The Pulitzer Prize–winning historian talks with some of twentieth century’s most iconic musicians—“Riveting . . . Just about every interview has a revelation” (San Francisco Chronicle). Through the second half of the twentieth century, Studs Terkel hosted the legendary radio show “The Wax Museum,” presenting Chicago’s music fans with his inimitable take on music of all kinds, from classical, opera, and jazz to gospel, blues, folk, and rock. Featuring more than forty of Terkel’s conversations with some of the greatest musicians of the past century, *And They All Sang* is “a tribute to music’s universality and power” (Philadelphia Inquirer). Included here are fascinating conversations with Louis Armstrong, Leonard Bernstein, Big Bill Broonzy, Bob Dylan, Dizzy Gillespie, Mahalia Jackson, Janis Joplin, Rosa Raisa, Pete Seeger, and many others. As the esteemed music critic Anthony DeCurtis wrote in the Chicago Tribune, “the terms ‘interview’ or ‘oral history’ don’t begin to do justice to what Terkel achieves in these conversations, which are at once wildly ambitious and as casual as can be.” Whether discussing Enrico Caruso’s nervousness on stage with opera diva Edith Mason or the Beatles’ 1966 encounter in London with revered Indian sitar player Ravi Shankar, “Terkel’s singular gift for bringing his subjects to life in their own words should strike a chord with any music fan old enough to have replaced a worn-out record needle” (The New York Times). “Whether diva or dustbowl balladeer, Studs treats them all alike, with deep knowledge and an intimate, conversational approach . . . as this often remarkable book shows, Studs Terkel has remained mesmerized by great music throughout his life.” —The Guardian “[Terkel’s] expertise is evident on every page, whether debating the harmonic structure of the spirituals or discerning the subtleties of Keith Jarrett’s piano technique . . . As ever, he is the most skillful of interviewers.” —The Independent “What makes *And They All Sang* a rousing success isn’t just Terkel’s phenomenal range and broad knowledge, it’s his passionate love of the music and his deep humanity.” —San Francisco Chronicle

"Solveig Hisdal is not only aware of the knowledge housed in Norway's museums, she has also learned how to use it. She has visited museums throughout the country, searching eagerly for the treasures that her ancestors left behind. She has found textiles, chests, cabinets and old folk costumes that have later become her greatest source of inspiration. This book is a result of her quest, and it shows how the creativity of the past has inspired her to make beautiful knitted designs. It contains wonderful knitting ideas for almost all occasions, from a child's christening outfit to an exquisite, knitted bridal cardigan with beads and silk. Whether you wish to be inspired by the beautiful pictures, or knit some of the outfits -- enjoy the book!"--P. [4] of cover.

Designed for teaching astrophysics to physics students at advanced undergraduate or beginning graduate level, this textbook also provides an overview of astrophysics for astrophysics graduate students, before they delve into more specialized volumes. Assuming background knowledge at the level of a physics major, the textbook develops astrophysics from the basics without requiring any previous study in astronomy or astrophysics. Physical concepts, mathematical derivations and observational data are combined in a balanced way to provide a unified treatment. Topics such as general relativity and plasma

physics, which are not usually covered in physics courses but used extensively in astrophysics, are developed from first principles. While the emphasis is on developing the fundamentals thoroughly, recent important discoveries are highlighted at every stage.

Eugenio Montale's epoch-making first book, *Cuttlefish Bones* (1925), has been hailed as one of the truly important works of poetry in the twentieth century. At once an earned poetic manifesto and spiritual autobiography, its dialogue between self and others, hope and despair, is sustained with absolute musical mastery and that simplicity-in-complexity that marks only the greatest poetry. -- W.W. Norton & Company.

Suspecting that something is amiss with their father's burial, teenager Kenneth Tyler and his sister Corrie venture to his gravesite and make a horrific discovery: their father, a whiskey bootlegger, was not actually buried in the casket they bought for him. Worse, they learn that the undertaker, Fenton Breece, has been grotesquely manipulating the dead. Armed with incriminating photographs, Tyler becomes obsessed with bringing the perverse undertaker to justice. But first, he must outrun Granville Sutter, a local strongman and convicted murderer hired by Fenton to destroy the evidence. With his poetic, haunting prose, William Gay rewrites the rules of the gothic fairytale while exploring the classic Southern themes of good and evil.

"Major Jim Gant, a man seen by many of us as the 'perfect insurgent,'--an inspiring, gifted, courageous leader... -- GENERAL DAVID H. PETRAEUS (U.S. Army, Ret.) THE PAPER THAT ROCKED OSAMA BIN LADEN Team members during the May 2, 2011 U.S. military raid that killed Osama Bin Laden seized piles of Al Qaeda intelligence. One piece of evidence found in Bin Laden's personal sleeping quarters was an English language copy of Jim Gant's *One Tribe at a Time*. It contained notes in the margins consistent with others identified as written by Osama Bin Laden. A directive from Osama Bin Laden to his intelligence chief was also discovered. It identified Jim Gant by name as an impediment to Al Qaeda's operational objectives for eastern Afghanistan. Bin Laden ordered that Gant be assassinated. "[*One Tribe at a Time*] was hugely important...at a time when I was looking for ideas on Afghanistan...[Gant] was the first to write it down, in a very coherent fashion, very readable, very encouraging frankly...and there is enormous power in that." --General David H. Petraeus (U.S.

Army, Ret.) quoted in *American Spartan: The Promise, The Mission, and The Betrayal of Special Forces Major Jim Gant* by Ann Scott Tyson Washington Post reporter Ann Scott Tyson read "One Tribe at a Time," and - informed by her combat experience in Afghanistan and Iraq and her eight years as a reporter in China - she realized that Jim's paper made sense. She decided to write a story about Jim entitled, "Jim Gant, the Green Beret who could win the war in Afghanistan." After the article appeared in January 2010, as Jim was in Washington, D.C., attending Pashto language training, he met Ann and the two fell in love. She followed his mission in Afghanistan and wrote *AMERICAN SPARTAN: The Promise, the Mission, and the Betrayal of Special Forces Major Jim Gant*.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Is music a language of the emotions? How do recorded pop songs differ from works created for live performance? Is John Cage's silent piece, 4'33', music? Stephen Davies's new book collects some of his most important papers on central topics in the philosophy of music. As well as perennial questions, Davies addresses contemporary controversies, including the impact of modern technology on the presentation and reception of both new and old musical works. Leonard Meyer proposes a theory of style and style change that relates the choices made by composers to the constraints of psychology, cultural context, and musical traditions. He explores why, out of the abundance of compositional possibilities, composers choose to replicate some patterns and neglect others. Meyer devotes the latter part of his book to a sketch-history of nineteenth-century music. He shows explicitly how the beliefs and attitudes of Romanticism influenced the choices of composers from Beethoven to Mahler and into our own time. "A monumental work. . . . Most authors concede the relation of music to its cultural milieu, but few have probed so deeply in demonstrating this interaction."—Choice "Probes the foundations of musical research precisely at the joints where theory and history fold into one another."—Kevin Korsyn, *Journal of American Musicological Society* "A remarkably rich and multifaceted, yet unified argument. . . . No one else could have brought off this immense project with anything like Meyer's command."—Robert P. Morgan, *Music Perception* "Anyone who attempts to deal with Romanticism in scholarly depth must bring to the task not only musical and historical expertise but unquenchable optimism. Because Leonard B. Meyer has those qualities in abundance, he has been able to offer fresh insight into the Romantic concept."—Donal Henahan, *New York Times*
