Artists, musicians, actors, singers, designers and other creative individuals need to understand basic business concepts if they are to successfully pursue their chosen artistic profession. These skills have historically not been taught to creative students, which leaves them unprepared to make a living from their artistic efforts. Entrepreneurship for the Creative and Cultural Industries will teach the basics of business in a way that is relevant to the challenges of running a small business marketing a creative product. Whether it is understanding the basics of business language, appreciating the crucial importance of finance, or using social media marketing, this innovative textbook covers the entrepreneurial skills required to succeed in the creative sector. Including advice from artists who have turned their idea in to a profitable business and worksheets that can be combined into a simple business plan, Kolb helps non-business minded creatives to understand everything they need to succeed in the increasingly competitive creative economy. This textbook is essential reading for non-business students who are looking to understand the business side of the creative sector whilst its practical style will also suit recent graduates in these industries

- Chapter wise and Topic wise introduction to enable quick revision.

- Commonly Made Errors & Answering Tips to aid in exam preparation.
- Dynamic QR code to keep the students updated for 2021 Exam paper or any further CISCE notifications/circulars.

Physicists are very smart people. Still, when it comes to moving their ideas from university to market, they often lack the basic set of know-hows that could help them succeed in the technology transfer process. To fill this gap, Entrepreneurship for Physicists: A Practical Guide to Move Ideas from University to Market offers a concise analysis of the key ingredients that enable entrepreneurs to bring added value to their customers. After a short discussion on why university physicists should pay more attention to this aspect of their professional life, the book dives into a set of theories, models, and tools that could help an academic scientist transform an idea into customer added value. The reader will be introduced to effectuation theory, internal resource analysis, external landscape analysis, value capture, lean startup method, business canvases, financial projections, and to a series of topics that, albeit often neglected, do play a fundamental role in technology transfer, such as trust, communication, and persuasion. In the last chapter, the book explains how most of the concepts discussed actually find application in the career of scientists in a much broader sense.

An innovative, new multi-level course for the university and in-company sector. Business Advantage is the course for tomorrow's business leaders. Based on a unique syllabus that combines current business theory, business in practice and business skills - all presented using authentic, expert input - the course contains specific business-related outcomes that make the material highly relevant and engaging. The Business Advantage Advanced level books include input from leading institutions and organisations, such as: Alibaba, Dyson, Piaggio, and The Cambridge Judge Business School. The Teacher's Book comes with photocopiable activities, progress tests and worksheets for the DVD which accompanies the Student's Book.

As business schools expand their entrepreneurship programs and organizations seek people with entrepreneurial skills, it has become clear that the skills and mindset of an entrepreneur are highly valued in all business contexts. This latest edition of Entrepreneurial New Venture Skills continues to focus on helping students develop entrepreneurial skills, whether they seek to become entrepreneurs or employees. Focusing on the entrepreneurial start-up process, the third edition of Entrepreneurial New Venture Skills takes the reader through the steps of selecting, planning, financing, and controlling the new venture. The authors cover multiple forms of new ventures, as well as ways to utilize entrepreneurial skills in other contexts, encouraging students to engage with the material and apply it to their lives in ways that make sense for them. Skill development features include: Entrepreneurial profiles of small business owners Personal applications for students to apply questions to their new venture or a current business Global and domestic cases Elevator pitch assignments, which put students in the venture capitalist position Application exercises and situations covering specific text concepts Business plan prompts to help students construct a business plan over the course of a semester Featuring pedagogical tools like review questions and learning outcomes, and a full companion website that expands upon skill development and offers instructor resources, the third edition of Entrepreneurial New Venture Skills is the perfect resource for instructors and students of

entrepreneurship.

This book looks at both the potential and limits of policies to promote entrepreneurship as an important vehicle for social mobility in Latin America and the Caribbean. Who are the region's entrepreneurs? They tend to be middle-aged males with secondary and, often, tertiary education who represent only a small segment of the economically active population in the six countries considered in this book. They come from families in which a parent is, or was, an entrepreneur. In fact, a parent's occupation is more important in the decision to become an entrepreneur than a parent's wealth, income or education. Middle class entrepreneurship tends to dominate the sample in part since this is the majority class in society. However, as a percentage of each social class, entrepreneurship tends to be higher in the upper class, followed by the middle and lower class. Entrepreneurs concentrate in micro enterprises with fewer than five employees. They enjoy greater social mobility than employees and the self-employed, but this mobility is not always in the upward direction. Entrepreneurs face multiple obstacles including stifling bureaucracy, burdensome tax procedures, and lack of financing, human capital, technological skills, and supportive networks. The support of family and friends and a modicum of social capital help cope with these obstacles to entrepreneurship.

Entrepreneurship is an academic discipline that, despite decades of growth in research and teaching activity lacks a traditionally distinct or common theoretical domain. In this book, editors Thomas N. Duening and Matthew Metzger explore entrepreneurial identity, facets of entrepreneurship education in forming and developing this identity and the development of entrepreneurs in general. Chapters focus primarily on macro-level identity issues (i.e., how do these entrepreneurial archetypes form, persist, and sometimes change) or micro-level identity issues (i.e., how can educators and resource providers identify, communicate, and incentivize identity construction among aspiring entrepreneurs), topics that will be of interest to researchers and students alike.

This poignant study presents a collection of research on entrepreneurship and community engagement. The context of this book is Syracuse University's award winning model of Scholarship in Action with its emphasis on sustainable campus-community entrepreneurial partnerships and its resultant 'Syracuse Miracle's the transformation that has occurred in the Central New York community thanks to the university's partnership with the community to drive social, environmental, and economic development. Broken into three engaging sections, this book introduces appraisals of technology entrepreneurship and community engagement; community engagement and entrepreneurship; and entrepreneurship, engagement, and new models of education. The first section includes chapters that focus on successful corporate university partnerships, programs to champion student technology companies, and new models for supporting technology transfer. Section two concentrates on topics including transforming a community law clinic to aid community entrepreneurs, supporting successful entrepreneurs in distressed communities, and engineering a community newspaper in partnership with local residents. The final section includes analyses of services for entrepreneurs with disabilities and an innovative program that connects university students to provide assistance, factors that contribute to innovation and entrepreneurship among adults, and a new entrepreneurial program that provides teacher education.

This book offers helpful insight and advice on how doctoral students and junior faculty can succeed as an entrepreneurship scholar. It invites them to think entrepreneurially to identify research opportunities, manage the publication process, achieve excellence in the classroom, secure a faculty position, and build a research record worthy of promotion and tenure. Drawing from his experience as a research scholar, editor, review board member, mentor, and reviewer of many promotion and tenure cases, author Dean Shepherd offers strategies and other pieces of advice for navigating the obstacles that can prevent a successful scholarly career. This book provides an overview and roadmap to help entrepreneurship scholars achieve success, and stimulates thought and discussion for doctoral students and junior and senior faculty to consider as they look to develop the next generation in academia.

Building on the success of the first volume of Teaching Entrepreneurship, this second volume features new teaching exercises that are adaptable and can be used to teach online, face to face or in a hybrid environment. In addition, it expands on the five practices of entrepreneurship education: the practice of play, the practice of empathy, the practice of creation, the practice of experimentation, and the practice of reflection.
