Virtually everyone needs a high level of literacy in both print and digital media to negotiate most aspects of 21st century life-succeeding in a competitive job market, supporting a family, navigating health information, and participating in civic activities. Yet, according to a recent survey estimate, more than 90 million adults in the United States lack the literacy skills needed for fully productive and secure lives. At the request of the U.S. Department of Education, the National Research Council convened a committee of experts from many disciplines to synthesize research on literacy and learning in order to improve instruction for those served in adult education in the U.S. The committee's report, Improving Adult Literacy Instruction: Options for Practice

and Research, recommends a program of research and innovation to gain a better understanding of adult literacy learners, improve instruction, and create the supports adults need for learning and achievement. Improving Adult Literacy Instruction: Supporting Learning and Motivation, which is based on the report, describes principles of effective instruction to guide those who design and administer adult literacy programs and courses. It also explores ways to motivate learners to persist in their studies, which is crucial given the thousands of hours of study and practice required to become proficient. The booklet concludes with a look at technologies that show promise for supporting individual learners and freeing busy adults from having to be in a particular place in order to practice their literacy skills. Although this booklet is not intended as a "how to" manual for instructors, teachers may also find the information presented here to be helpful as they plan and deliver instruction.

This book is more than a collection of activities or ready-made lesson plans to add to a teaching repertoire. Instead, Goal-Driven Lesson Planning is intended to empower teachers and help them create a principled framework for their teaching—a framework that will shape the varied activities of the ESL classroom into a coherent teaching and learning partnership. After reading this book, teachers and prospective teachers will be able to articulate their individual teaching philosophies. Goal-Driven Lesson Planning shows readers how to take any piece from English language materials—an assigned text, a random newspaper article, an ESL activity from a website, etc.—and use it to teach students something about language. Readers are walked through the process of reflecting on their role in diagnosing what that “something” is—what students really need—and planning how to get them there and how to know when they got there in a goal-driven principled manner. This book has chapters on the theory of setting specific language goals for students; how to analyze learner needs (including an initial diagnostic and needs-analysis); templates to use when planning goal-driven English language lessons; explicit instruction on giving corrective feedback; how to recognize and assess student progress; and the mechanics and logistics that facilitate the goal-driven language classroom.
