Never Give in to Fear: Laughing all the way up from Rock Bottom, the enhanced edition of this darkly funny, dramatic memoir, describes an emerging stand-up comic's drug-fueled descent into the underworld, escape from human traffickers, homelessness, and ultimate redemption. With brutal honesty, humor, and clarity, the author vividly describes her experiences as she rides her downward spiral: a near-miss with a notorious serial killer, a series of tragically hilarious misadventures in the California drug world, and a terrifying account of imprisonment at the hands of Japanese organized crime. In an energetic, upbeat, and insightful style, Marti brings to life a host of quirky characters, anti-heroes, and bungling criminals. This revised and re-edited version contains three additional chapters that introduce readers to enthralling adventures, insights into stand-up comedy, resilience and recovery, and elivery an inspiring message about healing, hope, and courage to change -- Publisher's description.

Hispanics and the Future of America presents details of the complex story of a population that varies in many dimensions, including national origin, immigration status, and generation. The papers in this volume draw on a wide variety of data sources to describe the contours of this population, from the perspectives of history, demography, geography, education, family, employment, economic well-being, health, and political engagement. They provide a rich source of information for researchers, policy makers, and others who want to better understand the fast-growing and diverse population that we call "Hispanic." The current period is a critical one for getting a better understanding of how Hispanics are being shaped by the U.S. experience. This will, in turn, affect the United States and the contours of the Hispanic future remain uncertain. The uncertainties include such issues as whether Hispanics, especially immigrants, improve their educational attainment and fluency in English and thereby improve their economic position; whether growing numbers of foreign-born Hispanics become citizens and achieve empowerment at the ballot box and through elected office; whether impending health problems are successfully averted; and whether Hispanics' geographic dispersal accelerates their spatial and social integration. The papers in this volume provide invaluable information to explore these issues.

Informed by the history of classic southern recipes, Southern Smoke is an intriguing dive into the barbecue of North Carolina, the Lowcountry, Memphis, and the Delta, with must-try meats, sides, and desserts. For years, Matthew Register, the owner and pitmaster of Southern Smoke Barbecue, has been obsessed with the history of southern recipes. Armed with a massive collection of cookbooks from the 1900s and overflowing boxes of recipe cards from his grandmother, he hits the kitchen. Over weeks, sometimes months, he forges

updated versions of timeworn classics. Locals and tourists alike flock to his restaurant in Garland, North Carolina (population 700), to try these unique dishes. In this book, Matthew teaches the basics of smoking with a grill or smoker. He outlines how to manage the fire for long smoking sessions and shares pitmaster tips for common struggles (like overcoming "the stall" on large pieces of meat). He then explores iconic barbecue regions and traditions: Start off in North Carolina, the home of slow-smoked pork and tangy vinegar sauce. Other highlights include chicken quarters with church sauce, barbecue potatoes, collard chowder, and pork belly hash. Travel the Lowcountry, where seafood meets barbecue. Go all out with frogmore stew, pickled shrimp, and fire-roasted oysters, or sample unique recipes like funeral grits, likker pudding, and James Island shrimp pie. Then take a trip to Memphis and the Delta, a longtime barbecue hub known for dry-rubbed ribs. Other standouts might surprise you! Learn the secrets behind Delta tamales, Merigold tomatoes, okra fries with comeback sauce, and country style duck. And, of course, what barbecue spread is complete without baked goods? The final chapter includes everything from skillet cornbread and benne seed biscuits to chocolate chess pie and pecan-studded bread pudding. Whether you've long been a fan of barbecue or are just starting your own barbecue journey, Southern Smoke offers a unique collection of recipes and stories for today's home cook.

Pinocchio, The Tale of a Puppet follows the adventures of a talking wooden puppet whose nose grew longer whenever he told a lie and who wanted more than anything else to become a real boy. As carpenter Master Antonio begins to carve a block of pinewood into a leg for his table the log shouts out, "Don't strike me too hard!" Frightened by the talking log, Master Cherry does not know what to do until his neighbor Geppetto drops by looking for a piece of wood to build a marionette. Antonio gives the block to Geppetto. And thus begins the life of Pinocchio, the puppet that turns into a boy. Pinocchio, The Tale of a Puppet is a novel for children by Carlo Collodi is about the mischievous adventures of Pinocchio, an animated marionette, and his poor father and woodcarver Geppetto. It is considered a classic of children's literature and has spawned many derivative works of art. But this is not the story we've seen in film but the original version full of harrowing adventures faced by Pinnocchio. It includes 40 illustrations.

When Joe dies, his brother Jack thinks it's an accident . . . until the parcel arrives with Joe's diaries and notebooks, and the map of the cabin high up in the Appalachians where Joe's war buddy, Wash, is hiding out with a girl he's kidnapped -- just the latest in a long line of girls. Joe has one last favour to ask of his brother. He wants Jack to rescue the girl and -- if he has to -- kill Wash too. So starts a complex and intense tale that involves a journey back to Vietnam and into the dark past: a past where Clausewitz, the philosopher of war, meets de Sade, the philosopher of man's own individual evil. But there are too the incendiary eyes of innocent judgement. And there is love -- and love is

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

Chris Thrall left the Royal Marines to find his fortune in Hong Kong, but instead found himself homeless and addicted to crystal meth. Soon he began working for the 14K, Hong Kong's largest triad group, as a doorman in one of their night-clubs in the Wanchai red-light district.

Across America, the pure love and popularity of barbecue cookery have gone through the roof. Prepared in one regional style or another, in the South and beyond, barbecue is one of the nation's most distinctive culinary arts. And people aren't just eating it; they're also reading books and articles and watching TV shows about it. But why is it, asks Adrian Miller—admitted 'cuehead and longtime certified barbecue judge—that in today's barbecue culture African Americans don't get much love? In *Black Smoke*, Miller chronicles how Black barbecuers, pitmasters, and restaurateurs helped develop this cornerstone of American foodways and how they are coming into their own today. It's a smoke-filled story of Black perseverance, culinary innovation, and entrepreneurship. Though often pushed to the margins, African Americans have enriched a barbecue culture that has come to be embraced by all. Miller celebrates and restores the faces and stories of the men and women who have influenced this American cuisine. This beautifully illustrated chronicle also features 22 barbecue recipes collected just for this book.

Chris Thrall left the Royal Marines to find fortune in Hong Kong, but following a bizarre series of jobs he ended up homeless and hooked on Crystal Meth. He began working for the 14K, the city's most notorious crime syndicate, as a nightclub doorman in the Wan Chai red-light district. Heavily in psychosis, he uncovered a huge global conspiracy, made all the more confusing by the 'Foreign Triad' - a secretive expat clique in cahoots with the Chinese mafia. Desperate, addicted and alone in the neon glare of Hong Kong's seedy backstreets, Chris was forced to survive in the world's most unforgiving city, addicted to the world's most dangerous drug. Engaging, honest and full of Chris's irrepressible humour, this remarkable memoir combines gripping storytelling with brooding menace as the Triads begin to cast their shadow over him. The result is a truly psychotic urban nightmare.

The book that inspired the major new motion picture *Mandela: Long Walk to Freedom*. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's anti-apartheid movement, he was instrumental in moving

the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. *LONG WALK TO FREEDOM* is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

This eighty-ninth volume of the IARC Monographs is the third and last of a series on tobacco-related agents. Volume 83 reported on the carcinogenicity of tobacco smoke and involuntary smoking (second-hand smoke or environmental tobacco smoke) (IARC 2004a). Volume 85 summarized the evidence on the carcinogenic risk of chewing betel quid with and without tobacco (IARC 2004b). That volume explored the variety of products chewed in South Asia and other parts of the world that contain areca nut in combination with other ingredients, often including tobacco. In this eighty-ninth volume, the carcinogenic risks associated with the use of smokeless tobacco, including chewing tobacco and snuff, are considered in a first monograph. The second monograph reviews some tobacco-specific nitrosamines. These agents were evaluated earlier in Volume 37 of the Monographs (IARC 1985) and information gathered since that time has been summarized and evaluated.

Alice in Wonderland (also known as *Alice's Adventures in Wonderland*), from 1865, is the peculiar and imaginative tale of a girl who falls down a rabbit-hole into a bizarre world of eccentric and unusual creatures. Lewis Carroll's prominent example of the genre of "literary nonsense" has endured in popularity with its clever way of playing with logic and a narrative structure that has influenced generations of fiction writing.

Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

invented Flamin' Hot Cheetos in a secret test kitchen, breaking barriers and becoming the first Latino frontline worker promoted to executive at Frito-Lay. Richard Montañez is a man who made a science out of walking through closed doors, and his success story is an empowerment manual for anyone stuck in a dead-end job or facing a system stacked against them. Having taken a job mopping floors at Frito-Lay's California factory to support his family, Montañez took his future into his own hands and created the world's hottest snack food: Flamin' Hot Cheetos. This bold move not only disrupted the food industry with some much-needed spice, but also shook up a corporate culture in which everyone stayed in their lane. When a top food scientist at Frito-Lay sent out a memo telling sales and marketing to kill the new product before it made it to the store shelves—jealous that someone with no formal education beyond the sixth grade could do his job—Montañez was forced to go rogue once again to save his idea. Through creative thinking, community building, and a few powerful mindset shifts, he outsmarted the naysayers who tried to get in his way. Flamin' Hot proves that you can break out of your career rut and that your present circumstances don't have to dictate your future.

NATIONAL BESTSELLER • WINNER OF THE PULITZER PRIZE • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (San Francisco Chronicle). A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. *The Road* is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation.

Hiroshima is the story of six people—a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest—who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever

dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

He went to hell and back. Then went again. He died on the operating table and lived in a parallel universe whilst fighting for his life in a coma. Became a fugitive, captured at gun point and imprisoned in a squalid Cairo jail for a crime he did not commit. As a child he battled with relentless bullies and overcame chronic dyslexia. As a man, he cheated death survived a foreign prison and built a multi-million-dollar business, yet lost it overnight and found the strength, despite personal tragedy, to rebuild it. Again. He lives today knowing and believing that YOU can survive anything. If you want to know how to get through this thing called life - THIS is your manual.

The story of Duncan Leung ? childhood friend of Bruce Lee, disciple of legendary master Yip Man, and New York kung fu teacher ? is valuable not only for its insights into martial arts but also for its portrayal of the lost Hong Kong of the 1950s and 1960s. Each anecdote is introduced with a proverb or teaching from Chinese philosophy, and illustrations follow each fight story, making for an educational and entertaining read. The author of The Africa Cookbook presents a history of the African Diaspora on two continents, tracing the evolution of culturally representative foods ranging from chitlins and ham hocks to fried chicken and vegan soul.

I expected a hero to save us all. Turns out, I was thinking of the wrong part of the story. In the beginning, we aren't saved. The world is broken. There are only pieces and grief. Depending on the story, the fruit of grief is vengeance or justice or hardened resolve. The pieces must be gathered and flames kindled before I'm reforged. I don't know what shape I will take. Those pieces might become a hero...or a monster. A mad king's genocide destroyed Alea's home and left her sanity in tatters. The struggle between the gods and their creators fills the world with war. Caught in the crossfire of a conflict she knows little about, Alea only wants a quiet life. Trouble is, the darkness roiling in her mind may be the one thing that could end the bloodshed. A storm brews within her, and not even the gods will be safe when it breaks upon the world.

Millions of Americans use e-cigarettes. Despite their popularity, little is known about their health effects. Some suggest that e-cigarettes likely confer lower risk compared to combustible tobacco cigarettes, because they do not expose users to toxicants produced through combustion. Proponents of e-cigarette use also tout the potential benefits of e-cigarettes as devices that could help combustible tobacco cigarette smokers to quit and thereby reduce tobacco-related health risks. Others are concerned about the exposure to potentially toxic substances contained in e-cigarette emissions, especially in individuals who have never used tobacco products such as youth and young adults. Given their relatively recent introduction, there has been little time for a scientific body of evidence to develop on the health effects of e-cigarettes. Public Health Consequences of E-Cigarettes reviews and critically assesses the state of the emerging evidence about e-cigarettes and health. This report makes recommendations for the improvement of this research and highlights gaps that are a priority for future research.

In 1967, after a session with a psychiatrist she'd never seen before, eighteen-year-old Susanna Kaysen was put in a taxi and sent to McLean Hospital. She spent most of the

next two years in the ward for teenage girls in a psychiatric hospital as renowned for its famous clientele—Sylvia Plath, Robert Lowell, James Taylor, and Ray Charles—as for its progressive methods of treating those who could afford its sanctuary. Kaysen's memoir encompasses horror and razor-edged perception while providing vivid portraits of her fellow patients and their keepers. It is a brilliant evocation of a "parallel universe" set within the kaleidoscopically shifting landscape of the late sixties. *Girl, Interrupted* is a clear-sighted, unflinching document that gives lasting and specific dimension to our definitions of sane and insane, mental illness and recovery.

In her first novel since *The Quick and the Dead* (a finalist for the Pulitzer Prize), the legendary writer takes us into an uncertain landscape after an environmental apocalypse, a world in which only the man-made has value, but some still wish to salvage the authentic. Scott, *The New York Times Book Review*

Khristen is a teenager who, her mother believes, was marked by greatness as a baby when she died for a moment and then came back to life. After *Khristen's* failing boarding school for gifted teens closes its doors, and she finds that her mother has disappeared, she ranges across the dead landscape and washes up at a "resort" on the shores of a mysterious, putrid lake the elderly residents there call "Big Girl." In a rotting honeycomb of rooms, these old ones plot actions to punish corporations and people they consider culpable in the destruction of the final scraps of nature's beauty. What will *Khristen* and Jeffrey, the precocious ten-year-old boy she meets there, learn from this "gabby seditious lot, in the worst of health but with kamikaze hearts, an army of the aged and ill, determined to refresh, through crackpot violence, a plundered earth"? Rivetingly strange and beautiful, and delivered with Williams's searing, deadpan wit, *Harrow* is their intertwined tale of paradise lost and of their reasons—against all reasonableness—to try and recover something of it.

The extraordinary story of the Nazi-era scientific genius who discovered how cancer cells eat—and what it means for how we should. The Nobel laureate Otto Warburg—a cousin of the famous finance Warburgs—was widely regarded in his day as one of the most important biochemists of the twentieth century, a man whose research was integral to humanity's understanding of cancer. He was also among the most despised figures in Nazi Germany. As a Jewish homosexual living openly with his male partner, Warburg represented all that the Third Reich abhorred. Yet Hitler and his top advisors dreaded cancer, and protected Warburg in the hope that he could cure it. In *Ravenous*, Sam Apple reclaims Otto Warburg as a forgotten, morally compromised genius who pursued cancer single-mindedly even as Europe disintegrated around him. While the vast majority of Jewish scientists fled Germany in the anxious years leading up to World War II, Warburg remained in Berlin, working under the watchful eye of the dictatorship. With the Nazis goose-stepping their way across Europe, systematically rounding up and murdering millions of Jews, Warburg awoke each morning in an elegant, antiques-filled home and rode horses with his partner, Jacob Heiss, before delving into his research at the Kaiser Wilhelm Society. Hitler and other Nazi leaders, Apple shows, were deeply troubled by skyrocketing cancer rates across the Western world, viewing cancer as an existential threat akin to Judaism or homosexuality. Ironically, they viewed Warburg as Germany's best chance of survival. Setting Warburg's work against an

absorbing history of cancer science, Apple follows him as he arrives at his central belief that cancer is a problem of metabolism. Though Warburg's metabolic approach to cancer was considered groundbreaking, his work was soon eclipsed in the early postwar era, after the discovery of the structure of DNA set off a search for the genetic origins of cancer. Remarkably, Warburg's theory has undergone a resurgence in our own time, as scientists have begun to investigate the dangers of sugar and the link between obesity and cancer, finding that the way we eat can influence how cancer cells take up nutrients and grow. Rooting his revelations in extensive archival research as well as dozens of interviews with today's leading cancer authorities, Apple demonstrates how Warburg's midcentury work may well hold the secret to why cancer became so common in the modern world and how we can reverse the trend. A tale of scientific discovery, personal peril, and the race to end a disastrous disease, *Ravenous* would be the stuff of the most inventive fiction were it not, in fact, true.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

The publication of the King James version of the Bible, translated between 1603 and 1611, coincided with an extraordinary flowering of English literature and is universally acknowledged as the greatest influence on English-language literature in history. Now, world-class literary writers introduce the book of the King James Bible in a series of beautifully designed, small-format volumes. The introducers' passionate, provocative, and personal engagements with the spirituality and the language of the text make the Bible come alive as a stunning work of literature and remind us of its overwhelming contemporary relevance.

Considered by many to be 'the last important product of the Apocalyptic movement', *The Apocalypse of Abraham* is an apocryphon, a work that belongs to a body of prophetic Abrahamic literature flourishing about the time of Christ. The text details the Destruction of the Temple and thus was written after 70 AD. It is considered part of the Apocalyptic literature but not regarded as authoritative scripture.

NEW YORK TIMES BESTSELLER • This instant classic explores how we can change our lives by changing our habits. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Wall Street Journal • Financial Times In The Power of Habit, award-winning business reporter Charles Duhigg takes us to the thrilling edge of scientific discoveries that explain why habits exist and how they can be changed. Distilling vast amounts of information into engrossing narratives that take us from the boardrooms of Procter & Gamble to the sidelines of the NFL to the front lines of the civil rights movement, Duhigg presents a whole new understanding of human nature and its potential. At its core, The Power of Habit contains an exhilarating argument: The key to exercising regularly, losing weight, being more productive, and achieving success is understanding how habits work. As Duhigg shows, by harnessing this new science, we can transform our businesses, our communities, and our lives. With a new Afterword by the author “Sharp, provocative, and useful.”—Jim Collins “Few [books] become essential manuals for business and living. The Power of Habit is an exception. Do you have a real relationship with God, or do you just have a religion? Do you know God, or do you just know about God? In How Big Is Your God? Paul Coutinho, SJ, challenges us to grow stronger and deeper in our faith and in our relationship with God—a God whose love knows no bounds. To help us on our way, Coutinho introduces us to people in various world religions—from Hindu friends to Buddhist teachers to St. Ignatius of Loyola—who have shaped his spiritual life and made possible his deep, personal relationship with God.

More than 160 tales from eighty tribal groups gives us a rich and lively panorama of the Native American mythic heritage. From across the continent comes tales of creation and love; heroes and war; animals, tricksters, and the end of the world. In addition to mining the best folkloric sources of the nineteenth century, the editors have also included a broad selection of contemporary Native American voices. With black-and-white illustrations throughout Selected

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

This Surgeon General's report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco.
