Asia is no longer simply the continent to which the world turns for outsourcing and off shoring of production, leaving retailing to Western countries. Asia now contains many of the world's largest markets plus many emergent markets as well. North America is fast ceding ground to China as the world's largest economic power. Europe has been able to make productivity gains from trade, fiscal and monetary harmonization to remain globally competitive while Africa, whose nations practice free trade, is largely ignored both in terms of forgiving debt and providing further credit. Each chapter of this volume details the characteristics of an individual market in Asia and demonstrates the challenges that marketers are likely to face in these environments. Covering not just production or consumption but trade as it is practiced now, this book outlines the new norms, conventions and service performance levels that these markets demand.

Business to business markets are considerably more challenging than consumer markets and demand specific skills from marketers. Buyers, with a responsibility to their company and specialist product knowledge, are more demanding than the average consumer. The products themselves may be highly complex, often requiring a sophisticated buyer to understand them. Increasingly, B2B relationships are conducted in a global context. However all textbooks are region-specific—except this one. This textbook takes a global viewpoint, with an international author team and cases from across the globe. Other unique features of this excellent textbook include: placement of B2B in a strategic marketing setting; full discussion of strategy in a global setting including hypercompetition; full chapter on ethics early in the text; detailed review of global B2B services marketing, trade shows and market research; This new edition has been completely rewritten, and features expanded sections on globalisation and purchasing, plus brand new sections on social media marketing and intellectual property. More selective, shorter, and easier to read than other B2B textbooks, this is ideal for introduction to B2B and shorter courses. At the same time, it's comprehensive enough to cover all the aspects of B2B marketing any marketer needs, be they students or practitioners looking to improve their knowledge.

The text provides information on the core elements of the subject of marketing without the depth that often surrounds these to ensure that the basic concepts are easily identifiable and accessible. Students on MBA courses often do not have time to read a long text as they are studying many subjects, therefore they require a good, basic guide pitched at the appropriate level to be able to be absorbed quickly but still provide enough of a strategic element to stretch them. Written by a successful author team, Management of Marketing covers the key topics of the marketing component of an MBA course and provides a good balance of theory and application to ensure both aspects of the core concepts are covered.

Apply software-inspired management concepts to accelerate modern marketing In many ways, modern marketing has more in common with the software profession than it does with classic marketing management. As surprising as that may sound, it's the natural result of the world going digital. Marketing must move faster, adapt more quickly to market feedback, and manage an increasingly complex set of customer experience touchpoints. All of these challenges are shaped by the dynamics of software—from the growing number of technologies in our own organizations to the global forces of the Internet at large. But you can turn that to your advantage. And you don't need to be technical to do it. Hacking Marketing will show you how to conquer those challenges by adapting successful management frameworks from the software industry to the practice of marketing for any business in a digital world. You'll learn about agile and lean management methodologies, innovation techniques used by high-growth technology companies that any organization can apply, pragmatic approaches for scaling up marketing in a fragmented and constantly shifting environment, and strategies to unleash the full potential of talent in a digital age. Marketing responsibilities and tactics have changed dramatically over the past decade. This book now updates marketing management to better serve this rapidly evolving discipline. Increase the tempo of marketing's responsiveness without chaos or burnout Design "continuous" marketing programs and campaigns that constantly evolve Drive growth with more marketing experiments while actually reducing risk Architect marketing capabilities in layers to better scale and adapt to change Balance strategic focus with the ability to harness emergent opportunities As a marketer and a manager, Hacking Marketing will expand your mental models for how to lead marketing in a digital world where everything—including marketing—flows with the speed and adaptability of software.
