High Price is the harrowing and inspiring memoir of neuroscientist Carl Hart, a man who grew up in one of Miami's toughest neighborhoods and, determined to make a difference as an adult, tirelessly applies his scientific training to help save real lives. Young Carl didn't see the value of school, studying just enough to keep him on the basketball team. Today, he is a cutting-edge neuroscientist—Columbia University's first tenured African American professor in the sciences—whose landmark, controversial research is redefining our understanding of addiction. In this provocative and eye-opening memoir, Dr. Carl Hart recalls his journey of self-discovery, how he escaped a life of crime and drugs and avoided becoming one of the crack addicts he now studies. Interweaving past and present, Hart goes beyond the hype as he examines the relationship between drugs and pleasure, choice, and motivation, both in the brain and in society. His findings shed new light on common ideas about race, poverty, and drugs, and explain why current policies are failing.

“Hart’s argument that we need to drastically revise our current view of illegal drugs is both powerful and timely . . . when it comes to the legacy of this country’s war on drugs, we should all share his outrage.” —The New York Times Book Review From one of the world’s foremost experts on the subject, a powerful argument that the greatest damage from drugs flows from their being illegal, and a hopeful reckoning with the possibility of their use as part of a responsible and happy life Dr. Carl L. Hart, Ziff Professor at Columbia University and former chair of the Department of Psychology, is one of the world’s preeminent experts on the effects of so-called recreational drugs on the human mind and body. Dr. Hart is open about the fact that he uses drugs himself, in a happy balance with the rest of his full and productive life as a colleague, husband, father, and friend. In *Drug Use for Grown-Ups*, he draws on decades of research and his own personal experience to argue definitively that the criminalization and demonization of drug use—not drugs themselves—have been a tremendous scourge on America, not least in reinforcing this country’s enduring structural racism. Dr. Hart did not always have this view. He came of age in one of Miami’s most troubled neighborhoods at a time when many ills were being laid at the door of crack cocaine. His initial work as a researcher was aimed at proving that drug use caused bad outcomes. But one problem kept cropping up: the evidence from his research did not support his hypothesis. From inside the massively well-funded research arm of the American war on drugs, he saw how the facts did not support the ideology. The truth was dismissed and distorted in order to keep fear and outrage stoked, the funds rolling in, and Black and brown bodies behind bars. *Drug Use for Grown-Ups* will be controversial, to be sure: the propaganda war, Dr. Hart argues, has been tremendously effective. Imagine if the only subject of any discussion about driving automobiles was fatal car crashes. *Drug Use for Grown-Ups* offers a radically different vision: when used responsibly, drugs can enrich and enhance our lives. We have a long way to go, but the vital conversation this book will generate is an extraordinarily important step.

This text provides an introduction to the basic facts and major issues concerning drug-taking behavior. In today’s world, drugs and their use present a social paradox, combining the potential for good and for bad. As a society and as individuals, we can be the beneficiaries of drugs or their victims.

Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America’s efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. *Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change* explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

The psychology classic—a detailed study of scientific theories of human nature and the possible ways in which human behavior can be predicted and controlled—from one of the most influential behaviorists of the twentieth century and the author of *Walden Two*. “This is an important book, exceptionally well written, and logically consistent with the basic premise of the unitary nature of science. Many students of society and culture would take violent issue with most of the things that Skinner has to say, but even those who disagree most will find this a stimulating book.” —Samuel M. Strong, *The American Journal of Sociology* “This is a remarkable book—remarkable in that it presents a strong, consistent, and all but exhaustive case for a natural science of human behavior...It ought to be...valuable for those whose preferences lie with, as well as those whose preferences stand against, a behavioristic approach to human activity.” —Harry Prosch, *Ethics*

AND THE MORAL OF THE STORY IS . . . I saw a Korean woman walking along the road carrying a bundle of sticks on her back. I thought to myself, "Life is like that." We all carry around bundles of stories starting from our childhoods and going through the rest of our lives. Some of the stories we have forgotten and others we will never forget. Some of these stories have influenced our lives. Others have had little effect on us. In this book I have pulled from my bundle of stories to share fifty-two of them with an added moral for each one. I have heard many people who would stand and tell their stories, hoping it would help someone else along life's journey. I hope you will find these stories interesting and the moral of each one helpful. Carl Hart has served as chaplain, pastor, teacher and administrator. He served as the first Director of Chaplaincy for the Department of Corrections in the state of Tennessee. For sixteen years he was on the staff of the North American Mission Board of the Southern Baptist Convention, serving the last nine of those years as Director of the Division. He then served as Director of the Chaplaincy Department for Allied Systems, Ltd. His work through the years has taken him and his wife to many parts of the world. He holds a Master of Divinity Degree from Southeastern Theological Seminary and a Doctor of Divinity Degree from Union University.
