Over the past decade, Internet technology, now merging into that of mobile technology, has transformed the multiple facets of life in society across the world, changing work and leisure patterns, and placing greater demands on us as active, democratic citizens. The Internet literacy handbook, intended for parents, teachers and young people throughout Europe, is a guide to exploiting to the fullest this complex network of information and communication. The handbook is comprised of 21 fact sheets, each covering a particular topic on Internet use,

from searching for information to setting up blogs through to e-shopping and e-citizenship. These fact sheets offer teachers and parents sufficient technical know-how to allow them to share young people's and children's voyages through communication technology. They highlight ethical and safety considerations, give insight into added value in education, provide ideas for constructive activities in class or at home, share best practice in Internet use, and provide a wealth of definitions and links to sites that give practical examples and further in-depth information.

THE STORY: A portrait of the extraordinary (and ordinary) lives of a whole cross-section of Iraqi women: a sexy painter, a radical communist, doctors, exiles, wives and lovers. This work delves into the many conflicting aspects of what it means to Master the assistive strategies you need to make confident clinical decisions and help improve the quality of life for people with disabilities. Based on the Human Activity Assistive Technology (HAAT) model developed by Al Cook, Sue Hussey and Jan Polgar, Assistive Technologies: Principles & Practice, 5th Edition, provides detailed coverage of the broad range of devices, services, and practices that comprise assistive technology. This new text offers a systematic process for ensuring the effective application of assistive technologies — and focuses on the relationship between the human user and the assisted activity within specific contexts. It features over 30 new photos and illustrations, as well as, updated chapters and case studies that reflect current technology. Human Activity Assistive Technology (HAAT) framework locates assistive technology within common, everyday contexts for more relevant application. Focus on clinical application guides application of concepts to real-world situations. Study questions and chapter summaries in each chapter help assessment of understanding and identification of areas where more study is needed. Coverage of

What effect does it have on a person--a soul, a life--to have freedom and self-respect stripped away and then, ostensibly, returned years later after decades of incarceration? The Exonerated attempts to answer this question through the words of six innocent men and women who, after years in jail, emerged from death row to try to reclaim what was left of their lives. Among them are Sunny Jacobs, a mother of two whose unwavering belief during sixteen years in jail that she would be released (despite the execution of her husband, who was also innocent, for the same crime) allowed her to dedicate herself to being a "living memorial" when she was freed. There is Kerry Max Cook, a Texan who was convicted of murdering a young woman even though she was

found with another man's hair grasped in her fist--a man whom "Texas killed a thousand times, and just keeps on doing it" in his nightmares. And there is Delbert Tibbs, a black Chicago poet who speaks of his years on death row with anger and bitterness, yet also, as he says, "still sings." All their stories have been compiled and edited by Jessica Blank and Erik Jensen into *The Exonerated*, a play that is both a riveting work of theater and an exploration of the dark side of the American criminal justice system.
