ESSENTIALS OF PERSONAL FINANCIAL PLANNING Essentials of Personal Financial Planning was written to challenge the status quo by promoting personal financial planning (PFP) as a profession, not as a sales tool to gather assets under management or facilitate sales of insurance products. The book takes a comprehensive and integrated approach to PFP for accounting students, allowing them to view the profession through the lens of a CPA – with integrity and objectivity. This book systematically introduces the essentials of all the major PFP topics (estate, retirement, investments, insurance, and tax), as well as: The PFP process, concepts and regulatory environment. Professional responsibilities of a CPA personal financial planner and the requirements of the Statement on Standards in PFP Services. Time value of money concepts. The book then builds on these foundational concepts, showing their interconnectivity and professional opportunities, to provide a deeper understanding of PFP and its application. After reading this book, students will be able to apply the knowledge and skills gained from this course to have an immediate and long-term positive impact for themselves and for the clients they serve.

for all social workers. Social work practitioners and agency administrators are increasingly confronted with having to do more with less, and must make decisions and provide services as quickly as possible. The *Social Workers' Desk Reference, Second Edition*, builds on the landmark achievement of the first edition with thorough revisions and over 75 all-new chapters. Its outstanding wealth of well-tested knowledge, presented in a crisp, to-the-point manner, makes it an even more vital resource for time-pressed practitioners. Page after page offers an abundance of up-to-date information and key tools and resources such as practice guidelines, program evaluations, validated assessment scales, and step-by-step treatment plans necessary for success in today's managed-care environment. The growing importance of evidence-based practice in social work is reflected throughout the chapters, as well as by the inclusion of an entire section devoted to showing how to use evidence intelligently and efficaciously. The *Social Workers' Desk Reference, Second Edition*, speaks directly to the daily realities of social workers in private, non-profit, and public settings, whatever their expertise and in all areas of practice: assessment and diagnosis, ethics, risk assessment, program evaluation, and beyond. Case managers, clinical social workers, supervisors, and administrators alike who have come to rely on the previous volume will quickly find its successor just as indispensable.

Staying true to Esther Wilkins' pioneering vision that made her best-selling text the "Bible" for dental hygienists, Wilkins' Clinical Practice of the Dental Hygienist, Thirteenth Edition progresses through crucial topics in dental hygiene in a straightforward format to ensure students develop the knowledge and skills they need for successful, evidence-based practice in today's rapidly changing oral health care environment. This cornerstone text, used in almost every dental hygiene education program in the country, has been meticulously updated by previous co-authors, Linda Boyd and Charlotte Wyche, and new co-author Lisa Mallonee to even better meet the needs of today's students and faculty, while reflecting the current state of practice in dental hygiene. Maintaining the hallmark outline format, the Thirteenth Edition continues to offer the breadth and depth necessary not only for foundation courses but for use throughout the entire dental hygiene curriculum.

Planning algorithms are impacting technical disciplines and industries around the world, including robotics, computer-aided design, manufacturing, computer graphics, aerospace applications, drug design, and protein folding. This coherent and comprehensive book unifies material from several sources, including

robotics, control theory, artificial intelligence, and algorithms. The treatment is centered on robot motion planning, but integrates material on planning in discrete spaces. A major part of the book is devoted to planning under uncertainty, including decision theory, Markov decision processes, and information spaces, which are the 'configuration spaces' of all sensor-based planning problems. The last part of the book delves into planning under differential constraints that arise when automating the motions of virtually any mechanical system. This text and reference is intended for students, engineers, and researchers in robotics, artificial intelligence, and control theory as well as computer graphics, algorithms, and computational biology.

For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.
