"You can be lonely anywhere, but there is a particular flavor to the loneliness that comes from living in a city, surrounded by thousands of strangers. *The Lonely City*

is a roving cultural history of urban loneliness, centered on the ultimate city: Manhattan, that teeming island of gneiss, concrete, and glass. What does it mean to be lonely? How do we live, if we're not intimately involved with another human being? How do we connect with other people, particularly if our sexuality or physical body is considered deviant or damaged? Does technology draw us closer together or trap us behind screens? Olivia Laing explores these questions by travelling deep into the work and lives of some of the century's most original artists, among them Andy Warhol, David Wojnarowicz, Edward Hopper, Henry Darger and Klaus Nomi. Part memoir, part biography, part dazzling work of cultural criticism, *The Lonely City* is not just a map, but a celebration of the state of loneliness. It's a voyage out to a strange and sometimes lovely island, adrift from the larger continent of human experience, but visited by many - millions, say - of souls"--

Central Americans are one of the largest Latino population groups in the United States. Yet, Arturo Arias argues, the cultural production of Central Americans remains little known to North Americans. In *Taking Their Word*, Arias complicates notions of the cultural production of Central America, from Mexico in the North to Panama in the South. He charts the literature of Central America's liberation struggles of the 1970s and 1980s, its transformation after peace treaties were signed, the emergence of a new Maya literature that decenters Latin American literature written in Spanish, and the rise and fall of testimonio. Arias demonstrates that Central America and its literature are marked by an

indigenoussness that has never before been fully theorized or critically grasped. Never one to avoid controversy, Arias proffers his views of how the immigration of Central Americans to North America has changed the cultural topography of both zones. With this groundbreaking work, Arias establishes the importance of Central American literature and provides a frame for future studies of the region's culture. Arturo Arias is director of Latin American studies at the University of Redlands. He is the author of six novels in Spanish and editor of *The Rigoberta Mench Controversy* (Minnesota, 2001).

Toni has always had nightmares about fire, and she also has burn scars but no idea how she got them. So when fire destroys the orphanage she has grown up in, she is ready to make her way to Toronto, where she hopes to discover the truth about the mother she believes hurt and then abandoned her. Toronto proves to be both daunting and exciting for Toni, whose charm and innocence attract attention—not always positive—wherever she goes. Buoyed by the music she hears at the folk club where she finds a job, and encouraged by her glamorous landlady, Toni unearths shocking information that contradicts everything she believes and makes her re-evaluate what she feels for all the new people in her life. Part of the SECRETS—a series of seven linked novels that can be read in any order.

East Germany behind. There's one escape route open to them, but can they survive it? Hanna and Andreas have always been friends. When they're expelled from school for activism directly challenging the socialist state in East Germany, they end up doing factory work. But what kind of life do they have to look forward to without education or opportunity? Especially when they aren't allowed a voice? The choice to risk imprisonment or death by escaping to the democratic West seems like a risk worth taking. They set out to swim twenty-five hours across the choppy waters of the Baltic Sea. Linke's storytelling achieves a delicate balance between heightened moments of danger--searchlights, jellyfish, a Russian helicopter, a violent summer storm--and the monotony, ineffable fatigue, physical pain, cramping, fear, and hope that fill the rest of the journey. A memorable tale of two people risking all for a chance at freedom.

Drawing is thinking, thinking is moving. These words summarize the layered work of Belgian artist Ronny Delrue (b. 1957). For many years, drawing has been central to his oeuvre. On the one hand, a drawing is an autonomous artwork, but on the other hand it is the direct crystallization of a fleeting line of thought that systematically opens the door to new work. Drawing is therefore not only the result, but also the engine of creativity for the artist, especially in the case of Delrue who not only "draws" with pencil and paper, but also with photographs, ceramics, and other materials. For Delrue, drawing is the culmination of a mental image, and the genesis of the image and its immediate meaning are contained in the lines of the drawing itself. That is

why his drawings offer an intimate look inside the mind of an artist who, on the basis of his own reality — shaped by memories, emotions, and opinions — recreates the world a little bit on every page. For this book, Philippe Van Cauteren (director of S.M.A.K., Ghent) selected a series of important drawings from Delrue's extensive corpus. Three different authors focus on this selection and have shed light on the importance of the drawing in Delrue's practice. Copublished with Hannibal

Translated by Gregory Rabassa, winner of the National Book Award for Translation, 1967 Horacio Oliveira is an Argentinian writer who lives in Paris with his mistress, La Maga, surrounded by a loose-knit circle of bohemian friends who call themselves "the Club." A child's death and La Maga's disappearance put an end to his life of empty pleasures and intellectual acrobatics, and prompt Oliveira to return to Buenos Aires, where he works by turns as a salesman, a keeper of a circus cat which can truly count, and an attendant in an insane asylum.

Hopscotch is the dazzling, freewheeling account of Oliveira's astonishing adventures.

Edwin Hubble: Mariner of the Nebulae is both the biography of an extraordinary human being and the story of the greatest quest in the history of astronomy since the Copernican revolution. The book is a revealing portrait of scientific genius, an incisive engaging history of ideas, and a shimmering evocation of what we see when gazing at the stars. science. Hubble worked with the great 100-inch Hooker telescope at California's Mount Wilson Observatory and made a series of discoveries that revolutionized humanity's vision of the cosmos. In 1923 he was able to confirm the existence of other nebulae (now known to be galaxies) beyond our own Milky Way. By the end of the decade, Hubble had proven that the universe is expanding, thus laying the very cornerstone of the big bang theory of creation. It was Hubble who developed the elegant scheme by which the galaxies are classified as ellipticals and spirals, and it was Hubble who first provided reliable evidence that the universe is homogeneous, the same in all directions as far as the telescope can see. An incurable Anglophile with a penchant for tweed jackets and English briars, Hubble, together with his brilliant and witty wife, Grace Burke, became a fixture in Hollywood society in the 1930s and 40s. They counted among their friends Charlie Chaplin, the Marx brothers, Anita Loos, Aldous and Maria Huxley, Walt Disney, Helen Hayes, and William Randolph Hearst. Albert Einstein, a frequent visitor to Southern California, called Hubble's work "beautiful" and modified his equations on relativity to account for the discovery that the cosmos is expanding.

summer he turns 15, but as its title suggests *The Incredible Here and Now* is a tale of wonder, not of tragedy. Presented as a series of vignettes, in the tradition of Sandra Cisneros' Young Adult classic *The House on Mango Street*, it tells of Michael's coming of age in a year which brings him grief and romance; and of the place he lives in Western Sydney where 'those who don't know any better drive through the neighbourhood and lock their car doors', and those who do, flourish in its mix of cultures. Through his perceptions, the reader becomes familiar with Michael's community and its surroundings, the unsettled life of his family, the girl he meets at the local pool, the friends that gather in the McDonalds parking lot at night, the white Pontiac Trans Am that lights up his life like a magical talisman.

This is part 2 of a 3 volume series for middle school students. Katie likes to believe she's invisible. It seems so much safer than being exposed as who she is: shy, poor, and vulnerable. So getting up in front of audience as the lead in her school's production of *The Taming of the Shrew* should be complete torture. But as Katie tells it, something totally unexpected happened when she stepped on stage: "My head exploded. I loved it. Acting hit me like a sucker punch and I loved, loved, loved it! Invisible Katie became visible Katherina." Evan is, as they say, another story. He knows just what it takes to get noticed, and he uses every one of the skills he's perfected from years of being the new kid at yet another new school. Rich, smart, and ridiculously charming, he's like nothing and no one Katie has ever encountered. How then could someone like him possibly be interested in someone like her? But before she knows it they are inseparable. Over the dizzying course of their relationship, Katie must confront the fact that the power of love can conceal darker truths.

Applying the general deterministic approach of systems computational biology, the monograph considers questions related to the biomechanics of the human urinary bladder in conjunction with the peripheral and central nervous systems. The step-by-step development of mathematical models of separate structural elements and their assembly into a unique self-regulatory system offers, for the first time, a holistic overview and allows the investigation of the dynamics of the lower urinary tract system at its hierarchical levels. This book provides a coherent description and explanation for intertwined intracellular pathways in terms of spatiotemporal, whole body, tractable representations which are supported by numerous computational simulations. Key Features It reconstructs accurately the cytoarchitecture and morphofunctional relationships between the elements of the central nervous (brain) and genitourinary (urinary bladder system). Offers for the first time a both quantitative and qualitative, assessment of the neurohormonal and mechanobiological processes involved in the process. Provides a comprehensive description for intertwined regulatory pathways in terms of spatiotemporal dynamic representations. Encourages the reader to develop and apply a unique holistic approach to solving complex biomedical problems in the area of growth and remodeling of the urinary bladder through application of modern methods of computational biology.
