The world-famous French singer Édith Piaf (1915-63) was never just a singer. This book suggests new ways of understanding her, her myth and her meanings over time at home and abroad, by proposing the notion of an 'imagined' Piaf. Provides a comprehensive and up-to-date review of the development of the science behind the psychology of false confessions Four decades ago, little was known or understood about false confessions and the reasons behind them. So much has changed since then due in part to the diligent work done by Gisli H. Gudjonsson. This eye-opening book by the Icelandic/British clinical forensic psychologist, who in the mid 1970s had worked as detective in Reykjavik, offers a complete and current analysis of how the study of the psychology of false confessions came about, including the relevant theories and empirical/experimental evidence base. It also provides a reflective review of the gradual development of the science and how it can be applied to real life cases. Based on Gudjonsson's personal account of the biggest murder investigations in Iceland's history, as well as other landmark cases, *The Psychology of False Confessions: Forty Years of Science and Practice* takes readers inside the minds of those who sit on both sides of the interrogation table to examine why confessions to crimes occur even when the confessor is innocent. Presented in three parts, the book covers how the science of studying false confessions emerged and grew to become a regular field of practice. It then goes deep into the investigation of the mid-1970s assumed murders of two men in Iceland and the people held responsible for them. It finishes with an in-depth psychological analysis of the confessions of the six people convicted. Written by an expert extensively involved in the development of the science and its application to real life cases *Covers the most sensational murder cases in Iceland's history Deep analysis of the 'Reykjavik Confessions' adds crucial evidence to understanding how and why coerced-internalized false confessions occur, and their detrimental and lasting effects on memory* *The Psychology of False Confessions: Forty Years of Science and Practice* is an important source book for students, academics, criminologists, and clinical, forensic, and social psychologists and psychiatrists.

huge footprints, bizarre rains of fish and frogs-nearly a century after Charles Fort's Book of the Damned was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you"--Taken from Good Reads website.

A hypnotic novel intertwining the author's past with James Earl Ray's attempt to escape after shooting Martin Luther King Jr. The year is 1968 and James Earl Ray has just shot Martin Luther King Jr. For two months he evades authorities, driving to Canada, securing a fake passport, and flying to London, all while relishing the media's confusion about his location and his image on the FBI's Most Wanted list. Eventually he lands at the Hotel Portugal in Lisbon, where he anxiously awaits a visa to Angola. But the visa never comes, and for his last ten days of freedom, Ray walks around Lisbon, paying for his pleasures and rehearsing his fake identities. Using recently declassified FBI files, Antonio Muñoz Molina reconstructs Ray's final steps through the Portuguese capital, taking us inside his feverish mind, troubled past, and infamous crime. But Lisbon is also the city that inspired Muñoz Molina's first novel, *A Winter in Lisbon*, and as he returns now, thirty years later, it becomes the stage for and witness to three alternating stories: Ray in 1968 at the center of an international manhunt; a thirty-year-old Muñoz Molina in 1987 struggling to find his literary voice; and the author in the present, reflecting on his life and the form of the novel as an instrument for imagining the world through another person's eyes. Part historical fiction, part fictional memoir, *Like a Fading Shadow* masterfully explores the borders between the imagined, the reported, and the experienced past in the construction of identity.

The bestselling author of *All the Shah's Men* and *The Brothers* tells the astonishing story of the man who oversaw the CIA's secret drug and mind-control experiments of the 1950s and '60s. The visionary chemist Sidney Gottlieb was the CIA's master magician and gentlehearted torturer—the agency's "poisoner in chief." As head of the MK-ULTRA mind control project, he directed brutal experiments at secret prisons on three continents. He made pills, powders, and potions that could kill or maim without a trace—including some intended for Fidel Castro and other foreign leaders. He paid prostitutes to lure clients to CIA-run bordellos, where they were secretly dosed with mind-altering drugs. His experiments spread LSD across the United States, making him a hidden godfather of the 1960s counterculture. For years he was the chief supplier of spy tools used by CIA officers around the world. Stephen Kinzer, author of groundbreaking books about U.S. clandestine operations, draws on new documentary research and original interviews to bring to life one of the most powerful unknown Americans of the twentieth century. Gottlieb's reckless experiments on "expendable" human subjects destroyed many lives, yet he considered himself deeply spiritual. He lived in a remote cabin without running water, meditated, and rose before dawn to milk his goats. During his twenty-two years at the CIA, Gottlieb worked in the deepest secrecy. Only since his death has it become possible to piece together his astonishing career at the intersection of extreme science and covert action. *Poisoner in Chief* reveals him as a clandestine conjurer on an epic scale.

So when Katherine is diagnosed with a terminal brain disease brought on by an inability to process an ever increasing volume of sensory input, she immediately becomes a celebrity to the "pain-starved public." "SINCE 1933, when a completely drugged and trial-conditioned human wreck confessed to having started the Reichstag fire in Berlin, Dr. Joost A. M. Meerloo has studied the methods by which systematic mental pressure brings people to abject submission, and by which totalitarians imprint their subjective "truth" on their victims' minds. The first two and one-half years of WWII, Dr. Meerloo spent under the pressure of Nazi-occupied Holland, witnessing at first-hand the Nazi methods of mental torture on more than one occasion... Then, after personal experiences with enforced interrogation, he escaped from a Nazi prison and certain death to England, where he was able, as Chief of the Psychological Department of the Netherlands Forces, to observe and study coercive methods officially.... After the war, he came to the

United States...As more and more cases of thought control, brainwashing, and mental coercion were disclosed - Cardinal Mindszenty, Colonel Schwable, Robert Vogeler, and others - his interest grew. It was Dr. Meerloo who coined the word menticide, the killing of the spirit, for this peculiar crime... It is Dr. Meerloo's position that through pressure on the weak points in men's makeup, totalitarian methods can turn anyone into a "traitor." And in *The Rape of the Mind* he goes far beyond the direct military implications of mental torture to describing how our own culture unobtrusively shows symptoms of pressurizing people's minds. He presents a systematic analysis of the methods of brainwashing and mental torture and coercion, and shows how totalitarian strategy, with its use of mass psychology, leads to systematized "rape of the mind." He describes the new age of cold war with its mental terror, verbocracy, and semantic fog, the use of fear as a tool of mass submission and the problem of treason and loyalty, so loaded with dangerous confusion. *The Rape of the Mind* is written for the interested layman, not only for experts and scientists."-Print ed.

*Purity and Danger* is acknowledged as a modern masterpiece of anthropology. It is widely cited in non-anthropological works and gave rise to a body of application, rebuttal and development within anthropology. In 1995 the book was included among the *Times Literary Supplement's* hundred most influential non-fiction works since WWII. Incorporating the philosophy of religion and science and a generally holistic approach to classification, Douglas demonstrates the relevance of anthropological enquiries to an audience outside her immediate academic circle. She offers an approach to understanding rules of purity by examining what is considered unclean in various cultures. She sheds light on the symbolism of what is considered clean and dirty in relation to order in secular and religious, modern and primitive life.

This broad-ranging text offers a comprehensive outline of how visual images, language and discourse work as 'systems of representation'. Individual chapters explore: representation as a signifying practice in a rich diversity of social contexts and institutional sites; the use of photography in the construction of national identity and culture; other cultures in ethnographic museums; fantasies of the racialized 'Other' in popular media, film and image; the construction of masculine identities in discourses of consumer culture and advertising; and the gendering of narratives in television soap operas.

This book is an assessment of the state of Black media, Black families, Black colleges, and Black churches. This discussion manual is a declaration of what must be done to start a MOVEMENT to save the children. This 90-page monologue is an appeal for Black America to reset our agenda by moving away from consumerism and our participation in the entertainment industrial complex and a call for us to return to education and spirituality.

National Book Award Finalist A clear-sighted revelation, a deep penetration into the world of Scientology by the Pulitzer Prize-winning author of *The Looming Tower*, the now-classic study of al-Qaeda's 9/11 attack. Based on more than two hundred personal interviews with current and former Scientologists—both famous and less well known—and years of archival research, Lawrence Wright uses his extraordinary investigative ability to uncover for us the inner workings of the Church of Scientology. At the book's center, two men whom Wright brings vividly to life, showing how they have made Scientology what it is today: The darkly brilliant science-fiction writer L. Ron Hubbard, whose restless, expansive mind invented a new religion. And his successor, David Miscavige—tough and driven, with the unenviable task of preserving the church after the death of Hubbard. We learn about Scientology's complicated cosmology and special language. We see the ways in which the church pursues celebrities, such as Tom Cruise and John Travolta, and how such stars are used to advance the church's goals. And we meet the young idealists who have joined the Sea Org, the church's clergy, signing up with a billion-year contract. In *Going Clear*, Wright examines what fundamentally makes a religion a religion, and whether Scientology is, in fact, deserving of this constitutional protection. Employing all his exceptional journalistic skills of observation, understanding, and shaping a story into a compelling narrative, Lawrence Wright has given us an evenhanded yet keenly incisive book that reveals the very essence of what makes Scientology the institution it is.

Greer, author of Women of the Golden Dawn, and a new afterword with excerpts from rarely seen documents by Fortune herself describing how the book came about. After finding herself the subject of a powerful psychic attack in the 1930s, famed British occultist Dion Fortune wrote this detailed instruction manual on protecting oneself from paranormal attack. This classic psychic self-defense guide explains how to understand the signs of a psychic attack, vampirism, hauntings, and methods of defense. Everything you need to know about the methods, motives, and physical aspects of a psychic attack and how to overcome it is here, along with a look at the role psychic elements play in mental illness and how to recognize them. This is one of the best guides to detection and defense against psychic attack from one of the leading occult writers of the twentieth century.
