Hi! My name is Bruce Stirling. Welcome to Power Synonyms. Power Synonyms is based on my innovative vocabulary strategy I call synonym substitution. This is how it works. First, I look at your active English vocabulary. Your active English vocabulary contains English words you know. Because you know them, you use them correctly, for example, a word like MANY. Now here is the problem: On test day, if you use MANY when speaking or writing, will it increase your score? No. Why not? Because MANY does not demonstrate academic language use, the very thing the raters are looking for. But wait. What if you substitute MANY with the power synonym MYRIAD? Compare the two sentences below. Which demonstrates academic word choice when writing and/or speaking? Which will score higher on test day? 1. The world has many problems, 2. The world has myriad problems. That's right. Sentence two-and all you did was change MANY to MYRIAD. Easy, right? That is synonym substitution. That is Power Synonyms!

This book is open access under a CC BY-NC 2.5 license.?? This book describes the extensive contributions made toward the advancement of human assessment by scientists from one of the world's leading research institutions, Educational Testing Service. The book's four major sections detail research and development in measurement and statistics, education policy analysis and evaluation, scientific psychology, and validity. Many of the developments presented have become de-facto standards in educational and psychological measurement, including in item response theory (IRT), linking and equating, differential item functioning (DIF), and educational surveys like the National Assessment of Educational Progress (NAEP), the Programme of international Student Assessment (PISA), the Progress of International Reading Literacy Study (PIRLS) and the Trends in Mathematics and Science Study (TIMSS). In addition to its comprehensive coverage of contributions to the theory and methodology of educational and psychological measurement and statistics, the book gives significant attention to ETS work in cognitive, personality, developmental, and social psychology, and to education policy analysis and program evaluation. The chapter authors are long-standing experts who provide broad coverage and thoughtful insights that build upon decades of experience in research and best practices for measurement, evaluation, scientific psychology, and education policy analysis. Opening with a chapter on the genesis of ETS and closing with a synthesis of the enormously diverse set of contributions made over its 70-year history, the book is a useful resource for all interested in the improvement of human assessment.
