"World Regional Geography: The New Global Order provides a geographical study of world issues through analysis of nine world regions and the countries in each. Political, demographic, economic, cultural, and environmental themes are developed in their geographic, spatial, context. The first two chapters of the text consider geographic approaches to studies of the 21st Century world and the geographic principles that underpin world regional geography. The book is organized to emphasize the comparisons among world regions and the interdependent relationships that are increasing through globalization. At the same time, the processes of localization are continuing to focus attention on local regions within countries and the desire of their peoples for a degree of autonomy. The organization of the regional chapters (3-11) and the inclusion of comparable diagrams and maps within each chapter reinforce the comparative aspect. Instructors and students will have access to PowerWeb, a course-specific website developed with the help of instructors teaching the course to provide you and your students with curriculum-based materials, updated weekly assessments, informative and timely world news, refereed web links, and much more.

World Regional Geography is an exciting science that encompasses a wealth of information regarding geographical landscapes, cultural traditions, population patterns and economic resources. Contemporary World Regional Geography, 4e provides a current, balanced geographical study of world issues through analysis of ten world regions and the countries in each. The authors integrate the themes of "global connections" and "local voices" and utilize a consistent structure within each chapter. Each chapter is organized to begin with environmental issues of the region followed by historical geography, which lead into the sections on the modern global era. The latter part of each chapter continues to be devoted to subregional subdivisions.

Filled with the rich diversity of human life, yet exceptionally concise, World Regional Geography Concepts humanizes geographic issues by representing the daily lives of women, men, and children in the various regions of the globe. As in their more comprehensive text, World Regional Geography, Lydia and Alex Pulsipher make global patterns of trade and consumption meaningful for students by showing how these patterns affect environments and people at the local level. And at around 450 pages, it remains the ideal length for covering all of the world's regions in one semester.

This approach allows serious discussion of cultural and environmental issues, as well as political and economic issues. Each of the nine regional chapters opens with a one- or two-page map of the region, short accounts of people or events to provide a personal flavor of the region, an outline of the chapter contents, and a short section placing the region in its wider global context. Each regional chapter is consistently organized by three sections. The first section summarizes the distinctive physical and human geographies of the region; the second section explores the internal diversity of the region at subregional, selected country, and local levels. The third section focuses on a selection of contemporary issues that are important to the people of each region and frequently have implications for the rest of the world. Each regional chapter follows the same framework, allowing students to easily make comparisons from one world region to

the next. Students are encouraged to consider what it means to be part of a global community and to develop their geographical understandings of world events. The authors have created a text that is readable, with a consistent structure within chapters, containing superior maps and illustrations, and finally – to offer a concise and more affordable text.
