Over the past two decades, international trade agreements such as GATT and NAFTA have lowered international trade barriers. At the same time, the information revolution has fueled profound shifts in the ways companies conduct business and communicate with their customers, and worldwide acceptance of the ISO 9000 standard has established the notion that quality must be defined in terms of customer satisfaction. Falling trade barriers and rising quality standards have made linguistic and cultural issues increasingly important. To successfully compete in today's global on-demand economy, companies must localize their products and services to fit the needs of the local market in terms of language, culture, functionality, work practices, as well as legal and regulatory requirements. In recognition of the growing importance of localization, this volume explores a certain number of key issues, including:

- Return on investment and the localization business case
- Localization cost drivers and cost-containment strategies
- Localization quality and customer-focused quality management
- Challenges posed by localization of games, including Massively Multiplayer Online Role-Playing Games (MMORPGs)
- Using a meta-language to facilitate accurate translation of disembodied content
- The case for managing source-language terminology
- Terminology management in the localization process
- Reconciling industry needs and academic objectives in localization education
- Localization standards and the commoditization of linguistic information
- The creation and application of language industry standards
- Rethinking customer-focused localization through user-centered design
- Moving from translation reuse to language reuse

Was king Ashoka fond of chewing paan? Mulligatawny was a soup, but what was pish-pash? Did they design jewellery in Harappa? Who played pachisi, chaupar and lam turki? Find the answers to all these weird, impossible question in this fascinating book about how people lived in the past. Go time travelling through the alleys of history and take a tour through the various ages—from Harappa to the Mauryan, Mughal to the British. Through short snapshots and wacky trivia, this book gives you a glimpse into the vibrant culture of India, as you learn about the life and times of kings, queens, viceroys and even ordinary children! Spend a day with Urpi as she tries selling pottery in exchange for a few beads at Mohen-jo-daro; step back into King Ashoka's kingdom where Madhura prepares to be a warrior; watch Adil harbour hopes of becoming a khansama in British India.

Designed for teaching astrophysics to physics students at advanced undergraduate or beginning graduate level, this textbook also provides an overview of astrophysics for astrophysics graduate students, before they delve into more specialized volumes. Assuming background knowledge at the level of a physics major, the textbook develops astrophysics from the basics without requiring any previous study in astronomy or astrophysics. Physical concepts, mathematical derivations and observational data are combined in a balanced way to provide a unified treatment. Topics such as general relativity and plasma physics, which are not usually covered in physics courses but used extensively in astrophysics, are developed from first principles. While the emphasis is on developing the fundamentals thoroughly, recent important discoveries are highlighted at every stage.

This book provides an in-depth view into the world of telephone interpreting. The first major publication on the topic, this book offers extensive information for anyone involved with interpreting services.

Provides definitions and study tips for over sixteen hundred frequently used SAT words and includes strategies for memorizing the words and answering questions on the test.

This book explains all the concepts underpinning SAP's HR Time Management Module. It is a comprehensive technical manual which explains every single node of the User Menu and the Configuration.

The book first gives an overview of a concept explaining what it is, how it is used and how it relates to the other concepts. It then explains its properties, which are fields in a configuration node. This book is designed to be used both as a reference manual and a learning guide. As a learning guide, it offers four views, each for a different target audience.

- It can be read from the Senior Management's perspective to gain a broad understanding of the subject and what SAP can do for them.
- Business Process Owners can achieve a higher level of understanding by getting to know more of SAP concepts and how to perform different tasks in SAP.
- Users can acquire a thorough understanding of different tasks and concepts underlying them.
- Functional consultants and proficient users can read the book to gain a complete understanding of the system.

As a technical reference, the book can be used to locate the relevant material through the Table of Contents, Index, 'SAP Menu' and 'SAP Customizing Implementation Guide (IMG)'. The last two follow the Table of Contents. If the reader is in SAP's User Menu or Configuration, the chapter number for these nodes can be found in 'SAP Menu' and 'IMG'. If a node is not covered in the book, the reason for not doing so is mentioned. The implementation of SAP HR Time Management and documentation can also be guided by the structure of this book.

A BETTER WORLD : There is a lot we can do to make our world a better world, just as we discover better ways to support our businesses. Read short articles inside on some of the ideas of World Integration and Improvement Initiative. World Government 691 World Language 693 Good Governance 699 City without Traffic Lights 705 SAP is a great software. One needs to fully understand its features in order to effectively exploit them for the benefit of customers. Mr. Agrawal's books on SAP HR have a unique approach. A chapter usually focuses on a single business concept, and discusses the user interface as well as its associated configuration. This logical division makes it easier for readers to understand the functionality. Another important feature of these books is the level of detail. Each screen and each field in a screen is explained. Explanation includes meaning, use case and in some cases guidelines. Details are balanced by overviews explaining the concepts and their relationships. While explaining functionality, Mr. Agrawal has taken efforts to highlight what can be done and how it is to be done. This is particularly important for less experienced users and consultants. Indicating chapter numbers against each menu and configuration item is a very useful innovation, as it establishes direct link between the SAP system and the book. Another useful feature is that these books can be read not only by consultants, but also by users, business process owners and even by senior managers. The importance of each topic for each category of users is specified. Mr. Agrawal has taken considerable pain in writing these books, and I congratulate Mr. Agrawal on his achievement and thank him for his contribution to the SAP community. K. Sanjai Regional Head—Asia Pacific & Japan, SAP Global Delivery

"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. The Lonely City is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, The Lonely City is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--

The current volume contains selected papers submitted after Critical Link 5 (Sydney 2007) and arises from its topic – quality interpreting being a communal responsibility of all the participants. It takes the much discussed theme of professionalisation of community interpreting to a new level by stating that achieving quality depends not only on the technical skills and ethics of interpreters, but equally upon all other parties that serve multilingual populations: speakers, employers and administrators, educational institutions, researchers, and interpreters. Major articles outline both innovative practices in legal and medical settings and prevailing deficiencies in community interpreting in different countries. While Part I, A shared responsibility: The policy dimension, addresses the macro environment of specific social policy contexts with constraints that affect interpreting, Part II, Investigations and innovations in quality interpreting, reveals a number of admirable cases of interpreters working together with their client institutions in a variety of social settings. Part III is dedicated to the questions of Pedagogy, ethics and responsibility in interpreting. The collection is an important reference book catering to the interpreting community: interpreting practitioners and interpreter users, researchers, educators, and students.

It stands out even in a country inured to mass violence - 3,000 members of a minority community slaughtered over three days in 1984, right in India's capital. Twenty-three years on, neither the organizers of the massacre nor the state players who facilitated it have been punished, despite prolonged inquiries and trials. This massacre of Sikhs in the wake of Prime Minister Indira Gandhi's assassination has turned out to be a reality check on India's much touted institutions of the rule of law. The book seeks to uncover the truth on the basis of the evidence that came to light during the proceedings of the latest judicial inquiry conducted by the Nanavati Commission. Authors Manoj Mitta and H.S. Phoolka, perhaps the most knowledgeable voices on the subject, present an unsparing account, abounding with insights and revelations, on the 1984 carnage and its aftermath.

"Kultar's Mime" tells the stories of Sikh children who survived the Delhi massacre through a poem that grew into a play, made its way from Boston to Delhi, and restarted the conversation about a forgotten chapter in history. In April 1903, a pogrom targeted the Jewish population in Kishinev, Russia, leaving many dead and wounded and thousands homeless. Upon visiting the aftermath, the Hebrew poet Hayim Nahman Bialik composed one of his most famous poems, "In the City of Slaughter." In 1984, after Indian Prime Minister Indira Gandhi was shot by her Sikh bodyguards, an orgy of murder, rape, and arson was unleashed upon the Sikh residents of Delhi, in which more than three thousand lost their lives. When he eventually discovered the hidden truth, Sarbpreet Singh, then a young Sikh living in Milwaukee wrote the poem "Kultar's Mime." The play "Kultar's Mime" synthesizes the suffering caused by these two events, separated by thousands of miles, many years, and vast cultural differences. Through the raw imagery of the two poems, it reminds us that, in the end, all innocent victims are the same.

A uniquely informed investigative account of one of the biggest financial crises of President Obama's early administration During his first year in office, President Obama faced the possibility

of more than a million lost jobs as GM and Chrysler headed for financial ruin. He joined forces with Treasury Secretary Tim Geithner and economic advisor Larry Summers in a historic government intervention to keep these two auto-industry giants afloat, working against a ticking clock and fielding vocal opposition from free market champions along the way. It's from this vantage point that former New York Times financial journalist Steven Rattner witnesses a new administration's grace under pressure in the face of gross corporate mismanagement—a scenario rich in hard-earned lessons for managers and executives in any industry.

Discusses the connections between food and history, natural law, the emotions, the environment, the energy crisis, international order, and world peace

When the Big Apple no longer felt big enough, Dave Prager and his wife, Jenny, moved to a city of sixteen million people—with seemingly twice as many honking horns. Living and working in Delhi, the couple wrote about their travails and discoveries on their popular blog *Our Delhi Struggle*. This book, all new, is Dave's top-to-bottom account of a megacity he describes as simultaneously ecstatic, hallucinatory, feverish, and hugely energizing. Weaving together useful observations and hilarious anecdotes, he covers what you need to know to enjoy the city and discover its splendors: its sprawling layout, some favorite sites, the food, the markets, and the challenges of living in or visiting a city that presents every human extreme at once. Among his revelations: secrets that every Delhiite knows, including the key phrase for successfully negotiating with any shopkeeper; the most fascinating neighborhoods, and the trendiest; the realities behind common stereotypes; tips for enjoying street food and finding hidden restaurants, as well as navigating the transportation system; and the nuances of gestures like the famous Indian head bobble. *Delirious Delhi* is at once tribute to a great world city and an invitation to explore. Read it, and you'll want to book the next flight!

The ubiquitous railway as a symbol of the tensions of Indian modernity.

Interested in a successful translation career or freelancing? You will discover how easy it is to develop your own language and writing skills in the translation field; create your own base of professional translation tools; and sell your services to organizations, agencies, companies and the many hundreds of sources of translation work in today's world. Written for undergraduate and MBA courses in business-to-business marketing or industrial marketing, this text explores the process of understanding, creating and delivering value to targeted business markets and customers. It provides an analytical framework for determining value.

Today's headlines report cities going bankrupt, states running large deficits, and nations stuck in high debt and stagnation. Philip Kotler, Donald Haider, and Irving Rein argue that thousands of "places" -- cities, states, and nations -- are in crisis, and can no longer rely on national industrial policies, such as federal matching funds, as a promise of jobs and protection. When trouble strikes, places resort to various palliatives such as chasing grants from state or federal sources, bidding for smokestack industries, or building convention centers and exotic attractions. The authors show instead that places must, like any market-driven business, become attractive "products" by improving their industrial base and communicating their special qualities more effectively to their target markets. From studies of cities and nations throughout the world, Kotler, Haider, and Rein offer a systematic analysis of why so many places have fallen on hard times, and make recommendations on what can be done to revitalize a place's economy. They show how "place wars" -- battles for Japanese factories, government projects, Olympic Games, baseball team franchises, convention business, and other economic prizes -- are often misguided and end in wasted money and effort. The hidden key to vigorous economic development, the authors argue, is strategic marketing of places by rebuilding infrastructure, creating a skilled labor force, stimulating local business entrepreneurship and expansion, developing strong public/private partnerships, identifying and attracting "place compatible" companies and industries, creating distinctive local attractions, building a service-friendly culture, and promoting these advantages effectively. Strategic marketing of places requires a deep understanding of how "place buyers" -- tourists, new residents, factories, corporate headquarters, investors -- make their place decisions. With this understanding, "place sellers" -- economic development agencies, tourist promotion agencies, mayor's offices -- can take the necessary steps to compete aggressively for place buyers. This straightforward guide for effectively marketing places will be the framework for economic development in the 1990s and beyond.
