Vols. for 1970-71 includes manufacturers' catalogs. "Part post-apocalypse, part road-trip, part sword-and-sorcery . . . One of my favorite adventure novels of all time." —Cory Doctorow At four-thirty one Saturday afternoon the laws of physics as we know them underwent a change. Electronic devices, cars, industries stopped. The lights went out. Any technology more complicated than a lever or pulley simply wouldn't work. A new set of rules took its place—laws that could only be called magic. Ninety-nine percent of humanity has simply vanished. Cities lie abandoned. Supernatural creatures wander the silenced achievements of a halted civilization. Pete Garey has survived the Change and its ensuing chaos. He wanders the southeastern United States, scavenging, lying low. Learning. One day he makes an unexpected friend: a smartassed unicorn with serious attitude. Pete names her Ariel and teaches her how to talk, how to read, and how to survive in a world in which a unicorn horn has become a highly prized commodity. When they learn that there is a price quite literally on Ariel's head, the two unlikely companions set out from Atlanta to Manhattan to

confront the sorcerer who wants her horn. And so begins a haunting, epic, and surprisingly funny journey through the remnants of a halted civilization in a desolated world.

School buildings have a crucial contribution to make

to raising educational achievement. Designing high performance school buildings for the 21st century for all children is a shared concern amongst OECD countries. Innovative research seeks architectural answers that make efficient use of the resources invested in building, renovating and running schools. Changes in the design of those buildings must serve the educational process and improve the quality of the learning environment. A major challenge is to secure the best possible design input to deliver schools that will meet future needs and expectations and offer a positive environment that supports learning and teaching.

This series of 18 essays was written by Thoreau while he lived in semi-isolation near Waldon Pond in Massachussetts. The essays capture his thoughts on topics ranging from self-reliance to individualism to nature.

Round the World in the Wrong Season, by Eric T. Wiberg - Written between 1994 and 2009, is a memoir of global travel and an unfulfilled college crush. The book follows the narrator out of school and across the Pacific. At only 23 he has command of a 68-foot Burmese-teak ketch built in Scotland thrust upon him. The owner is on a voyage home to his death, and along the way they hire sailors twice the skipper's age. They makes it to New Zealand in a storm which sinks seven yachts, then spends months shearing sheep and writing a memoir. By the time the narrator makes a rendezvous with his college sweetheart (who has been teaching Thai students on the Burmese border), she seems to have all but forgotten him. This leads to a less than satisfactory denouement and puts at least one of them in the

hospital. The book includes extensive photographs and hand-drawn charts and a detailed bibliography. It is over 400 pages in length, perfect bound in cloth. More www.wrongseason.net and www.ericwiberg.com

This book seeks to unravel the mysteries of wolfberry, and systematically introduces its mechanisms in preventing aging-associated diseases, such as cardiovascular diseases, inflammation, liver and neurodegenerative diseases. Wolfberry, the dried fruit of *Lycium barbarum*, is an anti-aging herbal medicine.

There have been numerous reports investigating the underlying mechanisms of its anti-aging effects and its role in preventing pathological changes in many aging-associated diseases. Its holistic effects on the body can attenuate liver toxicity and combat the spread of cancer; it also prevents degeneration in the central nervous system, and can even positively affect the skin. As such, wolfberry has become a very popular food supplement around the world. This book will serve as an excellent reference source for researchers and graduate students studying herbal medicine and aging-associated diseases, while also providing insights for the pharmaceutical industry with regard to developing potential drugs for these diseases.

"Powerful and affecting. Hillary is an indomitable force." — Dean Karnazes

In 2017, world-class ultrarunner Hillary Allen was at the top of her sport--and it felt like she was running on top of the world as she competed in Norway's Tromsø S kyrace. Allen was nearly halfway through the 50-kilometer race when she fell 150 feet off an exposed ridge, fracturing her back and breaking multiple ribs, both feet, and both of her lower arms. Beginning with the dramatic story of her accident and rescue, *Out and Back: A Runner's Story of Survival Against All Odds* recounts Allen's fight to return to the life she loves. With vulnerability that reveals remarkable strength and introspection that yields wisdom, Allen shares the story of her recovery both physically and mentally, and hard-earned knowledge that the path forward is not always linear, that healing takes time, and that the process of rediscovery is ongoing as she learns what it takes to survive--and thrive. *Out and Back* is an inspiration to anyone who knows what it means to reclaim and rebuild your life, one day and one step at a time.
