In 1826 thirty-year-old Anna Briggs Bentley, her husband, and their six children left their close Quaker community and the worn-out tobacco farms of Sandy Spring, Maryland, for frontier Ohio. Along the way, Anna sent back home the first of scores of letters she wrote her mother and sisters over the next fifty years as she strove to keep herself and her children in their memories. With Anna's natural talent for storytelling and her unique, female perspective, the letters provide a sustained and vivid account of everyday domestic life on the Ohio frontier. She writes of carving a farm out of the forest, bearing many children, darning and patching the family clothes, standing her ground in religious controversy, nursing wounds and fevers, and burying beloved family and friends. Emily Foster presents these revealing letters of a pioneer woman in a framework of insightful commentary and historical context, with genealogical appendices.

The fascinating, true story of the world's deadliest disease. In 1918, the Great Flu Epidemic felled the young and healthy virtually overnight. An estimated forty million people died as the epidemic raged. Children were left orphaned and families were devastated. As many American soldiers were killed by the 1918 flu as were killed in battle during World War I. And no area of the globe was safe. Eskimos living in remote outposts in the frozen tundra were sickened and killed by the flu in such numbers that entire villages were wiped out. Scientists have recently rediscovered shards of the flu virus frozen in Alaska and preserved in scraps of tissue in a government warehouse. Gina Kolata, an acclaimed reporter for The New York Times, unravels the mystery of this lethal virus with the high drama of a great adventure story. Delving into the history of the flu and previous epidemics, detailing the science and the latest understanding of this mortal disease, Kolata addresses the prospects for a great epidemic recurring, and, most important, what can be done to prevent it.

With “elements of *The Bold Type*, *Mad Men*, and *The Devil Wears Prada*” (*Entertainment Weekly*), a young woman navigates a tricky twenty-first-century career—and the trickier question of who she wants to be—in this savagely wise debut novel Casey Pendergast is losing her way. Once a book-loving English major, Casey lands a job at a top ad agency that highly values her ability to tell a good story. Her best friend thinks she’s a sellout, but Casey tells herself that she’s just paying the bills—and she can’t help that she has champagne taste. When her hard-to-please boss assigns her to a top-secret campaign that pairs literary authors with corporations hungry for upmarket cachet, Casey is both excited and skeptical. But as she crisscrosses America, wooing her former idols, she’s shocked at how quickly they compromise their integrity: A short-story writer leaves academia to craft campaigns for a plus-size clothing chain, a reclusive nature writer signs away her life’s work to a manufacturer of granola bars. When she falls in love with one of her authors, Casey can no longer ignore her own nagging doubts about the human cost of her success. By the time the year’s biggest book festival rolls around in Las Vegas, it will take every ounce of Casey’s moxie to undo the damage—and, hopefully, save her own soul. Told in an unforgettable voice, with razor-sharp observations about everything from feminism to pop culture to social media, *A Lady’s Guide to Selling Out* is the story of a young woman untangling the contradictions of our era and trying to escape the rat race—by any means necessary. Praise for *A Lady’s Guide to Selling Out* “Bitingly funny . . . [Sally] Franson’s snappy debut nimbly skewers the high-flying world of advertising and romance in the age of social media. . . . Franson’s irresistibly flawed heroine holds her own as she strives to find honesty, meaning, and even love in a demanding world, resulting in an addictive, escapist novel.”—*Publishers Weekly* “A high-spirited heroine loses herself in a vortex of modern striving in this debut novel. . . . Come for the hilarious narration, stay for the whirlwind plot, luxuriate in the satirical gleam.”—*Kirkus Reviews* “A wry, observant take on career success and ambition.”—*New York Post* “A book lover is torn between a cushy gig and . . . well, her soul, basically.”—*Cosmopolitan*

Days With My Father is a son's photo journal of his aging father's last years. Following the death of his mother, photographer Phillip Toledano was shocked to learn of the extent of his father's severe memory loss. He started a blog on which he posted photographs and accompanying reflections on his father's changing state. Through sometimes sad, often funny, and always loving observations, we follow Toledano as he learns to reconcile the elderly man living in a twilight of half memories with the ambitious and handsome young man he occasionally still glimpses. Days With My Father is an honest and moving reflection about coming to terms with an aging parent. This book showcases cutting-edge research papers from the 7th International Conference on Research into Design (ICoRD 2019) – the largest in India in this area – written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'19 has been “Design for a Connected World”. While Design traditionally focused on developing products that worked on their own, an emerging trend is to have products with a smart layer that makes them context aware and responsive, individually and collectively, through collaboration with other physical and digital objects with which these are connected. The papers in this volume explore these themes, and their key focus is connectivity: how do products and their development change in a connected world? The volume will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the use of emerging technologies such as IOT, IIOT, Digital Twins, I4.0 etc. as well as new and emerging methods and tools to design new products, systems and services. A Headache in the Pelvis describes the Stanford Protocol, a new and revolutionary treatment for prostatitis and other chronic pelvic pain syndromes that was developed at Stanford University Medical Center in the department of Urology. The book describes the details of the Stanford Protocol.

TRUTH ABOUT TRIGGER FOODS - They Are Not What You Think They Are
ADDRESSING CAUSE AND EFFECT - Heartburn, Acid Reflux and GERD Relief

without Drugs In the Fast Tract Digestion Heartburn, Norm Robillard, Ph.D., Founder of the Digestive Health Institute, explains the TRUE CAUSE and provides the COMPLETE DIETARY SOLUTION for acid reflux and GERD based on solid scientific evidence. This ground-breaking new approach -WHAT YOU EAT AFFECTS BACTERIA IN YOUR GUT- supported by a clinical study was presented at the recent Digestive Disease Week meeting in May, 2013 to provide a different treatment option to gastroenterologists for acid reflux and GERD. What people are saying about the Fast Tract Digestion Heartburn: "I weaned myself off proton pump inhibitors, and have avoided surgery completely. My quality of life is soooo much better. My gastroenterologists and surgeons are speechless.... His diet works. Period. Don't give up on it. Stick it out, and you will see the results.... I have never written a review on Amazon before, and am not being paid to say this. I feel so strongly about this book, that I had to let the world know." --- Joey I had been on PPI medication for over 10 years and tried from time to time to get off of them. But the acid reflux that returned was excruciating. I found this book, followed its advice and was so pleasantly surprised how well it works. Haven't taken a PPI in a month. The book is easy to read and understand and the recipes are really good. The charts in the book also make it easy to keep track of what and how much you can eat. I'd recommend this book to anyone who has GERD, takes medication for it and wants to get off of PPI's. --- DJ In the recent blog articles by the New York Time Best Seller Co-author of Protein Power, Dr. Mike Eades mentions the effectiveness of the Fast Tract Diet for GERD:

Why can't the gastroenerologists leave the pills alone." --- Henry T Ulrich "Thanks to Fast Tract Digestion diet and the consultative help of Norm Robillard via the Digestive Health Institute, I am now off meds, taking just an occasional TUMS. I feel better than I have since being diagnosed with GERD nearly two years ago. I expect that I will always need to be careful about what I eat, but it is a graded system that enables me to try gradual adjustments." --- Sunbeam48 According to Alana Sugar, a certified nutritionist with close to 25 years in practice: Dr. Robillard, your work has done the greatest service of all time for those of us facing these sorts of gut issues. The diet you have outlined is nutritionally balanced and safe! I tell my clients about your book and your work; I want everybody to know!

There is a commonly held belief the tropical storms and hurricanes that form off the coast of West Africa are not natural disasters, but rather they are retaliation by restless spirits impacted by one of the darkest chapters of world history—the trans-Atlantic slave trade. Awiti's destiny was forever changed the day the slave raiders arrived at her village. She made a life-altering decision with the hope of being reunited with her family, only to discover her effort was in vain. For centuries, her sadness raged within the winds and rain, resulting in tropical storms that devastated the South. But there is more to Awiti than creating

hurricanes, as those who have encountered her love and wrath will attest. The truth is, there is so much more. Follow Awiti's story from mid-15th-century Africa to 21st-century New Orleans in this historical fantasy that will leave you questioning the impact of the trans-Atlantic slave trade on the physical and spiritual realms.

This first historical dictionary in English of the Indochina War provides the most comprehensive account to date of one of the most important conflicts of the twentieth century. Over 1,600 entries offer in-depth, expert coverage of the war in all its dimensions. Christopher Goscha adopts a path-breaking dual international

and interdisciplinary approach. Thus readers will not only find information on politics and military campaigns; they will also discover the remarkable impact this war had on intellectual, social, cultural, economic, and artistic domains in France, Indochina, and elsewhere. Indeed, rather than limiting the dictionary to the French and their Vietnamese adversaries, Goscha explores the internationalization of this conflict from its beginning in September 1945 at Ba Dinh square in Hanoi to its end around the Cold War conference table in Geneva in July 1954, also making it clear that a myriad of non-communist Vietnamese, Lao, and Cambodian nationalists were deeply involved in this war and its outcome. In addition to its 1,600 entries, the dictionary contains a succinct historical introduction, selected bibliography, maps, illustrations, and tables. A massive work of outstanding scholarly quality and lasting value, this is a reference tool that will be invaluable for researchers, students, and anyone else hoping to understand the complexity of this tragic conflict.

Patients at Risk: The Rise of the Nurse Practitioner and Physician Assistant in Healthcare exposes a vast conspiracy of political maneuvering and corporate greed that has led to the replacement of qualified medical professionals by lesser trained practitioners. As corporations seek to save money and government agencies aim to increase constituent access, minimum qualifications for the guardians of our nation's healthcare continue to decline—with deadly consequences. This is a story that has not yet been told, and one that has dangerous repercussions for all Americans. With the rate of nurse practitioner and physician assistant graduates exceeding that of physician graduates, if you are not already being treated by a non-physician, chances are, you soon will be. While advocates for these professions insist that research shows that they can provide the same care as physicians, patients do not know the whole truth: that there are no credible scientific studies to support the safety and efficacy of non-physicians practicing without physician supervision. Written by two physicians who have witnessed the decline of medical expertise over the last twenty years, this data-driven book interweaves heart-rending true patient stories with hard data, showing how patients have been sacrificed for profit by the substitution of non-physician practitioners. Adding a dimension neglected by modern healthcare critiques such as *An American Sickness*, this book provides a roadmap for patients to protect themselves from medical harm. **WORDS OF PRAISE and REVIEWS** Al-Agba and Bernard tell a frightening story that insiders know all too well. As mega corporations push for efficiency and tout consumer focused retail services, American healthcare is being dumbed down to the point of no return. It's a story that many media outlets are missing and one that puts you and your family's health at real risk. --John Irvine, *Deductible Media* Laced with actual patient cases, the book's data and patterns of large corporations replacing physicians with non-physician practitioners, despite the vast difference in training is enlightening and astounding. The authors' extensively researched book methodically lays out the problems of our changing medical care landscape and

solutions to ensure quality care. --Marilyn M. Singleton, MD, JD A masterful job of bringing to light a rapidly growing issue of what should be great concern to all of us: the proliferation of non-physician practitioners that work predominantly inside algorithms rather than applying years of training, clinical knowledge, and experience. Instead of a patient-first mentality, we are increasingly met with the sad statement of Profits Over Patients, echoed by hospitals and health insurance companies. --John M. Chamberlain, MHA, LFACHE, Board Chairman, Citizen Health A must read for patients attempting to navigate today's healthcare marketplace. --Brian Wilhelmi MD, JD, FASA

At twenty-five she's become a loner; a shy nerd immersed in her scientific studies, whose best friend is her pet fish, Waldo. Then Ernestine meets Simon Prime, who's obviously a nerd, too! Sympathizing with his social dysfunction, Ernie decides to help poor Simon increase his self-esteem and thus enhance his social standing. Using principles learned in her fish studies, she'll simply turn Simon from meek to macho. What Ernestine doesn't know (but Waldo suspects) is that Simon Prime is really ex-cop, private investigator Sam Pierce in disguise. A man who definitely doesn't need his masculinity enhanced!

Water is the major natural reservoir for legionellae, and the bacteria are found worldwide in many different natural and artificial aquatic environments, such as cooling towers, water systems in hotels homes, ships and factories, respiratory therapy equipment, fountains misting devices and spa pools. This book provides a comprehensive overview on the sources, ecology and laboratory diagnosis of legionella. Guidance is provided on risk assessment and risk management of susceptible environments. The necessary measures to prevent, or adequately control, the risk from exposure to legionella bacteria are identified for each identified environment. Outbreaks of legionellosis generally cause a high level of morbidity and mortality in the people affected and as such the suspicion of an outbreak warrants immediate action. The policies and practice for outbreak management and the institutional roles and responsibilities of an outbreak control team are reviewed. This book will be useful to all those concerned with legionella and health, including environmental and public health officers, health care workers, the travel industry, researchers and special interest groups.
