Tozer Speaks: Volume One is the first volume of a 2-volume set that contains compelling and authoritative teachings of A.W. Tozer in an easy to read format. A.W. Tozer's sharp and incisive preaching and writing style will startle some readers. Others will chuckle. But everyone will agree, "No one could say it like Tozer!" Contained within this gem and treasure of his work are selections from his pulpit ministry: messages on the Holy Spirit, sermons from the Gospel of John, essays on spiritual perfection, sermons in Peter's First Epistle, sermons on well-known and favorite Bible texts, sermons relating to the life and ministry of the Christian church, sermons on the voices of God and his calling of man. An unnamed layman at A.W. Tozer's Southside Alliance church in Chicago once stated, "Dr. Tozer had not been with us long before we knew we had a prophet of God in our midst. It was then that we felt constrained to begin putting his Sunday morning and evening sermons on tape."

Western civilization was built on the concept of God. Today modern science, based on the critical method and so-called objective facts, denies even the existence of our soul. There is only matter: atoms, molecules, and DNA sequences. There is no freedom; there are no well-grounded beliefs. The decline of Western civilization is not the simple consequence of decadence, hedonism, and malevolence. Modern critical science has liberated us from the old dogmas but failed to establish our freedoms, values, and beliefs. However, human

knowledge is not objective but personal. We are the children of evolution. Everybody sees the world from his own personal point of view anchored into his/her body. We use our billions-of-years-old evolutionary skills and thousands-of-years-old cultural heritage to recognize and acknowledge the personal facts of our reality, freedom, and most important natural beliefs: respect and speak the truth. In reality, even science itself is based on our personal knowledge. Only our false conceptual dichotomies paralyze our thinking. God or matter?--there is a third choice: the emergence of life and human persons. This is the only way to defend our freedoms and the Christian moral dynamism of free Western societies.

A Wall Street Journal bestseller and a USA Today Best Book of 2020! Named Energy Writer of the Year for The New Map by the American Energy Society Pulitzer Prize-winning author and global energy expert, Daniel Yergin offers a revelatory new account of how energy revolutions, climate battles, and geopolitics are mapping our future. The world is being shaken by the collision of energy, climate change, and the clashing power of nations in a time of global crisis. Out of this tumult is emerging a new map of energy and geopolitics. The “shale revolution” in oil and gas has transformed the American economy, ending the “era of shortage” but introducing a turbulent new era. Almost overnight, the United States has become the world's number one energy powerhouse. Yet concern about energy's role in climate change is challenging the global economy and way of life, accelerating a second energy revolution in

the search for a low-carbon future. All of this has been made starker and more urgent by the coronavirus pandemic and the economic dark age that it has wrought. World politics is being upended, as a new cold war develops between the United States and China, and the rivalry grows more dangerous with Russia, which is pivoting east toward Beijing. Vladimir Putin and China's Xi Jinping are converging both on energy and on challenging American leadership, as China projects its power and influence in all directions. The South China Sea, claimed by China and the world's most critical trade route, could become the arena where the United States and China directly collide. The map of the Middle East, which was laid down after World War I, is being challenged by jihadists, revolutionary Iran, ethnic and religious clashes, and restive populations. But the region has also been shocked by the two recent oil price collapses--and by the very question of oil's future in the rest of this century. A master storyteller and global energy expert, Daniel Yergin takes the reader on an utterly riveting and timely journey across the world's new map. He illuminates the great energy and geopolitical questions in an era of rising political turbulence and points to the profound challenges that lie ahead.

The Soul of Me Speaks Volume 2 is a continuation to inspire, motivate and uplift individuals through a holistic approach of healing through spoken word, the quote of love and journaling. The journey of The Soul of Me Speaks started as a Segway of restoring my soul to speak on it, live out loud and long for a change. The purpose was to ignite gifts, proclaim liberation and freedom from trauma, drama and pain that I endured through this journey of life. The book is completely interactive, my desire for you is read and journal whatever your soul speaks. Ms. Unbelievable E. K

Just as Jesus shows us the character of God, diving deeper into the events surrounding his birth gives us a better understanding of that character. Christmas is so much more than the holiday we've turned it into. It's the birth of a promise-

God's promise to redeem humankind to himself. Sending Jesus was always God's plan, and there is something for us to learn in every detail surrounding his birth. Christmas Speaks is a simple yet perceptive devotional that's broken down into easily understood segments that weave together scripture and insight, giving the reader a deeper understanding of the vast love God has for us and how we should respond to that love. Each chapter examines a different aspect of the Christmas narrative. As we come to better know the people central to this story, we can begin to apply aspects of their character to our own lives for a more meaningful relationship with God. By coming to a deeper understanding of scripture, we can see how God speaks to the world-if we have ears to listen. Reflect on the words within these pages, and receive what the Holy Spirit has for you.

Energy will be a most important topic in the 1980s. The speed with which a dozen or more trends will develop will be critical. Most of these trends are interdependent and interacting, and include: - the degree of constraint on oil and gas supplies exercised by the producers, whether inside or outside the OPEC, as they each attempt to match production to their own energy needs and the funding of their own economic growth from exports, - the depth of the appreciation by industrialized countries that energy supplies will be tight and fossil fuels will be very expensive at least until the end of the century, - the actions taken by those countries to ameliorate this situation, in exploration for new oil and gas sources, in exploitation effort for new coal supplies, in acceptance of the need for expansion of nuclear energy supplies, - the balancing of energy supply and demand in centrally-planned economies, - the rate of development within developing countries, including China, - the development and adoption of unconventional energy sources, - the

adaptation of the world financial system to new situations. These examples highlight some of the continuing problems in the energy field. These problems will be discussed in all sorts of meetings of all sorts of people in all sorts of places and through all forms of the communication media. Other trends will materialize and take the centre of the stage, often only for a short time. The sacred Flower of Life pattern, the primary geometric generator of all physical form, is explored in even more depth in this volume, the second half of the famed Flower of Life workshop. The proportions of the human body, the nuances of human consciousness, the sizes and distances of the stars, planets and moons, even the creations of humankind, are all shown to reflect their origins in this beautiful and divine image. Through an intricate and detailed geometrical mapping, Drunvalo Melchizedek shows how the seemingly simple design of the Flower of Life contains the genesis of our entire third-dimensional existence. From the pyramids and mysteries of Egypt to the new race of Indigo children, Drunvalo presents the sacred geometries of the Reality and the subtle energies that shape our world. We are led through a divinely inspired labyrinth of science and stories, logic and coincidence, on a path of remembering where we come from and the wonder and magic of who we are. Finally, for the first time in print, Drunvalo shares the instructions for the Mer-Ka-Ba meditation, step-by-step techniques for the re-creation of the energy field of the evolved human, which is the key to ascension and the next dimensional world. If done from love, this ancient process of breathing prana opens up for us a world of

tantalizing possibility in this dimension, from protective powers to the healing of oneself, of others and even of the planet. Embrace the expanded vision and understanding that Drunvalo offers to the world.

Coincidences abound, miracles flourish and the amazing stories of mysteries unveiled arise as the author probes the Ancient Secrets of the Flower of Life.

This classic book (volume two of three volumes) is almost exclusively concerned with quantum electrodynamics. As such, it is retrospective in its subject matter. The topics discussed range from anomalous magnetic moments and vacuum polarization, in a variety of applications, to the energy level displacements in hydrogenic atoms, with occasional excursions into nuclear and high-energy physics. Based as it is upon the conceptually and computationally simple foundations of source theory, little in the way of formal mathematical apparatus is required, and thus most of the book is devoted to the working out of physical problems.

James Joseph Sylvester (1814-97) was an English mathematician who made key contributions to numerous areas of his field and was also of primary importance in the development of American mathematics, both as inaugural Professor of Mathematics at Johns Hopkins University and founder of the American Journal of Mathematics. Originally published in 1908, this book forms the second in four volumes of Sylvester's mathematical papers, covering the period from 1854 to 1873. Together these volumes provide a comprehensive resource that will be of value to anyone with an interest in Sylvester's theories and the history of mathematics. Building a house requires certain steps to be completed; so does creating a successful life. The three books in this series detail the process of becoming the Master of your Life, raising your vibration, and creating the life that you desire. Synthesizing the metaphysical and life teachings of the ancient wisdoms, modern spiritual teachers, and quantum physics, each chapter provides practical steps for application. While each book stands alone, together they form a complete system for Dancing with the Energy Book 1: The Foundations of Conscious Living presents the blueprint, the tools, and the raw materials for constructing the life you desire along with tips for developing skill in applying these tools. Book 2: Conscious Living—What's Holding You Back? analyzes and discusses the constraints that you must deal with in order to actually become the Master of your life. Book 3: Conscious Living—Creating the Life You Desire provides additional tools and techniques necessary to actually create the life you desire using the concepts and tools in Book 1 and within the constraints detailed in Book 2. One of the most powerful of the Seth Books, this essential guide to conscious living clearly and powerfully articulates the furthest reaches of human potential, and the concept that we all create our own reality according to our individual beliefs. Having withstood the test of time, it is still considered one of the most dynamic and brilliant maps of inner reality available today. “The Seth books present an alternate map of reality with a new diagram of the psyche . . . useful to all explorers of consciousness.” — Deepak Chopra “Seth was one of my first metaphysical teachers. He remains a constant source of knowledge and inspiration in my life.” — Marianne Williamson “I would like to see the Seth books as required reading for anyone on their spiritual pathway.
