A prizewinning, "riveting" (The New York Times Book Review) psychological suspense novel inspired by a true story about a couple in an insular French village whose lives are upended when a family of outsiders moves in. "Icy and chilling . . . In sharply drawn sentences, Sedira summons the beauty of a small French village, and the shocking acts of the people inside it." —Flynn Berry, Edgar Award-winning and bestselling author of *Under the Harrow* and *Northern Spy* "Disturbing and powerful . . . I loved it." —Leila Slimani, bestselling author of *The Perfect Nanny* Anna and Constant Guillot live with their two daughters in the peaceful, remote mountain village of Carmac, largely deaf to the upheavals of the outside world. Everyone in Carmac knows each other, and most of its residents look alike—until Bakary and Sylvia Langlois arrive with their three children. Wealthy and flashy, the family of five are outsiders in the small town, their impressive chalet and three expensive cars a stark contrast to the modesty of those of their neighbors. Despite their differences, the Langlois and the Guillots form an uneasy, ambiguous friendship. But when both families begin experiencing financial troubles, the underlying class and racial tensions of their relationship come to a breaking point, and the unthinkable happens. With piercing psychological insight and gripping storytelling, *People Like Them* asks: How could a seemingly "normal" person commit an atrocious crime? How could that person's loved ones ever come to terms with it afterward? And how well can you really know your own spouse?

Three unique perspectives of historically significant automobiles from Europe and America. From the rarest production car in the world to full blown race cars, this book explores the joy of automotive design and innovative mechanics. How the Super Nintendo Entertainment System embodied Nintendo's resistance to innovation and took the company from industry leadership to the margins of videogaming. This is a book about the Super Nintendo Entertainment System that is not celebratory or self-congratulatory. Most other accounts declare the Super NES the undisputed victor of the "16-bit console wars" of 1989–1995. In this book, Dominic Arsenault reminds us that although the SNES was a strong platform filled with high-quality games, it was also the product of a short-sighted corporate vision focused on maintaining Nintendo's market share and business model. This led the firm to fall from a dominant position during its golden age (dubbed by Arsenault the "ReNESSance") with the NES to the margins of the industry with the Nintendo 64 and GameCube consoles. Arsenault argues that Nintendo's conservative business strategies and resistance to innovation during the SNES years explain its market defeat by Sony's PlayStation. Extending the notion of "platform" to include the marketing forces that shape and constrain creative work, Arsenault draws not only on game studies and histories but on game magazines, boxes, manuals, and advertisements to identify the technological discourses and business models that

formed Nintendo's Super Power. He also describes the cultural changes in video games during the 1990s that slowly eroded the love of gamer enthusiasts for the SNES as the Nintendo generation matured. Finally, he chronicles the many technological changes that occurred through the SNES's lifetime, including full-motion video, CD-ROM storage, and the shift to 3D graphics. Because of the SNES platform's architecture, Arsenault explains, Nintendo resisted these changes and continued to focus on traditional gameplay genres.

The definitions of fatherhood have shifted in the twenty-first century as paternal subjectivities, conflicts, and desires have registered in new ways in the contemporary family. This collection investigates these sites of change through various lenses from popular culture - film, television, blogs, best-selling fiction and non-fiction, stand-up comedy routines, advertisements, newspaper articles, parenting guide-books, and video games. Treating constructions of the father at the nexus of patriarchy, gender, and (post)feminist philosophy, contributors analyze how fatherhood is defined in relation to masculinity and femininity, and the shifting structures of the heteronormative nuclear family. Perceptions of the father as the traditional breadwinner and authoritarian as compared to a more engaged and involved nurturer are considered via representations of fathers from the US, Canada, Britain, Australia, South Africa, and Sweden.

Following the end of the Korean War, the prevailing myth in the West was that of the absolute supremacy of US Air Force pilots and aircraft over their Soviet-supplied opponents. Packed with first-hand accounts and covering the full range of US Air Force activities over Korea, MiG Alley brings the war vividly to life and the record is finally set straight on a number of popular fabrications. The Law Library presents the complete text of the Seafood Import Monitoring Program (US National Oceanic and Atmospheric Administration Regulation) (NOAA) (2018 Edition). Updated as of May 29, 2018 Pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (MSA), this final rule establishes permitting, reporting and recordkeeping procedures relating to the importation of certain fish and fish products, identified as being at particular risk of illegal, unreported, and unregulated (IUU) fishing or seafood fraud, in order to implement the MSA's prohibition on the import and trade, in interstate or foreign commerce, of fish taken, possessed, transported or sold in violation of any foreign law or regulation or in contravention of a treaty or a binding conservation measure of a regional fishery organization to which the United States is a party. Collection of catch and landing documentation for certain fish and fish products will be accomplished through the government-wide International Trade Data System (ITDS) by electronic submission of data through the Automated Commercial Environment (ACE) maintained by the Department of Homeland Security, Customs and Border Protection (CBP). The information will be collected through the ITDS electronic single window consistent with the Safety and Accountability for Every (SAFE) Port Act of 2006 and other applicable statutes. Specifically, this rule revises an existing NMFS requirement for the importer of record to file electronically through ACE data

prescribed under certain existing NMFS programs (and to retain records supporting such filings) to also cover the data required to be reported under this rule. This rule requires data to be reported on the harvest of fish and fish products. In addition, this rule requires retention of additional supply chain data by the importer of record and extends an existing NMFS requirement to obtain an annually renewable International Fisheries Trade Permit (IFTP) to the fish and fish products regulated under this rule. The information to be reported and retained, as applicable, under this rule will help authorities verify that the fish or fish products were lawfully acquired by providing information to trace each import shipment back to the initial harvest event(s). The rule will also decrease the incidence of seafood fraud by requiring the reporting of this information to the U.S. Government at import and requiring retention of documentation so that the information reported (e.g., regarding species and harvest location) can be verified. This ebook contains:

- The complete text of the Seafood Import Monitoring Program (US National Oceanic and Atmospheric Administration Regulation) (NOAA) (2018 Edition)
- A dynamic table of content linking to each section
- A table of contents in introduction presenting a general overview of the structure
