the education community's ongoing interest in understanding, and attempting to close, achievement or test score gaps. Third, most of the attention to examining intellectual enhancement, and in accounting for and closing the test-score gap, has focused on general cognitive ability. In line with the current emphasis on considering intelligence from a wider perspective, this volume includes constructs such as emotional and practical intelligence in definitions of intellectual functioning. Extending Intelligence: Enhancement and New Constructs is an essential volume for researchers, students, and professionals in the fields of educational psychology, intelligence, educational measurement and assessment, and critical thinking.

it will be even more important that students are well equipped to acquire and recall key content ahead of their exams. In this wide-ranging guide to effective exam preparation, Jake Hunton casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results. With plenty of practical suggestions and subject-specific examples, Exam Literacy provides teachers with user-friendly advice on how they can make the content they cover stick, and shares up-to-date, evidence-based information on: The nature of learning and the various types of memory. How to improve students' retention of knowledge and recall of content. Why popular revision techniques, such as rereading, highlighting and summarising, may not be as effective as you think. How revision strategies that have been identified as being more effective such as interleaving, elaborative interrogation, self-explanation and retrieval practice can be embedded into day-to-day teaching. How students can be encouraged to make use of these winning strategies when revising independently.
