Between the wars the French produced some of the largest, and certainly the fastest, destroyers in the world. Known as Contre-Torpilleurs, these striking and innovatory super-destroyers form the core of this book, but the more conventional Torpilleurs d'Escadre are also covered. This history combines the technical and service material published in French-language monographs over the past two decades with the authors' own research from primary sources. The structure of the book follows that of the highly successful French Cruisers, with Part I devoted to the design of each of the classes built after 1922. The text is accompanied by detailed data tables and illustrated by a comprehensive set of specially-drawn plans and schemas based on official documents, as well as carefully-selected photographs from French naval sources and from private collections. Coverage runs down to the Le Hardi class, the last pre-war design.. Part II deals with the historical side, covering the eventful careers of these ships before, during and after the war. This section is illustrated by maps specially drawn for the book, and by contemporary photographs. Like its highly successful predecessors, French Battleships and French Cruisers, this beautifully presented book blends technical and historical analysis to produce what must become the standard English-language reference work.

Selected by the Modern Library as one of the 100 best nonfiction books of all time The Proud Tower, the Pulitzer Prize-winning The Guns of August, and The Zimmerman Telegram comprise Barbara W. Tuchman's classic histories of the First World War era In this landmark, Pulitzer Prize-winning account, renowned historian Barbara W. Tuchman recreates the first month of World War I: thirty days in the summer of 1914 that determined the course of the conflict, the century, and ultimately our present world. Beginning with the funeral of Edward VII, Tuchman traces each step that led to the inevitable clash. And inevitable it was, with all sides plotting their war for a generation. Dizzily comprehensive and spectacularly portrayed with her famous talent for evoking the characters of the war's key players, Tuchman's magnum opus is a classic for the ages. Praise for The Guns of August "A brilliant piece of military history which proves up to the hilt the force of Winston Churchill's statement that the first month of World War I was 'a drama never surpassed.'"—Newsweek "More dramatic than fiction . . . a magnificent narrative—beautifully organized, elegantly phrased, skillfully paced and sustained."—Chicago Tribune "A fine demonstration that with sufficient art rather specialized history can be raised to the level of literature."—The New York Times "[The Guns of August] has a vitality that transcends its narrative virtues, which are considerable, and its feel for characterizations, which is excellent."—The Wall Street Journal

A definitive Pulitzer Prize-winning recreation of the powderkeg that was Europe during the crucial first thirty days of World War I traces the actions of statesmen and patriots alike in Berlin, London, St. Petersburg, and Paris. Reprint.

This collection aims to enable the reader to disentangle some of the ambiguities and confusions which have characterized the use of the term 'historiography'.

Groundbreaking surveys of the complex interrelationship between the languages of English and French in medieval Britain.

A sustained philosophical engagement with significant and creative French interpreters of Heidegger.

The scenario of the wargame that will be used will reinforce four key factors for the campaign's success, and if the original Schlieffen Plan had been maintained, they would certainly have been thought and executed: more siege artillery for the early phase of the maneuver of attack on the Belgian forts; better preparation and use of communications; logistics with more support troops, particularly to the far right wing, and with the possibility of tapping into enemy sources of conquest; and fewer troops withdrawn to serve the Russian front.

Themes in the Historical Geography of France compiles several selected themes in the historical geography of France. This book discusses the practice of historical geography in France; peopling and the origins of settlement; early urban development; and retreat of rural settlement. The regional contrasts in agrarian structure; reclamation of coastal marshland; petite culture on 1750-1850; and reclamation of wasteland during the 18th and 19th centuries are also elaborated. This compilation likewise covers the historical geography of Western France; urban growth on 1500-1900; and agricultural change and industrial development in the 18th and 19th centuries. This publication is beneficial to historians and geographers aiming to acquire knowledge of the historical geography of France.

Marginalized by the scientific age the lessons of the senses have been overtaken by the dominance of language and the information revolution. With *The Five Senses* Serres traces a topology of human perception, writing against the Cartesian tradition and in praise of empiricism, he demonstrates repeatedly, and lyrically, the sterility of systems of knowledge divorced from bodily experience. The fragile empirical world, long resistant to our attempts to contain and catalog it, is disappearing beneath the relentless accumulations of late capitalist society and information technology. Data has replaced sensory pleasure, we are less interested in the taste of a fine wine than in the description on the bottle's label. What are we, and what do we really know, when we have forgotten that our senses can describe a taste more accurately than language ever could? The book won the inaugural Prix Médicis Essai in 1985. The Revelations edition includes an introduction by Steven Connor.

In all six of its volumes *The Broadview Anthology of British Literature* presents British literature in a truly distinctive light. Fully grounded in sound literary and historical scholarship, the anthology takes a fresh approach to many canonical authors, and includes a wide selection of work by lesser-known writers. The anthology also provides wide-ranging coverage of the worldwide connections of British literature, and it pays attention throughout to issues of race, gender, class, and sexual orientation. It includes comprehensive introductions to each period, providing in each case an overview of the historical and cultural as well as the literary background. It features accessible and engaging headnotes for all authors, extensive explanatory annotations, and an unparalleled number of illustrations and contextual materials. Innovative, authoritative and comprehensive, *The Broadview Anthology of British Literature* has established itself as a leader in the field. The full anthology comprises six bound volumes, together with an extensive website component; the latter has been edited, annotated, and designed according to the same high standards as the bound book component of the anthology, and is accessible by using the passcode obtained with the purchase of one or more of the bound volumes. The two-volume *Broadview Anthology of British Literature: Concise Edition* provides an attractive alternative to the full six-volume anthology. Though much more compact, the Concise Edition nevertheless provides instructors with substantial choice, offering both a strong selection of canonical authors and a sampling of lesser-known works. With an unparalleled number of illustrations and contextual materials, accessible and engaging introductions, and full explanatory annotations, this edition of the acclaimed *Broadview Anthology* provides concise yet wide-ranging coverage for British literature survey courses. Sylvia Townsend Warner, Stevie Smith, J.M. Coetzee, Eavan Boland, and Zadie Smith are among those given full author entries for the first time. There are also new selections by a number of authors who were already included in the anthology—among them Seamus Heaney, Margaret Atwood, and Carol Ann Duffy. There are new contextual materials as well—including material on “The Natural, the Supernatural, and the Sublime” in the Age of Romanticism section, and material on “The New Art of Photography” in *The Victorian Era*. The new edition concludes with a new section offering a range of poetry, fiction, and non-fiction prose under the heading “Literature, Politics, and Cultural Identity in the Late Twentieth- and Early Twenty-first Centuries.” The Concise edition will also now include a substantial website component, providing for much greater flexibility. And an increasing number of works from the full six-volume anthology (or from its website component) are being made available in stand-alone *Broadview Anthology of British Literature* editions. (Tennyson’s *In Memoriam*, for example, which was previously included in these pages, will now be available both as part of a stand-alone *Broadview Anthology of British Literature* edition of Tennyson’s selected poetry and as part of the website component of the anthology’s Concise Edition.)

This book examines how the fall of France in the Second World War has been recorded by historians and remembered within society. It argues that explanations of the fall have usually revolved around the four main themes of decadence, failure, constraint and contingency. It shows that the dominant explanation claimed for many years that the fall was the inevitable consequence of a society grown rotten in the inter-war period. This view has been largely replaced among academic historians by a consensus which distinguishes between the military defeat and the political demise of the Third Republic. It emphasizes the contingent factors that led to the military defeat. At the same time it seeks to understand the constraints within which France’s policy-makers were required to act and the reasons for their policy-making failures in economics, defence and diplomacy.

Wrapped in myth and distortion, the Battle of Verdun is one of the most enigmatic battles of the Great War, and the controversy continues a century later. Before the battle the Germans believed they had selected one of the strongest points in the French defences in the hope that, if they smashed through it, the French would collapse. But Verdun was actually a hollow shell since its forts were largely disarmed and the trench lines were incomplete. So why did the Germans fail to take Verdun? As well as seeking to answer this fundamental question, the authors of this perceptive new study reconsider other key aspects of the battle the German deployment of stormtroopers, the use of artillery and aircraft, how the French developed the idea of methodical battle which came to dominate their military thought after the war. They look too at how Verdun brought about a renaissance of fortress engineering that resulted in the creation of the Maginot Line and the other fortifications constructed in Europe before the Second World War.

This is the first scholarly study of the prewar phase of the French army's development into a disruptive force in national life. A chapter from the portentous 20th-century story of the soldier in politics, it has relevance to contemporary situations in other western societies. The book includes an encyclopedic bibliography.

This book, first published in 1952, gives a detailed first-hand account by its commanding officer of the French First Army, from its successful landings in the South of France through its liberation of Marseilles and breakout across the Rhine and victory beyond the Danube. It is a remarkable campaign, overshadowed by the armies of the British and Americans in Northern Europe, and detailed here with precision and passion by one of France’s leading military minds.

In 1859 the French navy was at a high point, having fought alongside the British in the Crimean War and developed a formidable fleet of fast wooden-hulled steam ships of the line. But in that very year the world’s navies had to start over again when French naval architect Dupuy de Lôme introduced the ironclad battleship. The French navy then went through three tumultuous phases. In the 1860s and 1870s it focused on building a new traditionally-structured fleet in which wooden-hulled battleships gave way to iron and steel ships with massive guns and armour. In the 1880s and 1890s this effort was disrupted by a vigorous contest between battleship sailors and advocates of fast steel cruisers and small torpedo craft, leaving France by the end of the 1890s with few new battleships (none as large as the best foreign ships) but some two hundred torpedo boats. The Fashoda crisis in 1898 revealed the weakness of the French navy and between 1900 and 1914 the French focused on building a strong battle fleet. In 1914 this fleet remained well behind those of Britain and Germany in numbers, but taken individually French warships remained among the best in the world. This book is the first comprehensive listing in English of the over 1400

warships that were added to the official French navy fleet list between 1 January 1859 and World War I. It includes everything from the largest battleships to a small armoured gunboat that looked like a floating egg. The ships are listed in three separate parts to keep contemporary ships together and then by ship type and class. For each class the book provides a design history explaining why the ships were built, substantial technical characteristics for the ships as completed and after major reconstructions, and selected career milestones including the ultimate fate of each ship. Like its predecessors written jointly with Rif Winfield, *French Warships in the Age of Sail 1626-1786* and *French Warships in the Age of Sail 1786-1861*, with which it forms the third in a trilogy, it provides a complete picture of the overall development of French warships over a period of almost three centuries.

Few nations have such a long and rich history as France. This indispensable volume covers political, economic, and cultural milestones throughout its long and fascinating history. • Includes a timeline of significant events in the history of France, providing students with an at-a-glance overview of France's history • Offers an appendix of Notable People in the History of France to give readers with brief biographies of those who have made important contributions to the country's history • Presents photos and maps to provide additional context for and support the text • Includes an annotated bibliography to give readers detailed information on resources for further study

In this debut memoir, a James Beard Award-winning writer, whose childhood idea of fine dining was Howard Johnson's, tells how he became one of Paris's most influential food critics. Until Alec Loblano landed a job in the glamorous Paris office of *Women's Wear Daily*, his main experience of French cuisine was the occasional supermarket éclair. An interview with the owner of a renowned cheese shop for his first article nearly proves a disaster because he speaks no French. As he goes on to cover celebrities and couturiers and improves his mastery of the language, he gradually learns what it means to be truly French. He attends a cocktail party with Yves St. Laurent and has dinner with Giorgio Armani. Over a superb lunch, it's his landlady who ultimately provides him with a lasting touchstone for how to judge food: "you must understand the intentions of the cook." At the city's brasseries and bistros, he discovers real French cooking. Through a series of vivid encounters with culinary figures from Paul Bocuse to Julia Child to Ruth Reichl, Loblano hones his palate and finds his voice. Soon the timid boy from Connecticut is at the epicenter of the Parisian dining revolution and the restaurant critic of one of the largest newspapers in the France. A mouthwatering testament to the healing power of food, *My Place at the Table* is a moving coming-of-age story of how a gay man emerges from a wounding childhood, discovers himself, and finds love. Published here for the first time is Loblano's "little black book," an insider's guide to his thirty all-time-favorite Paris restaurants.

NATIONAL BESTSELLER • Julia's story of her transformative years in France in her own words is "captivating ... her marvelously distinctive voice is present on every page." (*San Francisco Chronicle*). Although she would later singlehandedly create a new approach to American cuisine with her cookbook *Mastering the Art of French Cooking* and her television show *The French Chef*, Julia Child was not always a master chef. Indeed, when she first arrived in France in 1948 with her husband, Paul, who was to work for the USIS, she spoke no French and knew nothing about the country itself. But as she dove into French culture, buying food at local markets and taking classes at the Cordon Bleu, her life changed forever with her newfound passion for cooking and teaching. Julia's unforgettable story—struggles with the head of the Cordon Bleu, rejections from publishers to whom she sent her now-famous cookbook, a wonderful, nearly fifty-year long marriage that took the Childs across the globe—unfolds with the spirit so key to Julia's success as a chef and a writer, brilliantly capturing one of America's most endearing personalities.

From four stunning and accomplished French women—at last—a fresh and spirited take on what it really means to be a Parisienne: how they dress, entertain, have fun and attempt to behave themselves. In short, frisky sections, these Parisian women give you their very original views on style, beauty, culture, attitude and men. The authors—Anne Berest, Audrey Diwan, Caroline de Maigret, and Sophie Mas—unmarried but attached, with children—have been friends for years. Talented bohemian iconoclasts with careers in the worlds of music, film, fashion and publishing, they are untypically frank and outspoken as they debunk the myths about what it means to be a French woman today. Letting you in on their secrets and flaws, they also make fun of their complicated, often contradictory feelings and behavior. They admit to being snobs, a bit self-centered, unpredictable but not unreliable. Bossy and opinionated, they are also tender and romantic. You will be taken on a first date, to a party, to some favorite haunts in Paris, to the countryside, and to one of their dinners at home with recipes even you could do -- but to be out with them is to be in for some mischief and surprises. They will tell you how to be mysterious and sensual, look natural, make your boyfriend jealous, and how they feel about children, weddings and going to the gym. And they will share their address book in Paris for where to go: *At the End of the Night*, for *A Birthday*, for *a Smart Date*, *A Hangover*, for *Vintage Finds* and much more. *How to Be Parisian Wherever You Are* will make you laugh as you slip into their shoes to become bold and free and tap into your inner cool.

This book, coinciding with the sixtieth anniversary of the Liberation of France, takes a unique approach to the events of 1944, by seeing them as shared experiences which brought ordinary Anglo-Americans and French people into contact with each other in a variety of different communities. The book looks at the Liberation through 5 case-studies: Normandy, Cherbourg, Provence, the Pyrénées-Orientales and Reims, and uses the words of participants at the time to describe the developing relationship between Liberators and Liberated.

Once-dominant images of the First World War as a futile contest fought by innocent soldiers and wasteful generals have given way to more sophisticated scholarly analyses. This volume presents some of the most innovative work of this new generation of research on the War to End All Wars. Taking a global and comparative perspective, these essays place the War in a wide global and thematic context, greatly enhancing our understanding of one of the most important and complex events of the 20th Century.

It is widely assumed that the French in the British Isles during the Second World War were fully fledged supporters of General de Gaulle, and that, across the channel at least, the French were a 'nation of resisters'. This study reveals that most exiles were on British soil by chance rather than by design, and that many were not sure whether to stay. Overlooked by historians, who have concentrated on the 'Free French' of de Gaulle, these were the 'Forgotten French': refugees swept off the beaches of Dunkirk; servicemen held in camps after the Franco-German armistice; Vichy consular officials left to cater for their compatriots; and a sizeable colonist community based mainly in London. Drawing on little-known archival sources, this study examines the hopes and fears of those communities who were bitterly divided among themselves, some being attracted to Pétain as much as to de Gaulle.

As the United States Third Army's tanks moved through Avranches, no one, not even the Third Army's commander, Lieutenant General George S. Patton, could have foreseen that it was the start of one of the most successful offensives of World War II—an offensive that received a great deal of help from the air. As Patton later wrote to the chief of the Army Air Forces, "For about 250 miles I have seen the calling cards of the fighter-bombers, which are bullet marks in the pavement and burned tanks and trucks in the ditches." This book covers the units in the Ninth Air Force, which gave close air support to the Third Army, and the Third Army's campaign in France from August to November 1944, with special emphasis on how support from the air helped the Third Army continue pushing toward the German border. The difficult logistics of the operation are discussed in detail: Both the Ninth Air Force and the Third Army were hurt by a lack of materiel, especially gasoline, and this affected the offensive.

Remembering the Second World War brings together an international and interdisciplinary cast of leading scholars to explore the remembrance of this conflict on a global scale. Conceptually, it is premised on the need to challenge nation-centric approaches in memory studies, drawing strength from recent transcultural, affective and multidirectional turns. Divided into four thematic parts, this book largely focuses on the post-Cold War period, which has seen a notable upsurge in commemorative activity relating to the Second World War and significant qualitative changes in its character. The first part explores the enduring utility and the limitations of the national frame in France, Germany and China. The second explores transnational transactions in remembrance, looking at memories of the British Empire at war, contested memories in East-Central Europe and the transnational campaign on behalf of Japan's former 'comfort women'. A third section considers local and sectional memories of the war and the fourth analyses innovative practices of memory, including re-enactment, video gaming and Holocaust tourism. Offering insightful contributions on intriguing topics and illuminating the current state of the art in this growing field, this book will be essential reading for all students and scholars of the history and memory of the Second World War.

Youth has been represented on screen for decades and has informed many directors' visual, narrative and social perspectives, but there has not been a body of work addressing the richness and complexity of this topic in a French and Francophone context. This volume offers new insights into the works of emerging and well-established directors alike, who all chose to place youth at the heart of their narrative and aesthetic concerns. Showing how the topic of 'youth' has inspired filmmakers to explore and reinvent common tropes associated with young people, the book also addresses how the representation of youth can be used to mirror the tensions - political, social, religious, economic or cultural - that agitate a society at a given time in its history.

Essays dealing with the controversial concept of the "work", and how far social and cultural practices are integral to it.
