New edition of our best-selling IGCSE Mathematics textbook

A student-friendly and engaging resource for the 2016 Edexcel GCSE Geography B specification, this brand new course is written to match the demands of the specification. As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress.

Endorsed for Edexcel Nurture and strengthen your students' mathematical skills; these expert-written textbooks consolidate knowledge with worked examples, test key skills through practice and extend learning using enrichment activities designed to excite and challenge students. - Support and develop a deeper understanding of topics with plenty of worked examples and practice questions that follow the types of problems students are likely to face - Introduce students to content with fun activities and clear learning objectives at the start of each chapter - Build problem-solving skills with questions that test students' knowledge and comprehension - Further understanding and ignite an enthusiasm for maths with 'internet challenges' that extend learning beyond the curriculum and help to engage students - Offer a complete package of support with free downloadable resources that include detailed worked examples and answers, plus informative 'Personal Tutor' videos for each chapter

The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

A new series of bespoke, full-coverage resources developed for the 2015 GCSE Mathematics qualifications. Endorsed for the Edexcel GCSE Mathematics Higher tier specification for first teaching from 2015, this Student Book provides full coverage of the new GCSE Mathematics qualification. With a strong focus on developing problem-solving skills, reasoning and fluency, it helps students understand concepts, apply techniques, solve problems, reason, interpret and communicate mathematically. Written by experienced teachers, it also includes a solid breadth and depth of quality questions set in a variety of contexts. GCSE Mathematics Online - an enhanced digital resource incorporating progression tracking - is also available, as well as a free Teacher's Resource, Problem-solving Books and Homework Books.

This Student Book has been developed specifically for the Edexcel GCSE (9-1) Design and Technology.

This is a new edition of an existing textbook, with updated content for the 2006 syllabus. It is designed to be a student main text, and contains all you need to pass the IGCSE Extended exam.

Endorsed for Edexcel. Provide structured support and extra practice with a wealth of problem-solving and exam-style questions, in this fully updated edition written by an author team experienced in teaching and examining. - Enables students to maximise their grade potential and develop their exam skills with 700 exam-style questions. - Supports you and your students through the new specifications with over 100 additional questions addressing every part of the new syllabus such as the increase in Algebra. - Helps build problem-solving and mathematical reasoning skills with a dedicated chapter covering all topics and subject areas, with new questions to challenge the most able students. - Offers support for Higher tier students during their course and when revising for exams.

Our A level Mathematics Pure Year 2 Practice Book is a brand-new addition to the market leading and most-trusted resources for Pearson Edexcel AS and A level Mathematics, to help you get exam-ready. Coverage: The practice workbooks cover all Pure, Statistics and Mechanics topics, reflecting the style of questions seen in the summer 2018 exams. Quantity: The most A level question practice available, with over 2000 extra questions per book. Practice at the right pace: Start with the essentials, build your skills with various practice questions to make connections between topics, then apply this to exam-style questions at the end of each chapter. Get exam-ready with confidence: Differentiated questions including 'Bronze, Silver, Gold' in each chapter, and a mixed problem-solving section for each book, will guide and help you to develop the skills you need for your exams. Designed to be used flexibly, the practice books are fully mapped to the scheme of work and textbooks so you can use them seamlessly in and out of the classroom and all year round. Use them lesson by lesson, topic by topic, for homework, revision and more - the choice is yours. Great value practice materials that are cheaper than photocopying, saves more time than independently sourcing questions and answers, and are all in one place.

IGCSE Mathematics for Edexcel, 2nd edition has been updated to ensure that this second edition fully supports Edexcel's International GCSE Specification A and the Edexcel Certificate in Mathematics. Written by an experienced examiner, teacher and author, this is the perfect resource for Higher Tier students. Each chapter starts with key objectives and a starter activity to introduce students to the content, and the straightforward explanations, worked examples and practice questions which follow cover every type of problem students are likely to face in their final exam. 'Internet challenges' also ensure regular and integrated use of ICT. The book is accompanied by an interactive CD-ROM, which includes a digital version of the book, answers to all the questions and Personal Tutors to accompany every topic. Personal Tutors are interactive audio-visual presentations of worked examples which help students consolidate their learning. This Student's Book is accompanied by IGCSE Mathematics Practice for Edexcel, 2nd edition, which contains a wealth of exam-style questions, and IGCSE Mathematics Teacher's Resource for Edexcel, which provides teaching and learning support.

These resources have been created for the Cambridge IGCSE® and O Level Additional Mathematics syllabuses (0606/4037), for first examination from 2020. This coursebook gives clear explanations of new mathematical concepts followed by exercises. This allows students to practise the skills required and gain the confidence to apply them. Classroom discussion exercises and extra challenge questions have been designed to deepen students' understanding and stimulate interest in Mathematics. Answers to coursebook questions are in the back of the book.

This book contains 9 exam papers and it is aimed at May/June 2019 GCSE Mathematics examination for higher level. These papers are written according to the new 9 to 1 syllabus mainly for Edexcel, however they can still be used as practice for AQA and OCR exams as well. Each section contains 3 exam papers labelled paper 1, paper 2 & paper 3 similar to the actual exam.

Oxford's best-selling Revision and Practice books are renowned for their clear explanations and examples supported by a wealth of practice exercises and past examination questions that build students' confidence for the exams ahead. Building on the experience of earlier best-selling titles, David Rayner's new textbook provides valuable practice and challenging revision exercises for all students aiming for higher grades at GCSE. · Up-to-date curriculum coverage · New non-calculator work in line with curriculum changes · Clear explanations and worked examples · Numerous carefully constructed exercises and a section of ideas for longer investigations to encourage students to use and apply the mathematics they have learnt · Practice exam questions · Numerical answers to all questions
